Spirit™

Male External Catheter and Collection Systems

Empowering males to live their lives.

Urinary Incontinence, or the involuntary leakage of urine, is a commonly encountered health issue which can bring along challenges with daily activities and overall wellbeing.

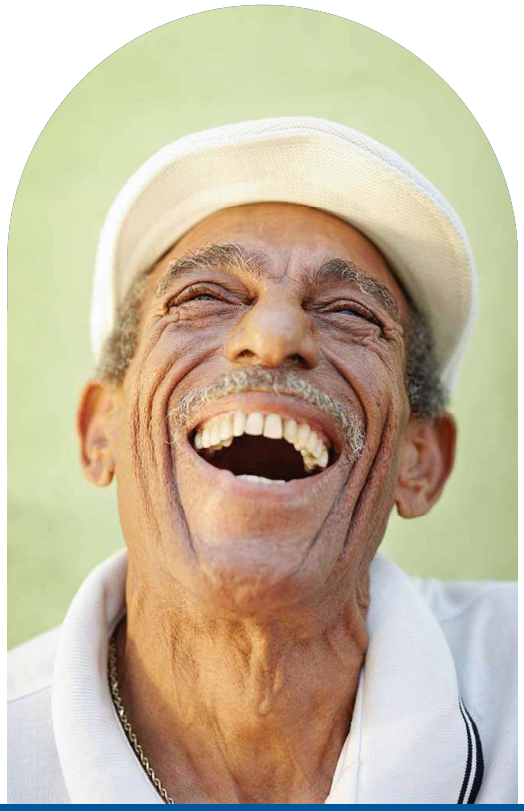

While challenging at first, managing urinary incontinence doesn't have to mean compromising your lifestyle. Male external catheters—also known as condom catheters—offer a non-invasive treatment alternative for urinary incontinence in men.

Whether you're at home, at work, or on the go, male external catheters may fit seamlessly into your routine—empowering you to live life on your terms.

BD, a leading manufacturer of all-silicone urinary catheters, has developed the Spirit™ Hydrocolloid Adhesive Sheath – the next generation of male external catheters.

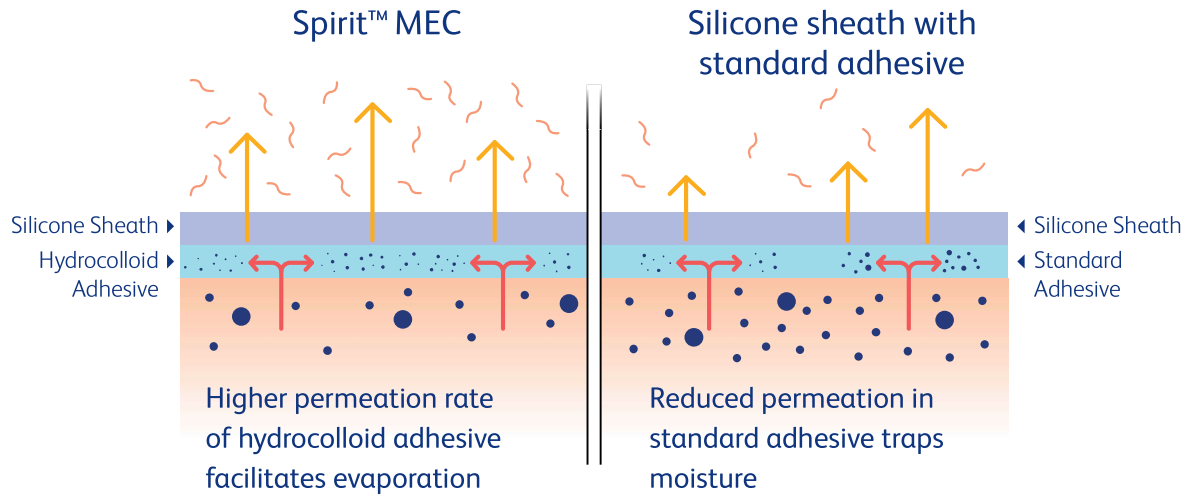

Expanding the boundaries of continence care.

The Spirit™ Male External Catheter features a hydrocolloid adhesive that combines moisture-wicking properties with the breathability of silicone to maintain adhesion.

