CANNULA OPTIONS FROM SALTER

Salter cannulas provide real patient comfort and convenience. Unique features set them apart, while providing patients with many facets they quickly find unique and satisfying.

Over the years, Salter Labs has established a reputation for quality performance in cannulas that is unmatched and expected. Our customers have come to rely on Salter, and are rarely disappointed. You'll find the range of Salter products and offerings today gives you the choice to perfectly match the cannula to the patient...precisely.

You can expect Salter cannulas to provide:

- Curved, tapered nasal prongs
- Comfortably shaped facepieces
- Lightweight feel; not made with natural rubber latex
- Twist-resisting slide bolo
- Quality and wearability

Match our cannulas to your needs

ADULT CANNULAS

16SOFT Cannula

Designed to deliver comfort with soft material in both the tubing and facepiece for a soft-to-the-touch feel throughout.

16SOFT
The softness is everywhere. Curved, comfortable prongs fit gently into patients' nostrils without pressing too hard upon the upper lip. Soft, pliable, stretchable tubing curves around the cheeks and ears, lessening any pressure. And the Salter 16SOFT features a totally redesigned slide bolo to resist twisting and turning.

PEDIATRIC CANNULAS

It's not enough to take an adult cannula and just make it smaller. Salter pediatric cannulas are specifically designed for kids. Kids who like to squirm and aren't very happy with plastic tubing on their cheeks. With Salter, you can rest assured that every pediatric cannula has been "kid-tested" for comfort and convenience.

1610 Premature

Smaller Salter–Style® Cannulas

For oxygen flows up to 3 LPM and 6 LPM, and one-piece anatomical design for secure positioning as well as patient comfort and freedom.

CANNULA TUBING AND CONNECTORS

2025

Patient satisfaction doesn't start and stop with the cannula by itself. Salter design teams consider every aspect, especially the practical ones like mobility, safety, and appearance. So Salter offers innovations in tubing and connectors you'll find often imitated. But nothing compares to the original.

Our most popular models are indicated by **Salter Green** throughout this catalog.

Oxygen Delivery Tubing

Salter's innovative 3-channel safety tubing is designed to maintain an uninterrupted flow of oxygen, including our patented tubing end fitting. But that's just the beginning of what Salter offers.

CANNULA SECUREMENT

Time-consuming adjustments...
Patient complaints over comfort...
Inconvenient for home use...

You've heard all the comments. And so
have we. So Salter introduced several add-on
features to help address these situations.
With patient satisfaction as our #1 goal, you
may find these Salter products most helpful
for many day-to-day concerns.

Our most popular models are indicated by **Salter Green** throughout this catalog.

Tender Grip®

Designed to hold the Salter cannula head tubing and facepiece in position, this unique skin fixation system was developed for easy application and comfortable use. It allows the skin to breathe, leaving no messy residue, while being practically invisible.

Hydrocolloid Strips

Pre-cut and ready to apply, Salter Labs Hydrocolloid Strips provide a cosmetically acceptable method of securement for a variety of healthcare uses. They leave no messy adhesive residue on skin or tubing and represent a cost-efficient, patient-friendly solution to many everyday healthcare needs.

Description	Units per case	Item number
Hydrocolloid strips, 2 per sheet	25	1217-0-25

HUMIDIFIERS AND WATER TRAPS

7900

For dependable, cost-effective performance, Salter humidifiers deliver a durable, disposable product that's ideal for use with all oxygen sources: concentrators, liquid, tanks, or wall outlets. Unique 360° rectangular diffusion ports offer quiet operation with improved hydration and less system back-pressure.

Our most popular models are indicated by **Salter Green** throughout this catalog.

Standard Bubble Humidifiers

Available with either 3 PSI or 6 PSI pop-off alarms.

