## TENA® Solutions

TENA® Solutions is a needs assessment that directly focuses on target areas such as resident specific care, personal hygiene, skin health and product selection with improved cost and use outcomes. The program consists of an in home management system that includes staff education, individualized resident focus on product selection to ensure optimal level of independence and a stocking and distribution system to ensure proper clinical outcomes and optimal cost and use.

## TENA Portraits™

TENA Portraits™

TENA Portraits™ is a resident focused product selection tool that factors in the MDS assessment and resident and staff feedback to select the most appropriate incontinence product for each resident. This tool will allow you to properly select a product for each current and new resident that comes to your facility to ensure highest level of function. Additionally this will help with streamlining your ordering by allowing product selection to be easy.

## TENA® QAPI

Recognizing the root cause of a performance issue and where to begin a QAPI project can be the most challenging part. With TENA® QAPI, our team will guide you through the process with a multidisciplinary approach to person-centered resident care, while building communication between facility team members and the resident and family. TENA® QAPI delivers Performance Improvement Projects (PIPs) that focus on proper incontinence care and personal hygiene to allow each resident to live at their highest level of function by consistently delivering proactive care.

## TENA® Education

For over 25 years, our dedicated Clinical Consulting Team has been providing customized service support to facilities and their care staff.

# You do everything to protect your loved ones

We do everything to protect their skin

**1** Keep it Dry

**2** Keep it Clean

**3** Keep it Protected

When you care for an elderly individual, you probably notice that as skin gets older, it gets more fragile and slower to heal. And at TENA®, we know that with incontinence, skin is even more at risk. That's why prevention is key.

Introducing **TENA ProSkin™ 3-Step Skin Health Solution** for elderly, fragile skin affected by incontinence.

# TENA® Features Legend

These icons were created to make it easier to identify the features of TENA® products.

**TENA ProSkin™ 3-Step Skin Health Solution** to help maintain skin health:

- Step 1** – Keep it Dry
- Step 2** – Keep it Clean
- Step 3** – Keep it Protected

Triple Protection for dryness, softness and leakage security with ConfioAir® Fully Breathable Technology to help maintain skin's natural moisture balance.

Designed for protection at night or while lying down.

Tear-away sides for fast, easy removal.

Extended-Wear Protection provides maximum absorbency for extended and overnight protection.

Patented Body-Close Fit™ Technology uses more elastic threads throughout the pant for greater discretion and worry free security.

Endorsed by a leading 3rd party skin health organization with the purpose of promoting healthy skin.

ConfioAir® Fully Breathable Technology – keeps skin comfortable and dry with 100% breathable sides and core to help promote better skin health.

Fully breathable, stretch side panels helps promote skin health and comfort.

Easy-to-use wide hook fasteners along the length of the side panel deliver individualized fit and unlimited, secure fastening.

InstaDri Skin-Caring System® with blue target absorption zone quickly wicks away moisture from the skin.

Odor Control Technology locks away liquid to help reduce odor.

Triple Protection, Targeted Absorption Zone, Ergonic Fit and ConfioAir® Fully Breathable Technology add up to Total Security.

Patented DuoLock® Core Technology has a two core system with absorption capacity where it matters most, wicks away and locks in moisture to help prevent leaks.

Two-tab fastening system makes product application more comfortable for individuals while providing a proper fit to ensure leakage protection.

With soft inner leg cuffs and waist elastic provide a secure fit and the leakage barrier system provides improved leakage security.

# TENA® Skincare

Caring for sensitive and delicate skin that comes with aging is paramount to ensuring good preventative and restorative healthcare. Every person has unique needs and TENA® has a line of skincare products that simplifies your ability to provide a person-centered approach to care while maintaining the high level of quality you desire.

TENA® has developed a three step skin health solution for those living with incontinence. Our years of expertise have shown us that the three most important principles in maintaining skin health are:

1. Keep it dry
2. Keep it clean
3. Keep it protected

TENA ProSkin™ combines these three elements in one incontinence care product range specially designed for elderly skin.

## Step 2: Keep it clean

### TENA ProSkin™ Cleansing Cream

3-in-1 formula promotes skin health by gently cleansing, moisturizing and soothing vulnerable skin. Helps maintain skin's natural pH while also helping to control odor.

