Information for Veterans' Administration patients and health practitioners:

Active in CCR registration.

Dun & Bradstreet #: **012775290**

- **C TRAC** is a NEW tool for treating CTS conservatively by stretching the carpal ligament, thus avoiding the need of surgical correction.
- 75% of patients surveyed didn't need surgery after 4 weeks of using **C TRAC**.
- Most patients obtain 70 - 80% decrease in symptoms in the first 2 weeks of using **C TRAC**.
- **C TRAC** is used for 5 minutes, 3 times a day, for 4 - 6 weeks
- **C TRAC** works on both hands, you don't need to buy one for the right hand and another one for the left hand.
- Many physicians are recommending that their patients use **C TRAC** before considering surgery.
- **C TRAC** can be used over and over again.
- **C TRAC** is safe, gentle and effective.
- A Limited Warranty applies. See website for details.
