"Brute" is a registered trademark of Rubbermaid Commercial Products, Inc.

This technology is an additive that renders the plastic bag biodegradable* while maintaining other desired film properties. When disposed, this product is able to be metabolized into biomass by the surrounding microorganisms commonly found within our environment. This biodegradable* process can take place aerobically and anaerobically and can occur without the presence of light. These factors allow for biodegradation* even in landfill conditions.

-  Allows for biodegradation* in landfill conditions
-  Plastic maintains traditional performance ratings
-  Shelf life similar to standard plastic liners and film
-  No Heavy Metals
-  Meets ASTM D5209 - ASTM D5338 - ASTM 5511 testing methods

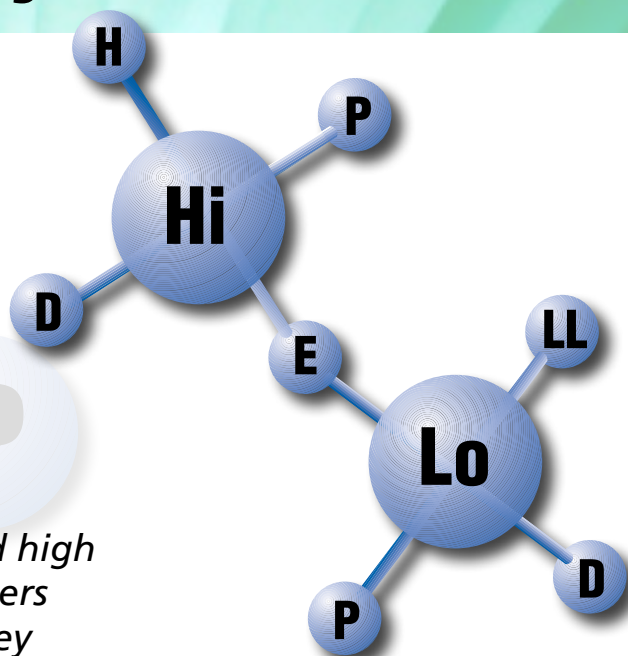

* 49.28% biodegradation in 900 days under non-typical conditions. No evidence of further biodegradation.

Hi/Lo Blended Technology...

GO GREEN!

Our Hi/Lo series of liners help meet source reduction guidelines by conserving resources and reducing municipal solid waste.

Made from a blend of virgin linear low and high density polyethylene, these ultra-strong liners are made to replace "repro" style bags. They provide greater consistency than repro bags and unmatched puncture resistance. If you're using heavy gauge repro liners, consider Colonial's competitively priced Hi/Lo replacements.

RiteSack Liners

Perfect fit liners for the most popular containers.

- Lowest "In Use" cost per bag - Super strength hexene resin
- Star Seal construction helps prevent leaks - Convenient dispenser carton reduces waste and theft
- Each bag printed with gallon capacity and picture of container insuring proper sizing

Wound on rolls without cores, Coreless Rolls are easy to handle and afford you flexibility in the way you distribute liners to your employees. These small rolls are ideal for the healthcare and contract cleaning markets.

- 100% prime resin
- When placed at bottom of receptacle, next liner automatically follows when full liner is removed
- Small, compact rolls are easy to handle

High Density Liners – Flat Pack

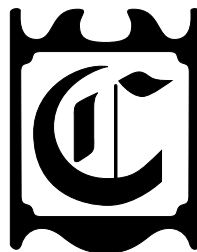

High Density can liners are ideal for normal waste handling. These high density liners offer exceptional strength and puncture resistance; along with excellent gas, moisture and odor barrier properties.

Colonial Bag's innovative X-Seal design allows for easy disposal of everything from hot coffee to heavy liquid waste. Made from 100% prime resin.

Specialty Bags

Colonial Bag provides effective solutions for waste problems to a wide range of commercial and industrial markets including food service, manufacturing, offices, healthcare, schools, state and local governments and contract cleaners. Because no two applications are the same, Colonial Bag offers a variety of finished products to fit your individual waste handling needs. Should you need a special liner for a particular application, Colonial Bag has the knowledge and experience to manufacture custom bags at an economical price.

Please contact Colonial Bag for manufacturing capabilities.