\*versus comparable non-flushable wipes

\*\*It is recommended that all disposable washcloths are thrown away in the garbage. If disposing into a system connected to municipal sewer, only one wipe should be flushed at a time. Flushable in properly maintained, code-approved toilets and sewers. Not approved for septic use. Not all systems can accept flushable wipes. Do not flush if: RV or marine system; grease or fat disposal share drain pipe; any history of slow flow or clogs; system includes macerator toilet or household pump; advised by system operator; or unsure of system capability. If problems develop, stop use immediately. Failure to follow instructions may result in clogs and/or property damage.

#### TENA ProSkin™ Dry Washcloths

The multi-purpose, disposable TENA® ProSkin Dry Washcloths are a soft, easy to use alternative to reusable washcloths. Embossed cloth-like material is ideal for incontinence care, bathing, or clean up tasks. Often used wet with TENA ProSkin™ Cleansing Cream to clean the perineal area.

# The TENA® Advantage:

## Advanced Technology for Security, Comfort & Dignity

There are a number of factors that can influence the type of absorbent product selected. Families and caregivers should consider the most appropriate size, style and level of protection to meet the unique needs of each individual, while taking into consideration their overall quality of life. TENA® has a comprehensive product range designed to handle multiple urinary episodes while maintaining skin dryness – whether the need is a small pad to manage just a few drops or a more absorbent brief to handle larger volumes of uncontrollable urine loss.

### In Support of Person-Centered Care – Your Most Popular Questions Answered:

#### A Variety of Product Types for Person-Centered Care

#### Q. How do Absorbent Products work?

A. When urine is passed, it is quickly wicked away from the skin...

- 1) Through the absorbent top core to keep the surface dry
- 2) And then into the bottom core
- 3) Where it is turned into a gel by the Super Absorbent Polymers
- 4) To prevent any leakage from coming back into contact with the skin. **The product's surface stays dry – thus helping the skin's surface to stay dry.**

#### Q. Why is Proper Sizing so important?

A. It is important to know that the size of the product is not directly related to the amount it can absorb. If the product selected is too large, it will not fit close to the body. The wearer may experience leakage, product sagging, skin irritation and loss of dignity. A properly-fitting absorbent product will encourage fluid to absorb evenly, will help prevent leakage and be more comfortable to wear.

#### Q. What is a Wetness Indicator?

A. The wetness indicator is a guide to indicate that the individual has passed urine and it should be monitored. However this does not mean the product is "full". There is still adequate absorbent capacity left in the product to help maintain dryness for extended wear situations like car travel or to allow for a few extra hours of restorative, undisturbed sleep. If a bowel movement is present, the product should always be changed right away.

#### Q. What are Nighttime Products?

A. Nighttime "multi-void" products contain added absorbency and are designed to keep an individual dry and comfortable over longer periods of time, especially at night to promote undisturbed sleep. Proper rest helps incontinent individuals be more alert in the daytime and more able to participate in the activities they enjoy.

#### Q. Which is more Important... Price only or Total Cost-in-use Performance?

A. The trend in today's economic environment is to purchase the lowest price-per-piece product. While on the surface this may appear to be the most economical solution, in reality it often results in higher daily usage and requires additional products to compensate for inferior product performance. Essity has demonstrated to thousands of care centers and individual consumers that the most cost-effective solution in managing adult incontinence is realized with the utilization of more technologically advanced products.

# Cutimed Epiona®\* Native Collagen Dressing

FEATURING  
3D MATRIX™ TECHNOLOGY

Cutimed Epiona® is a native collagen, absorbent wound dressing designed to “jump start” the healing process in chronic and stalled wounds. A disrupted or damaged extracellular matrix (ECM) cannot support wound healing. The properties of a collagen wound dressing – approximating the skin’s native ECM structure – are acknowledged to be ideal in helping to activate healing.

