

MILLIKEN HEALTHCARE PRODUCTS, LLC

GENERAL OVERVIEW

ACTIVE FLUID MANAGEMENT® TECHNOLOGY

Active Fluid Management® (AFM®) Technology is a three part design that combines **two layers** of high performance fabric using a **micro-knit process**. This creates a powerful moisture transfer mechanism that pulls away and traps excess exudate. The combination of these fabrics keeps the periwound skin dry, the wound bed moist, and harmful exudate away from a healing wound.

THREE UNIQUE BENEFITS

Pull exudate away from the wound

Preserve optimal moisture

Protect healthy skin

DRESSING ARCHITECTURE

PROTECTION LAYER

- The layer that makes contact with the wound bed and surrounding healthy skin.
- Supports 2 critical functions: regulating moisture and protecting healthy skin.
- Unidirectional fibers only wick moisture vertically through this layer.

MICRO-KNIT PROCESS

- Proprietary technology created by Milliken Healthcare Products, LLC.
- Creates the transferring mechanism by which the two layers interact.
- Facilitates balance and regulates moisture at the wound bed.

TRANSFER LAYER

- Designed to be extremely hydrophilic.
- Pulls exudate through the Protection Layer, distributes and transfers it into secondary dressing.
- Creates a continuous capacity to handle moisture and exudate.

OUR BRAND FAMILY

Primary Dressings

Foam Dressings

Graft Cover Dressings

INDICATIONS FOR USE

LOW TO HIGHLY EXUDING ACUTE AND CHRONIC WOUNDS INCLUDING:

- Partial thickness burns
- Skin grafts, donor sites, lacerations and abrasions
- Stage II-IV dermal ulcers (vascular, venous, pressure and diabetic)
- Incisions

AFM® COMBINED WITH OTHER BENEFITS

SILVER

- Proprietary ceramic silver ion technology.
- Powerful controlled release of silver inhibits a broad spectrum of infection causing microbes including antibiotic-resistant strains.
- Activated by the body's own sodium.
- Proven to last up to 7 days.

FOAM LAYER (ULTRA PRODUCTS)

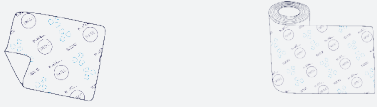

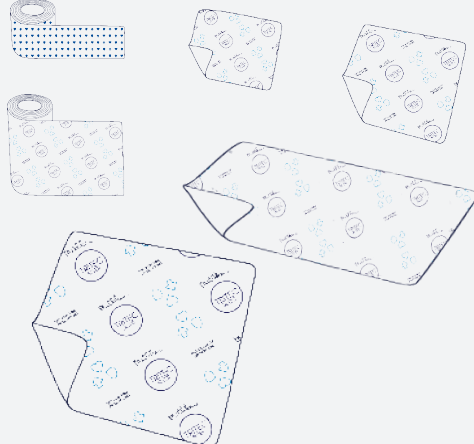

- Absorbing capacity of foam combined with the unique benefits of AFM®.
- Pulls excess exudate through the dressing and across the entire foam substrate.
- Increased absorbing capacity allows for fewer dressing changes.

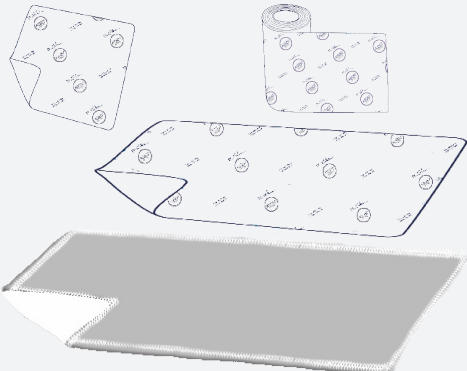

LOW-ADHERENT LAYER (ASSIST PRODUCTS)

- Eliminates the need for a separate non-adherent layer.
- Saves O.R. and nursing time during application and maintenance.
- Dressing flexibility allows for improved range of motion and patient comfort.

PRODUCT OFFERING

TRITEC™	Size	Code	HCPCS	Packaging
	4" x 5"	3000020040	TBD	10 ea/bx 10 bx/cs
	4" x 48"	3000020051	TBD	10 ea/cs