Description	Units per case	Item number
350 cc bubble humidifier 3 PSI (brown lid)	**50**	**7100-0-50**
350 cc bubble humidifier 6 PSI (black lid)	50	7600-0-50

High Flow Bubble Humidifier

Ideal for use with high-output oxygen concentrators, wall outlet source gas, or other applications where flow rates of 6 to 15 LPM are required and an audible pressure relief alert is desired. Effectively pairs with Salter 1600HF and 16SOFT-HF nasal cannulas.

OXYGEN CONCENTRATION INDICATOR

PRO$_2$ Check Elite®: A Multifunction Indicator

All-in-one

- Oxygen percent of delivered gas
- Flow rate in LPM
- Output pressure in PSIG or kPa

A small hand-held unit, which delivers all three essential validation checks required to assure proper oxygen concentrator performance.

There's no need to carry a tool box full of test equipment to measure concentrator performance or spot check LOX systems anymore. With microprocessor logic and ultrasound technology—and one simple tubing connection—you'll be ready to go! It comes complete with a carrying case and a 9-volt pre-installed battery.

No calibration required

Minimal maintenance costs

- Factory-set electronic calibration
- If calibration or verification is required to meet company or local standards, it can be performed on-site in minutes with no special equipment
- DC powered with a single standard 9-volt battery and a "low batt" warning display
- Automatic power shutoff after five minutes
- No special tools required to replace battery

The PRO$_2$ Check Elite® Multifunction Oxygen Concentration Indicator is a welcome addition to care providers or repair technicians working with oxygen concentrators. In one compact battery operated instrument you have the ability to readily check three vital parameters of a concentrator's function.

The PRO$_2$ Check Elite uses logic designed to simply and accurately indicate delivery flow measures. It is not affected by normal temperature or elevation changes, and a verification check can be done in 10 seconds with one button. Annual operational costs are one or possibly two 9-volt batteries, depending on usage.

The carrying case has a clear plastic face to protect the unit from spills. Switches are a new membrane style, a low-profile design with no sharp edges to get caught or inadvertently triggered. And the PRO$_2$ Check Elite has a 2-year warranty.

Description	Units per case	Item number
PRO$_2$ Check Elite Multifunction Concentrator Indicator complete in carrying case with belt clip and shoulder strap, 9-volt battery, and connecting tube	1	PRO2ELITE-1
PRO$_2$ Check Ultrasonic Oxygen Indicator complete in carrying case with belt clip and shoulder strap, 9-volt battery, and connecting tube	1	PRO2-1

Physical data
Dimensions: 3.60" W x 5.75" H x 1.29" D
(9.14 cm W x 14.61 cm H x 3.28 cm D)
Weight: 9 ounces (255.15 grams)
Connector: (2) 1/4" anodized aluminum hose barbs
Case: Solid color ABS plastic with threaded metal bolt channels
Response Time: 10 seconds
Warm Up Time: None required
Calibration Requirements: None
Sensor: None
Warranty: 2 years

Battery
Standard 9-volt

Operating Temperature
32°F to 105°F (0°C to 41°C)

Storage Temperature
-29°F to 160°F (-34°C to 71°C)

Specifications: Pressure Mode
Range: 0 to 25 PSIG (0 to 172 kPa)
Resolution: 0.1 PSIG (0.1 up to 99.9 kPa; 1.0 over 100 kPa)
Accuracy: ± 1% of Full Scale

Specifications: Flow Mode
Range: 0 to 10 LPM
Resolution: 0.1 LPM
Accuracy: ± .3 LPM
Sensor: Ultrasonic

Specifications: Concentration Mode
Range: 20.9% to 100%
Response time: 10 seconds
Accuracy: ± 2%
Linearity: ± 2% Full Scale

O₂

CO₂
CAPNOGRAPHY (EtCO$_2$)

DIVIDED CAPNOGRAPHY CANNULAS WITH O₂ DELIVERY

4701

4704

4702

4707

Monitoring of nonintubated patients for end-tidal CO_2 and other exhaled gases can be limited. One reason is that supplemental oxygen, delivered by mask or cannula, tends to dilute end-tidal gases and distort waveforms. But Salter's special capnography sampling cannulas permit an undiluted sample, even with simultaneous insufflation of oxygen or gaseous analgesia. This results in a waveform similar to that obtained with an intubated patient.

