

LOW COST ALTERNATIVE FOR BATHING OF INDIVIDUALS WITH DISABILITIES

We are in a recession and neither individuals nor companies have extra money to spend. But people with disabilities still need to receive basic support for daily living, including bathing. Unfortunately, re-modeling for accessibility is very expensive, and in many cases, not even possible.

Our company offers a low cost alternative and we want to make sure that you are aware of this as you work with the organizations responsible for providing a solution for their clients.

Care Giver Support Products, LLC manufactures the FAWSSit™ Fold Away Wheelchair Shower, a completely self-contained, portable shower stall which can be used by an individual in a wheelchair, or someone who may be at risk of slipping and falling while attempting to access a shower or bath.

Our product costs 1/10th that of a re-model, it can be set up when needed, then folded up for storage as soon as the bath is completed. It is completely portable and only requires a source of warm water, such as a kitchen sink, to provide both the water for the shower and a drain to receive the waste water that is pumped out of a collection pan during the showering. You can see how our product works by going to our website, www.fawssit.com. The enclosed literature illustrates the four separate models we manufacture.

The biggest benefits are ensuring skin health and safety to the patient, which keeps costs incurred from slips, falls, and infections minimized. And, its portability allows for payment only once for a patient, no matter where they live or how often they move. And the cost is literally 1/10th that of a re-model.

Our products are currently being purchased by numerous VA facilities for veterans, Workers' Comp programs in several states, and by individuals with disabilities across the U.S. The FAWSSit is endorsed by AARP, we manufacture only in the USA, and our company is owned by a service-connected disabled veteran and women.

If you would be interested in having additional information, or if you have individuals or organizations who you would want to be made aware of this alternative, please contact us either by telephone, toll free at 877-329-7748, or e-mail, judy@cgsp.net.

Thank you for your time and attention to this alternative for individuals with disabilities.

Judith L. Seidmeyer, R.Ph., President
