

CARE AND MAINTENANCE

⚠ WARNING: Inspect all components periodically and replace as needed.

EVERY THREE MONTHS

- Check and clean casters.
- Tighten bolts in each leg that secure caster into frame.
- Check brakes on casters.
- Check and clean lock recline mechanism.
- Check recliner mechanism for operation in all positions, including Trendelenburg Position, with assistant seated in recliner.

UPHOLSTERY MAINTENANCE AND STAIN REMOVAL

- Ordinary dirt: wash with warm water and a mild soap or detergent.
- Stubborn dirt: using a soft bristle brush, wash with warm water and a mild soap or detergent.
- Ground-in dirt: scrub with powdered cleanser or similar detergent.
- Chewing gum: scrape carefully; remove with kerosene or naphtha.
- Nail polish and remover: Blot immediately to prevent damage.
- Ball point pen: blot immediately with a white cloth dampened in water or mineral oil.
- Paint, shoe polish, heel marks: remove immediately! Use a white cloth dampened in kerosene, naphtha or turpentine. Do not use paint remover or liquid brush cleaners.
- Tars, asphalt, creosote: remove to prevent staining. Clean area with kerosene or naphtha.

⚠ WARNING: When using kerosene or naphtha, do so in a well ventilated area and keep away from fire and flame.

- Waxing and refinishing: improves wearability. Use any quality paste wax.
- A diluted solution of 10% (or less) of bleach or Clorox may be used when cleaning this recliner.

PERMABLOK3® Care and Cleaning Guide — Advanced Vinyl Protection

- Step 1 (eye shadow, mascara, grease, black felt tip pen, crayon, chocolate, suntan lotion, hair and body oils): remove excess spill with a damp cloth. Clean with a 1:1 mix of Ivory® liquid soap and water. Next, rinse with clean water and dry.
- Step 2 (red lipstick): use a straight application of concentrated cleaners such as Formula 409® or Fantastik® spray cleaner. Wipe with a clean cloth, rinse with water, and dry.
- Step 3 (blood, urine, feces, oil base paint, tar, and asphalt): use a 1:1 mix of ammonia and water, or a 1:4 mix of bleach and water. Rinse with clean water and dry.
- Step 4 (all other tough stains): use a straight application of naphtha (lighter fluid). Rinse thoroughly with clean water and pat surface dry. If the stain persists, go to step 5.
- Step 5: use a 1:1 mix of isopropyl alcohol and water. If the stain persists, use straight alcohol. Rinse thoroughly with clean water and pat dry.

Info: For cleaning that requires step 4 or 5, use a soft cotton cloth saturated with the cleaning material and rub the stain in circles 10 times. Pat dry with another soft cotton cloth and check the results.

The information published in this care guide refers to the performance of PERMABLOK3 products in specific tests conducted under laboratory conditions. Results may vary under actual conditions.

This information is not a guarantee and does not relieve the user from the responsibility of the proper and safe use of the product and all cleaning agents. The use of certain agents can be harmful to the surface appearance and lifespan of vinyl. Spradling, its agents, and assigns assume no responsibility resulting from the use of such cleaning agents to the vinyl.

Please check compatibility when using this product in combination with painted or varnished surfaces.

CDC RECOMMENDATIONS

CLEANING AND DISINFECTING STRATEGIES FOR ENVIRONMENTAL SURFACES IN PATIENT-CARE AREAS FOR VINYL UPHOLSTERY, WALL COVERINGS AND FLOORING

- Select EPA-registered disinfectants, if available, and use them in accordance with the manufacturer's instructions.
- Do not use high-level disinfectants/liquid chemical sterilants for disinfection of either noncritical instruments and devices or any environmental surfaces; such use is counter to label instructions for these toxic chemicals.
- Follow manufacturers' instructions for cleaning and maintaining noncritical medical equipment.
- In the absence of a manufacturer's cleaning instructions, follow certain procedures:
 - Clean noncritical medical equipment surfaces with a detergent/disinfectant.
 - Do not use alcohol to disinfect large environmental surfaces.
 - Use barrier protective coverings as appropriate for noncritical surfaces that are:
 - Touched frequently with gloved hands during the delivery of patient care.
 - Likely to become contaminated with blood or body substances.
 - Difficult to clean (e.g., computer keyboards).
- Keep housekeeping surfaces (e.g., floors, walls, tabletops) visibly clean on a regular basis and clean up spills promptly.
- Use a one-step process and an EPA-registered hospital detergent/disinfectant designed for general housekeeping purposes in patient-care areas where:
 - Uncertainty exists as to the nature of the soil on the surfaces (whether it is blood or body fluid or just normal dust or dirt).
 - Uncertainty exists regarding the presence of multi drug resistant organisms on such surfaces.

- Detergent and water are adequate for cleaning surfaces in nonpatient-care areas (e.g., administrative offices). Clean and disinfect high-touch surfaces on a more frequent schedule than minimal-touch housekeeping surfaces. Clean walls, blinds, and window curtains in patient-care areas when they are visibly dusty or soiled.
- Do not perform disinfectant fogging in patient-care areas.
- Avoid large-surface cleaning methods that produce mists or aerosols, or disperse dust in patient-care areas.
- Follow proper procedures for effective uses of mops, cloths, and solutions.
 - Prepare cleaning solutions daily or as needed, and replace with fresh solution frequently according to facility policies and procedures.
 - Change the mop head at the beginning of each day and also as required by facility policy, or after cleaning up large spills of blood or other body substances.
 - Clean mops and cloths after use and allow to dry before reuse; or use single-use, disposable mop heads and cloths.
- When performing low- or intermediate-level disinfection of environmental surfaces in nurseries and neonatal units, avoid unnecessary exposure of neonates to disinfectant residues on these surfaces by using EPA-registered germicides in accordance with manufacturers' instructions and safety advisories.