Divided Capnography Cannulas
With Simultaneous Oxygen Delivery

Salter design accommodates end-tidal sampling from one naris and oxygen or gaseous analgesia delivery to the other, and does not interfere with patient observation.

Salter capnography cannulas are available with multiple configurations compatible with a variety of capnography monitors and/or room configurations.

Connection type

Salter capnography cannulas are available for monitors with Luer-Lok® connectors

Male Luer-Lok connectors
Female Luer-Lok connectors
Male Luer-Slip connectors
Oral sampling

Salter capnography cannulas are available with an Oral-Trac® oral sampling line to enable sampling from mouth-breathing patients

CO$_2$ filtration

Salter capnography cannulas are available with inline filtration to protect monitoring equipment from moisture

Tubing securement

Salter capnography cannulas are available with two Tender Grip® skin-fixation pads to secure tubing away from the operating site for ophthalmic or other procedures

AEROSOL DELIVERY

NEBUTECH® NEBULIZERS

NebuTech® Small Volume Jet Nebulizers incorporate many innovative design features that help to increase the concentration of medication delivered per patient breath, with less waste than conventional nebulizers. Every breath counts when it comes to treatment-time management and patient satisfaction.

NebuTech patient-friendly add-on features provide a flexible and improved respiratory experience that is unique to each patient, and each patient environment, with unmatched ease of use. This respiratory experience:

- Covers multiple patient settings, options, and positions; for ED, acute care, ICU, EMS, and in-home therapy
- Offers optional mask, filter, and positive expiratory pressure (PEP) therapy
- Allows up to a 45-degree angle to accommodate changing postures or flat horizontal position
- Spans the continuum of care
  - Pediatrics to elderly
  - Hospital to home, which helps ensure better patient compliance with treatments
- Offers a filter option for RT protection from exhaled medications

T-PIECE NEBULIZERS

Salter nebulizers are designed for patient satisfaction and improved performance in varied healthcare settings, such as the home or hospital. Whether disposable or reusable, Salter nebulizers are easy to assemble and disassemble, provide a leak-proof seal, and allow patients to be in a comfortable position for treatment.

8900

Our most popular models are indicated by **Salter Green** throughout this catalog.

Small Volume Jet Nebulizers

Small volume jet nebulizers provide reliable and cost-effective aerosol therapy and feature an anti-drool "T" for extended, uncontaminated use. Each kit offers ready-to-use access with various accessories:

- Supply tubing
- Reservoir tube
- T-connector
- Mouthpiece
- Pediatric mask
- Adult mask
- Thread grip connector

COMPRESSORS

Salter AIRE Elite™ Compressors

These compressors are designed for efficient, quick, and convenient delivery of aerosolized medication. They're lightweight, quiet, and portable, with 2 voltage choices, and paired with either the Salter NebuTech or Salter 8900 T-Piece Small Volume Jet Nebulizer. Each unit is durable, reliable, and easy to use.

All compressor kits are packaged one unit per case.

AEROSOL MASKS

Salter Aerosol Therapy Masks

These masks offer 2 modes of attachment: the traditional elastic-strap style and Salter's exclusive over-the-ear style. Both are designed for secure positioning and patient comfort. Salter gives you the choice. Long-term users and edentulous patients find them both wearable, and soft, feathered edges add to their comfort.

Salter Nebulizer and Valved Mask Kits

These kits combine Salter jet nebulizers with specially designed and constructed therapy masks to diminish aerosolized medication spray from the patient's face. The assembly offers an easy, secure connection between the mask and nebulizer, convenient for caregiver applications. Model options include Directional Flow Valves (VADS) or Micro Vented Ports (MVP).