- **Hydrocolloid adhesive:** The integration of hydrocolloid with the adhesive has been demonstrated to allow the dressing to maintain adhesion.
- **All-silicone construction:** Skin-friendly and breathable material.
- **Visibility:** Translucent silicone material provides a view of the skin that allows for recognition of irritation or skin issues.
- **Highly permeable:** In tests comparing water vapor transmission rates (WVTR) among male external catheters, the Spirit™ Sheath had the greatest degree of permeation.*

Moisture-wicking properties of hydrocolloid adhesive

*Bench testing is not reflective of clinical performance.

Offered in various sizes & styles for optimal fit.

Style 1

» Sheath length: 3” Adhesive length: 1.75”
» Length and placement consistent with traditional male external catheters

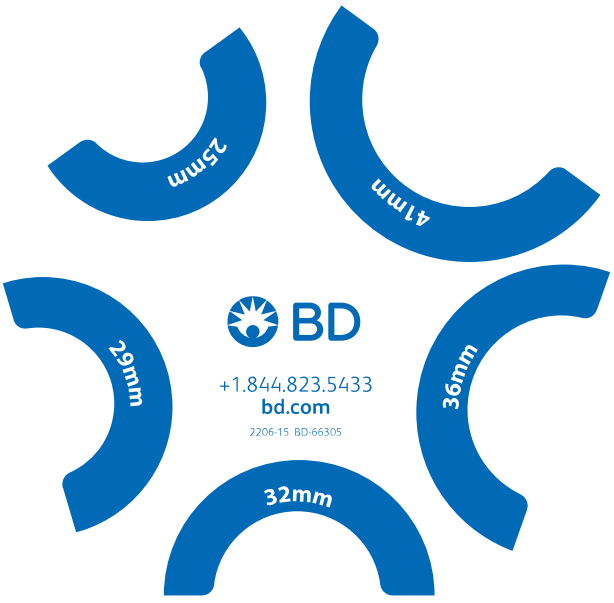

Style 2

» Sheath length: 1.5” Adhesive length: 1.75”
» Maximum adhesive area on less sheath
» Forward placement of adhesive designed to minimize unintended detachment

Style 3

» Sheath length: 3” Adhesive length: 3”
» Additional adhesive area compared to Style 1 and 2
» Forward placement of adhesive designed to minimize unintended detachment

