

Active motion therapy

KINETEC KINEVIA™

The intelligent exercise therapy system

kinetec®

KINETEC KINEVIA DUO™

- Active, passive and assisted therapy modes
- A 7-inch touch screen displaying the therapy
- Quick & Ergonomic tool-free adjustments
- 5-year warranty

A whole body trainer

The KINETEC KINEVIA DUO™ features a leg + arm trainer system making it a complete rehabilitation device for the whole body. The ingenious rotating system for the arm exerciser will provide excellent comfort to the user during both arm and leg treatment.

Training modes for each patient condition

The various training modes available makes it the ideal companion for neurologic and orthopaedic rehabilitation. The pre-programmed trainings feature basic modes (active, passive, assisted, symmetry), as well as a selection of common pathologies (Parkinson's disease, multiple sclerosis, cardio etc...).

Pre-set programs to guide therapy

The 7-inch touch screen offers a user-friendly interface guiding the patient through the therapy and providing an instant feedback on objectives and results. Combined with the KINETEC KINEVIA COCKPIT™ software, the device will track patient progress helping the patient management during rehabilitation.

Aesthetic design & high quality materials

The KINETEC KINEVIA DUO™ offers clean lines, functional design and durable materials to provide the user with the best and safest experience. The 5-year standard warranty supports the quality and reliability of the device.

KINETEC KINEVIA™

- The exercise therapy system dedicated to lower extremities
- Tool-free adjustments for pedal radius and width
- Evolution compliant
- 5-year warranty

Easy adjustments

The KINETEC KINEVIA™ has been designed to minimize efforts during set up and avoid the use of tools. The exclusive pedal width & radius adjustment will accommodate all types of patients and will maximize their comfort while using the equipment.

Safety first

Because patient safety is key, the KINETEC KINEVIA™ will provide through its user friendly interface different levels of activity according to the patient condition as well as a unique & adjustable spasm control feature.
