# Driving efficiency and productivity with standard pack solutions

2/2018

**Presource Products and Services**
**Standard Pack Solutions**

CardinalHealth
*Essential to care™*

# We offer custom and standard kits across all procedural areas:

Some procedures benefit from a standard kit, and more robust procedures need the flexibility and customization of a custom kit.

Our team works with you to evaluate your current practices and determine the best mix of kits to meet your needs.

Operating Room | Cath Lab | Interventional Radiology Lab | Endoscopy and GI Suite | Emergency Room | Women's Health | Nursing floors

Cardinal Health™ Presource Products and Services is the provider of low cost, high-quality kitting solutions to help improve your cost effectiveness and ability to serve patients. We offer custom and standard kits to best meet your needs. Our standard kits contain the core components needed for common surgeries providing savings and efficiencies when compared to purchasing, managing and picking items separately for your cases. With Presource® standard packs, you can count on high-quality items to be used in your procedures, promoting a safe and consistent standard of care. The result is a more efficient supply chain with increased staff satisfaction and safety, and more time for patient care.

*Our promise: We go above and beyond to help you reduce costs and deliver high quality care.*

## How you benefit from a standard procedure pack program:

- Increased efficiencies and cost savings opportunities through practice and process changes
- Product standardization
- Supply consolidation
- Improved inventory management

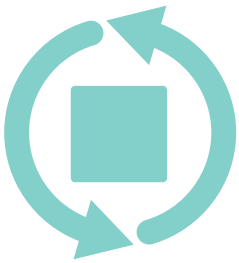
# Next-generation Presource® kits provide solutions to help you focus on what matters most—your patients.

## Quality

High-quality kits and solutions to enable you to focus on what matters most—your patients.

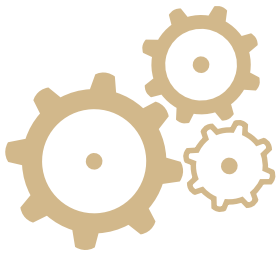
## Cost Effective

Standardization assessments and solutions designed to help you cut costs from the system.



## Predictable

A reliable and simple approach to pricing. Online access to your pricing, inventory and kitting program.



## Innovative

New approaches to help you respond to the changing healthcare environment.

## CHG Bathing Kit

Our CHG bathing kits can help your patients prepare for an upcoming surgery or even bath at their bedside post-operation.

**Chlorhexidine Gluconate Bathing Benefits:**

- Daily washing with 2% CHG significantly reduces subsequent bloodstream infections (BSI) compared to using soap and water.
- Daily bathing with CHG in ICU or advanced care setting may lower central line-associated bloodstream infections (CLABSI).
- AORN suggests a nursing protocol of preoperative bathing with 2% CHG solution for patients undergoing general and vascular surgery.

## Better Stay Kit

The Better Stay kit is **designed with both you — and HCAHPS standards — in mind** to promote a positive patient experience and restorative stay for your patients. Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey scores are becoming increasingly important. With heightened transparency and patient involvement when electing a facility for care, it's crucial to ensure a positive experience to attract consumers.

- **Encourage a quiet, restful atmosphere**
  - Ear plugs
- **Help establish comfort**
  - Lip balm and eye mask
- **Promote meaningful patient/care provider communication**
  - Better Stay journal and pencil

## Miscellaneous

### Anti-fog solution with foam pad

Adhesive-backed, radiopaque sponge delivers solution where it's needed.

- Packaged in a convenient, single-procedure size.

Our anti-fog solution can be applied to endoscopic and surgical camera lenses to inhibit condensation and clouding. The solution is provided in an easy-to-squeeze, 6-gram bottle and includes a radiopaque sponge with an adhesive backing that can be securely affixed to a sponge stick, drape or anywhere convenient within the sterile field. For single patient/procedure use only.
