

## **Activator® II and Activator® II EZ-Grip**

Activator Methods sleekest and smoothest model provides adjustable excursion for unsurpassed precision and control.

Effective adjustment due to the weighted anvil of the Activator II.

Superiority of the high-speed, low-force chiropractic adjusting instrument allows for comprehensive treatment to all areas of the spine, including the extremities.

Accommodate pediatrics, geriatrics, and small body frames with a gentle and comfortable adjustment method.

Designed for practitioners with smaller hands, the Activator II EZ-Grip instrument has a shorter distance between the handle and finger grip.

## **Activator® IV and Activator® IV EZ-Grip**
