

STERLING*

Nitrile Exam Gloves

QUALITY PERFORMANCE IN A LATEX-FREE GLOVE CLEARED FOR USE WITH CHEMOTHERAPY

THE WORRY-FREE CHOICE...DESIGNED FOR USE BY EVERYONE, EVERYWHERE

HALYARD* STERLING* Nitrile Exam Gloves provide excellent fit and feel compared to latex. The new nitrile formulation provides excellent comfort and stretch compared to the previous glove, without sacrificing any of STERLING* Nitrile's barrier properties or durability. They also have an Acceptable Quality Level (AQL) of 1.0. That means STERLING* Exam Gloves are significantly less likely to have critical defects than exam gloves that just meet the ASTM 2.5 AQL requirement.

If you want to standardize on one exam glove for virtually all your needs, facility-wide, STERLING* Nitrile is the glove to choose. Just look for the distinctive gray color - your assurance of HALYARD* quality.

PERFORMANCE IN A LATEX-FREE EXAM GLOVE

Latex allergy is a concern within the healthcare industry. With STERLING* Nitrile Exam Gloves, Halyard Health has created a latex-free glove with the protection, comfort, and sensitivity of latex, at a comparable value.

• The Protection of Nitrile

- Halyard's manufacturing process boosts the tensile strength of nitrile—the force required to break through the glove—to increase its already superior barrier protection qualities.

• The Tactile Sensitivity of Latex

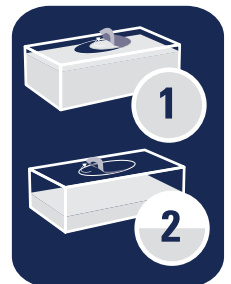

- The process also allows a reduction in glove thickness, which means that less force is required to stretch the material. That gives this latex-free gray glove the dexterity and tactile sensitivity of natural rubber latex.

SAVE SPACE AND WASTE

Standard length STERLING* Nitrile Exam Gloves come in space saving 200 count dispenser boxes. That means up to a 50% saving in the storage space you'd usually devote to gloves. It also means fewer run-outs and replacements in use, which can help increase convenience and compliance. It also means there are fewer boxes to discard, which means less waste for your facility.

SMARTPULL* DISPENSER BOX

The SMARTPULL* dispensing incorporates 2 separate openings on the box. The first, smaller opening is used when the box is full and helps control dispensing to lessen waste from dropped gloves or multiple dispensing. When the box is half empty, the second, larger opening allows easier access to the gloves.

Tested with **52 CHEMO DRUGS** in accordance with ASTM D6978

200 Count Box
Saves Space and Waste!

Product Specifications

Gauge Thickness Measurements	MM	MIL
Middle Finger:	.12	4.7
Palm:	.08	3.1
Cuff:	.07	2.8
Average Length	242mm	(9.5")
	Xtra* 310mm	(12.0")

Physical Properties

Before Aging

Tensile Strength:	42 MPa
Ultimate Elongation:	650%

After Aging

Tensile Strength:	38 MPa
Ultimate Elongation:	550%

All physical properties and product specs are target measurements; target MIL measurements may differ due to rounding.

Quality Standards

Exceeds current ASTM D 6319: Standard Specification for Nitrile Examination Gloves for Medical Application.

Biocompatible as measured by Primary Skin Irritation, Repeat Challenge Sensitization, and Hemolysis Testing.

Note: All specifications are subject to change without notice.

Other Benefits:

- Box opening – significantly reducing the incidence of getting more than one glove while dispensing
- Enhanced comfort and stretch
- STERLING* Nitrile Exam Gloves have an AQL of 1.0 for critical defects. This means that STERLING* Exam Gloves are significantly less likely to have critical defects than exam gloves that just meet the ASTM 2.5 AQL requirement
- The color grey assures you of HALYARD* quality and comfort.

EN The STERLING* Nitrile Exam Glove was tested with the front chemotherapy drug concentrations in accordance with ASTM D 6978, Standard Practice for Assessment of Resistance of Medical Gloves to Permeation by Chemotherapy Drugs.

CAUTION: The testing conditions used are intended to approximate the worse case conditions for clinical use. Testing was conducted on single layer glove material. It is the user's responsibility to determine the applicability of these gloves for the intended use with chemotherapy drugs.

Storage Recommendations: Store in a cool, dry place. Open box should be shielded from exposure to direct sunlight, intense artificial light, x-ray machines and other sources of ozone.

HALYARD* STERLING* Nitrile Exam Gloves

- Non-sterile
- Ambidextrous
- Textured fingertips
- Beaded cuffs
- Higher count, saves space
- Cleared for use in chemotherapy