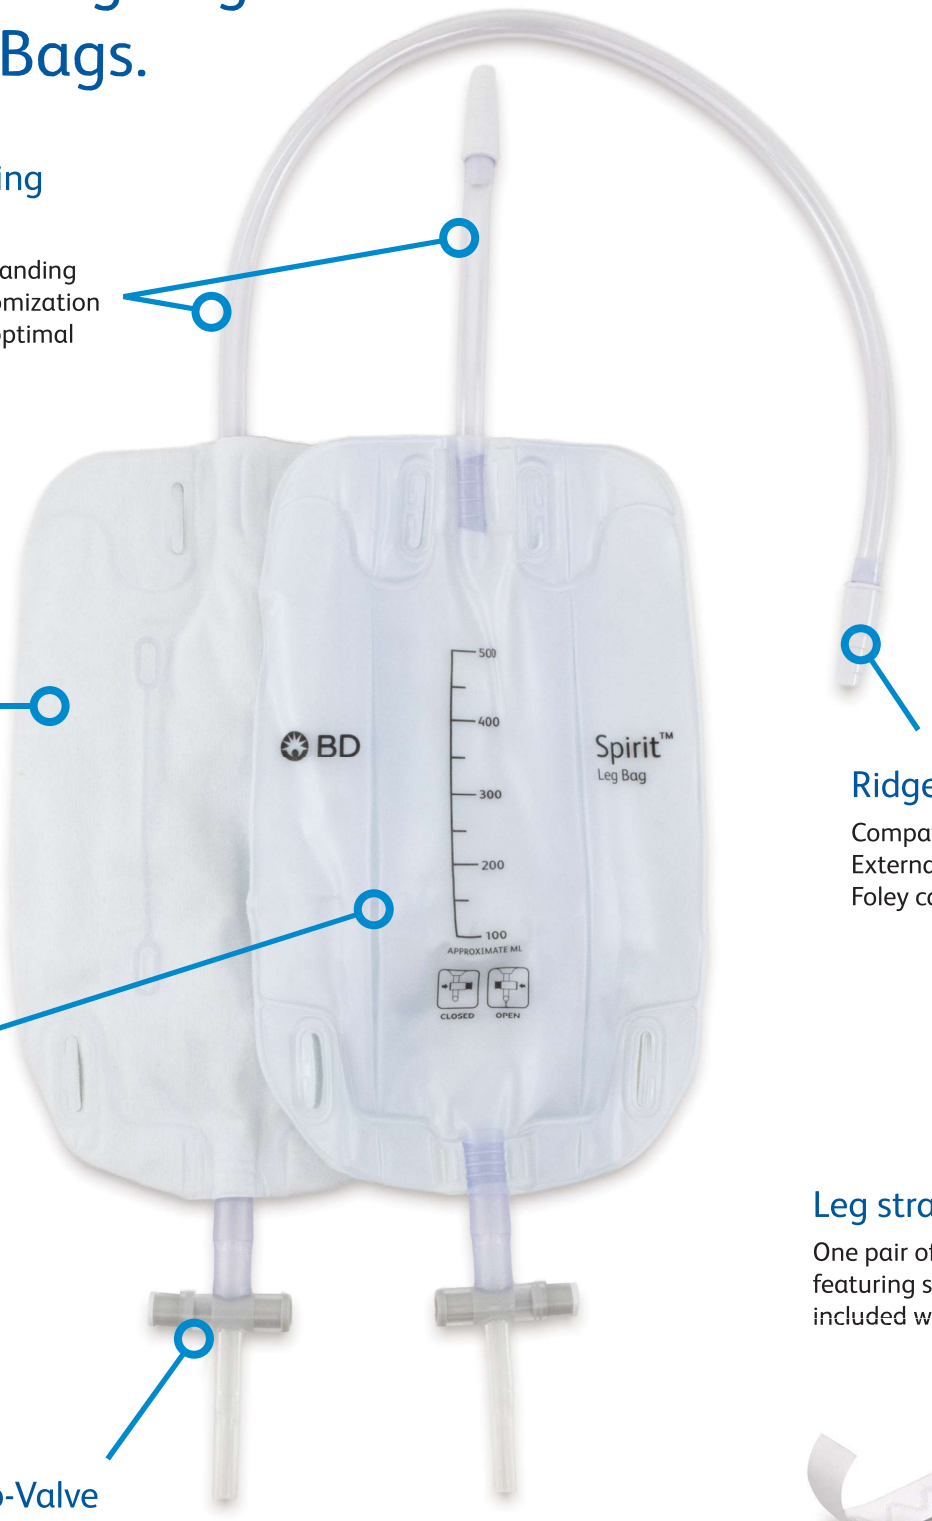

A sizing tool is included in every box to support a proper fit. Aiding in sizing and fitting the MEC properly to facilitate a 360 degree seal is recommended to prevent leakage.

Designed for use with BD Spirit™ Leg Bags & Drainage Bags.

Customizable tubing length

Leg Bags include a freestanding connector, allowing customization of the tubing length for optimal placement.

Soft non-woven backing

For all-day wear.

Ridged connector

Compatible with BD® Male External Catheters and Foley catheters.

Ergonomically designed

Comprised of three distinct chambers compared to traditional single-chamber designs.

Leg straps

One pair of fabric leg straps featuring silicone wave lining included with every leg bag.

Tap-Valve

Preconnected to silicone tubing for connection to an overnight system.

Indications for Use:

Spirit™ Style 2/Style 3 Hydrocolloid Adhesive Sheath WideBand™ Self-Adhering Male External Catheter: The self-adhering male external catheter is designed for the management of adult male urinary incontinence.

Spirit™ Leg Bag: Leg bags are indicated for urine collection with urinary catheters as determined by a physician.

Spirit™ Night/Bed Drainage Bag: Spirit™ Night/Bed Drainage Bags are indicated for urine collection for patients requiring urinary catheterization.

Warnings:

Spirit™ Style 2/Style 3 Hydrocolloid Adhesive Sheath WideBand™ Self-Adhering Male External Catheter: Reuse and/or repackaging may create a risk of patient or user infection, compromise the structural integrity and/or essential material and design characteristics of the device, which may lead to device failure, and/or lead to injury or illness of the patient.

Spirit™ Leg Bag: Remove leg straps for conditions including, but not limited to: discoloration, swelling, numbness, rash, discomfort or if the leg strap is soiled. For pre-existing conditions, and/or if experiencing problems with use of the device, please consult your healthcare professional for assistance.

Spirit™ Night/Bed Drainage Bag: This is a single use device. Do not resterilize any portion of this device. Reuse and/or repackaging may create a risk of patient or user infection, compromise the structural integrity and/or essential material and design characteristics of the device, which may lead to device failure, and/or lead to injury, illness or death of the patient. After use, this product may be a potential biohazard. Handle and dispose of in accordance with accepted medical practice and with applicable laws and regulations.
