Simplifying Needleless IV Access with a Truly Universal Device

The BD Twinpak is a truly universal IV access device, offering two methods of performance over traditional stand-alone devices. It features two cannulas in one shield: one red hub cannula for syringe filling and one clear blunt plastic cannula for safe split-septum access. The BD Twinpak Device is designed to help streamline IV work flow and reduce the number of individual pieces, thereby saving time and reducing costs.
BD Twinpak™
Dual Cannula Device

The Self-Contained Solution

BD™ Red Hub Cannula Syringe Filling Device:
Provides Access to Vials

BD Twinpak Shield:
Holds Both Cannulas Securely

BD™ Blunt Plastic Cannula:
Allows for Safe, Needleless Access to Split-Septum Injection Sites

Green Cap:
Protects / Covers BD Blunt Plastic Cannula Prior to Use

Red Hub Cannula
(Syringe Filling Device):
• 20 G Metal Cannula
  provides versatility in syringe filling from vials, and for other multiple vial access needs (e.g., reconstitution)
• Blunt Tip Design
  provides a safer alternative to a traditional, sharp needle for syringe filling
• Red Hub
  easily identifies the syringe filling device

Blunt Plastic Cannula
(with Green Cap):
• Dual Side Ports
  provide greater fluid dispersion in flushing and drug delivery
• Center-point Design
  features tapered tip for less resistance during insertion
• Universally Compatible
  with split-septum cannula access devices, such as Baxter Interlink®, Hospira LifeShield®, B. Braun SafeLine®, and Alaris VersaSafe® injection sites as well as vials designed for needleless access
• Green Cap
  designed to provide easy identification and a protective cover for clear BD Blunt Plastic Cannula Hub, and can later be used to cover the BD Red Hub Cannula
