About the Manikin

The **Life/form**® Patient Education Infant Tracheostomy Care Manikin is ideal for teaching caregivers the skills they will need to perform at home. Students can practice suctioning techniques, proper cuff inflation, dressing changes, and other techniques. Cleansing and maintenance of the external tracheal site can be performed, just as on an actual patient. The infant manikin can be used to teach caregivers basic tracheostomy care skills.

List of Components

- Infant Tracheostomy Care Manikin
- Infant Tracheostomy Tube
- Carrying/Storage Case
- **Life/form**® Lubricant

General Information About the Manikin

The manikin may be used in basic methods of tracheostomy care. Individual methods and procedures may differ; therefore, this booklet does not propose to outline a particular procedure to be followed. Rather, it is recommended that a procedural manual and instructor's directions be followed. This will eliminate confusion and best serve the individual instructor and curriculum.

Procedures That May Be Performed on the Infant Manikin

- Dressing changes
- Stoma cleansing
- Changing of tracheostomy tube
- Cuff inflation
- Changing tracheostomy ties

Care of the Manikin

Normal surface soil can be removed with a mild soap and lukewarm water. Use Nasco Cleaner (LF09919U) to remove stubborn stains. Simply apply the Nasco Cleaner to the soiled area and wipe with a clean, soft paper towel.

Cautions

1. Do not cleanse the stoma area with Betadine® or any other similar, colored disinfectant. NEVER place the trainer on any kind of printed paper or plastic. These materials, as well as ball-point pens, will transfer indelible stains. Do not use any cosmetics on the manikin.
2. Exercise the same care with this manikin as would be used with an actual patient. Excessive pressure and abuse will damage and shorten the unit's life.

Supplies/Replacement Parts for the Patient Education Infant Tracheostomy Care Manikin

LF09919U Nasco Cleaner
