## A Suite of Powerful Products

Hydrofera Blue® provides wound care professionals with a suite of multifaceted, intuitive, and cost-effective products for a range of wound care needs.

With the same antibacterial and non-cytotoxic properties of its flagship CLASSIC product, Hydrofera Blue dressings are effective in all phases of the wound healing process, helping patients get back to their lives, faster.

## Faster Healing. Less Cost.

In a retrospective study examining wound treatment data of more than 30,000 patients over a two-year period, Hydrofera Blue dressings combined with an Advanced Wound Management Program showed faster healing times and lower treatment costs.<sup>1</sup>

Compared with other advanced wound dressings, Hydrofera Blue showed a 7-day reduction in healing time and 24% reduction in nursing Labor cost.

Compared with other commonly used dressings on patients who were not on an Advanced Wound Management Program, Hydrofera Blue delivered over a 50% reduction in healing time and a 75% reduction in nursing labor cost.

*Now that's powerful wound care.*

Hydrofera**BLUE**®

# Hydrofera Blue CLASSIC

Polyvinyl Alcohol (PVA) Foam Dressings

## Powerful Wicking

- Wicks bacteria laden exudate into the foam and away from the wound surface with natural negative pressure through capillary flow.

## Edge Effect

- Multiple authors have noted resolution of rolled or epiboled wound edges with use of Hydrofera Blue CLASSIC dressings.<sup>2-5</sup>

Granulating wound bed with epithelial cells on the edge

## Debridement

- Example of devitalized tissue removed at dressing change.

## The Safe Non-Cytotoxic Choice

- Ideal for clinicians looking for an alternative to silver dressings
- Less expensive than many silver foam dressings<sup>5</sup>
- Compatible for use with Hyperbaric Oxygen Therapy (HBOT)
- Compatible with growth factors and enzymatic debriders

Hydrate  
before use

## Wound characteristics

- Deep, tunneling or shallow
- With or without devitalized tissue/slough & debris
- Moderate to heavy exudate
- Infected or at risk of infection
- Acute or Chronic Wounds

## Clinical benefits

- Continuous wicking, highly absorptive
- Safe, autolytic debridement
- Manages bioburden
- Safe, Non-cytotoxic
- Does not inhibit growth factors
- High tensile strength

# Hydrofera Blue READY

Polyurethane (PU) Foam Dressings

Maintains a moist wound environment without the need for hydration and has a wear time of up to seven days, requiring fewer dressing changes.

No hydration required

### Wound characteristics

- Shallow wounds
- Moderate to heavy exudate
- Acute or Chronic Wounds

### Clinical benefits

- Manages bioburden
- Safe, Non-cytotoxic
- Kills bacteria in the dressing
- Up to 7-day wear time

### Broad-spectrum antibacterial protection

- Provided by two organic pigments, methylene blue and gentian violet
- Non-cytotoxic

### Absorption

- Absorbs and retains bacteria-laden exudate

### Waterproof film backing

# Hydrofera Blue READY-Border

Polyurethane (PU) Foam Dressings

Provides a perfect solution for secure wound protection and atraumatic dressing removal.

No hydration required

### Perforated Silicone Adhesive Border

- Non-cytotoxic antibacterial protection
- Does not inhibit fibroblasts or growth factors
- Gentle silicone adhesive for atraumatic dressing changes

Secure fit for difficult-to-dress areas and mobility

Atraumatic removal

### Wound characteristics

- Shallow wounds
- Moderate to heavy exudate
- Acute or Chronic Wounds

### Clinical benefits

- Non-cytotoxic antibacterial protection
- Gentle silicone adhesive for atraumatic dressing changes
- Does not inhibit fibroblasts or growth factors<sup>2</sup>
- Kills bacteria in the dressing
- Up to 7-day wear time

Secure hold, yet gentle removal

Waterproof and breathable cover film

Intimate contact of foam with the wound bed provides better absorption and bioburden control

# Hydrofera Blue **READY-Transfer**

Polyurethane (PU) Foam Dressings

Tackles wounds with higher exudate, managing absorption of the secretions while maintaining a moist wound bed.

**Broad-spectrum antibacterial protection**

**Absorption**  
No film backing increases exudate management options

Exudate is transferred into secondary absorbent dressing

To apply, place READY-Transfer over the entire wound.  
Apply absorptive cover dressing.  
Can be used with compression wrap and total contact cast.

### Wound characteristics

- Shallow wounds
- Moderate to heavy exudate
- Acute or Chronic Wounds

### Clinical benefits

- Manages bioburden
- Safe, Non-cytotoxic
- Kills bacteria in the dressing
- Up to 7-day wear time

# Hydrofera Blue **Specialty** Dressings

Hydrofera CLASSIC offers specialty dressings for ostomy appliances and for tunneling applications, where the need to manage bioburden is always a priority.

Ostomy Dressing

### Ostomy Dressing characteristics

- A unique antibacterial wound dressing that can be used under Ostomy barriers
- Manages bioburden, which helps the bodies own immune system restore bacterial balance
- Broad spectrum activity against a wide variety of bacteria and yeast commonly found in wounds

Tunnel Dressing

### Tunnel Dressing characteristics

- A unique antibacterial wound dressing that can be used for Sinus Tracks and Tunnels.
- Wicks bacteria laden exudate, slough and debris out of the wound
- High tensile strength, easy one-piece removal
