

Gel Mate Silicone Gel Sheet

Gel Mate is a medical grade silicone gel sheet for scar management. Gel Mate is self-adherent on one side and backed by an anti-microbial (bacteria resistant) cloth that glides under clothing on the other. Helps flatten and soften raised scars and may prevent hypertrophic (thickened) or Keloid scars. Silicone gel sheets are 100% latex-free

Features

- Medical grade silicone gel helps improve the color and appearance of new or mature scars.
- Applies long-term light pressure on scars and has been shown to add a hydrating effect to the scar and surrounding skin that helps in increasing mobility and faster healing.
- Reduce itching and discomfort experienced when scars begin to heal.
- Sheets include a measurement grid on the back to determine the correct size.
