

# **Inogen One and Major Commercial Airlines**

The Federal Aviation Administration (FAA) has approved the **Inogen One** portable oxygen concentrator for use aboard commercial airline flights traveling within the United States as well as on international flights that begin or end in the United States. Because airline policies for traveling with an oxygen concentrator vary, patients should check with their planned airline before booking tickets. Below is a list of major commercial airlines operating in the United States that allow the Inogen One Concentrator onboard.