- Better MMP binding by 50% over other collagen dressings

- Better protection of growth factors for an efficient wound-healing environment

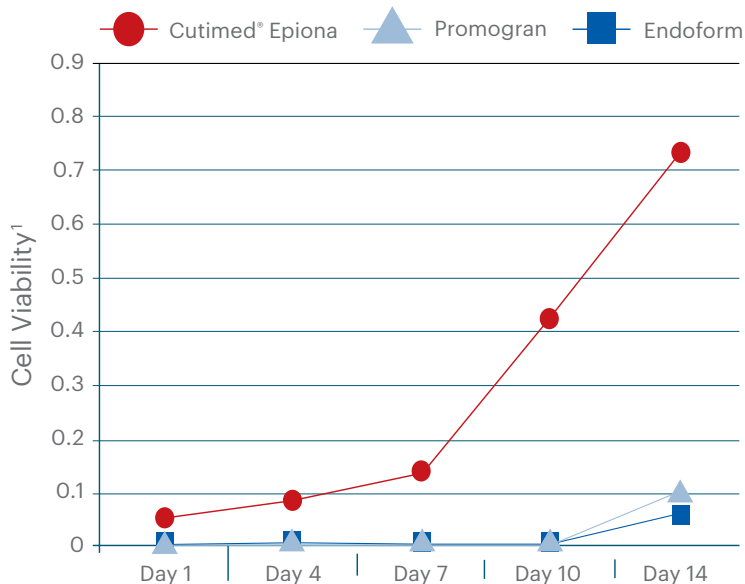

- 7x more pronounced fibroblast cell growth supporting the formation of new granulation tissue

The open porous 3D matrix of Cutimed Epiona® acts as a scaffold to support the regeneration of human dermis that is absent from stalled, chronic wounds. A natural fenestrated structure of dermal extracellular matrix (ECM) collagen.<sup>1</sup>

- Reduces enzymatic degradation from inflammatory cells by binding MMPs
- Delivers structural support and proliferation of vital cells needed for wound repair<sup>2</sup>
- Creates an ECM-like scaffold encouraging cell proliferation and tissue growth

## Fibroblast Cell Growth

Fibroblast cell growth was studied in 14 days of laboratory testing on samples of Cutimed® Epiona, Promogran™ and Endoform™.

Cutimed® Epiona demonstrated more pronounced cell growth than the other collagens.

# JOBST® UlcerCARE™ 40 mmHg\*

JOBST® UlcerCARE™ is designed to help encourage maximum patient compliance for the effective management of venous ulcers. The two-part compression system incorporates a liner that gently holds the wound dressing in place, while the outer stocking delivers the optimal compression to help manage venous leg ulcers.

- Low profile to be worn with shoes; helps wearer to maintain a normal lifestyle
- Helps manage edema
- High static stiffness for improved ulcer healing outcomes
- Seamless circular knit is designed for patient comfort and ease of donning
- Available as a slip on style (without zippers) and with zippers
- Zippers are available on either the medial (inside) or lateral (outside) area of the leg

# Anti-Embolism

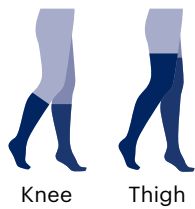

In cooperation with leading vascular specialists, JOBST® engineers developed the JOBST® Gradient Compression Seamless Anti-Embolism Elastic Stocking, specifically designed to combat thromboembolism. The JOBST® Anti-Embolism Elastic Stocking does this by using gradient compression. Gradient compression requires that the greatest amount of pressure be applied to the ankle with this pressure gradually lessening up the length of the leg. Gradient compression helps improve the ability of the veins to move blood back toward the heart. The use of JOBST® Anti-Embolism Elastic Stocking is an accepted prophylaxis for minimizing the risk of thromboembolism in hospitalized patients requiring bed rest or prolonged periods of immobilization.

## JOBST® Anti-Embolism™

- Accurate gradient compression therapy helps minimize the risk of DVT (blood clots)
- Soft, breathable fabric is lightweight
- Reinforced heel makes stocking more durable
- Two styles are available: Knee High and Thigh High
- The range of sizes offered support a proper fit to help increase patient use
- For Men and Women
- Not made with natural rubber latex

# JOBST® FarrowWrap®

## Ready-To-Wear Glove & Toe Cap

Durable and not made with natural rubber latex, the JOBST FarrowWrap glove and toe cap provide compression for patients with mild to moderate edema. Its ultra-thin fabric and fine seams support great wearing comfort. The glove is available in eight sizes and toe cap is available in four sizes, covering a broad range of patients and providing a perfect complement to the rest of the JOBST FarrowWrap assortment. Both the glove and toe cap are trimmable to accommodate finger and toe length.
