Pedialyte® Powder Packs

Oral Electrolyte Powder

- Quickly replaces vital minerals and nutrients lost during diarrhea and vomiting to help prevent dehydration when mixed with water; for maintenance of water and electrolytes following corrective parenteral therapy for diarrhea.
- Use under medical supervision for the dietary management of dehydration during diarrhea and vomiting.
- Promotes fluid absorption more effectively than common household beverages.
- When mixed with 8 fl oz of water:
 - Balanced electrolytes to replace losses and provide maintenance requirements.
 - Provides glucose to promote sodium and water absorption.
 - Low osmolality (270 mOsm/kg H2O).
- Great-tasting flavors to encourage compliance in older infants and children (over 1 year of age).
- Single-serving size limits waste.
- Convenient to keep on hand.
- Kosher.
- Halal (certain flavors).

Safety Precautions

- Not for use for children under 1 year of age.

Ingredients

Preparation

Directions for Preparation and Use

- Reconstitute only with water.
- Mix one packet of Pedialyte Powder with 8 fl oz (1 cup) water. Stir to dissolve.
- Tastes best served cold.
- For children 1 year of age and older: Offer Pedialyte every 1 to 4 hours. To help maintain proper hydration, the child should consume 4-8 servings (32 to 64 fl oz) per day of any Pedialyte product for as long as diarrhea continues.
- If there is also vomiting or fever, or if diarrhea continues beyond 24 hours, consult your doctor.

Storage & Handling

Storage

- Store unused reconstituted product in sealed container in refrigerator for **up to 24 hours**.
- Do not store powder packs at extreme temperatures.
