NOW BRIGHTER & BETTER!

EVERYDAY ACTIVITY SEAT

LECKEY®
The Everyday Activity Seat is designed specifically for children or young adults with moderate needs who still require pelvic stability but do not need the same advanced level of support as those with complex needs.

Leckey’s full seating range can now offer a solution to those with all levels of ability and will take a child right through school to adulthood.
The fabric options for the Everyday Activity Seat offer comfort, durability and practicality as well as a modern, sleek look. Choose from soft fabric or vinyl in a range of eye-catching colours – with blue, green, raspberry, black and grey to pick from there’s something to suit all tastes and personalities, from those who prefer a classic look to those who like to make a statement!

**EVERYDAY COLOURS**

EVERY OPTION COVERED
The options available - three sizes with a choice of four chassis (basic, hi-low, hydraulic or powered), two chassis colours (black or white), two fabric types (soft fabric or vinyl), five colour options (blue, raspberry, green, grey and black) and a variety of accessories.

GREAT SUPPORT
Provides an optimal level of postural support for those with moderate needs using the four-point harness, the one piece seat base and the split backrest with sacral supports, so that they can enjoy activities at home, school or in respite.

EASY TO USE
The seat has been designed with both the client and carer in mind. The seat, chassis and accessories can be easily adjusted, the cushion covers are easy clean and the footprint of the seat has been kept to a minimum - ideal for use around the home and classroom.

ENABLES SELF-TRANSFER
The seat meets the abilities of the client, supporting self transfer or transfer using a hoist. The one piece metal footplate folds up and locks in position, longer armrests offer support when self transferring or can be easily removed if using a hoist. Tilting in space can be adjusted with the client in the seat.
**EVERYDAY CLINICAL ADVANTAGES**

**OPTIMAL POSTURE + STABILITY + EVERYDAY**

**WHY**
Additional pelvic support benefits those with moderate postural control needs because the pelvis provides the key to overall postural stability.

**HOW**
The Everyday Activity Seat offers exceptional pelvic positioning with a four-point pelvic harness which is easily adjusted from the centre buckle. This is complemented by the seat's simple range of trunk, head, leg and foot positioning adjustments. In keeping with the needs of this user group, the Everyday Activity Seat provides optimal postural stability.

**OPTIMAL COMFORT + EVERYDAY**

**WHY**
It is not possible to sustain an optimal posture without comfort because discomfort disturbs posture.

**HOW**
The Everyday Activity Seat is designed with the comfort of the young person in mind in every aspect. From the soft covers, to the moulded armrests, the seat base cover which tucks underneath the seat base, the contoured back and the ramped seat cushion, the Everyday Activity Seat ensures the comfort (and therefore postural stability) of the client.

**OPTIMAL FUNCTION + EVERYDAY**

**WHY**
Function (the ability to do everyday things) depends on the combination of postural stability and comfort.

**HOW**
With optimal postural stability and comfort achieved, the client will be able to use their arms and hands more effectively and independently. Along with the Everyday Activity Seat's height adjustability from floor to table (hi-low chassis), activities such as playing, eating, reading, writing or chatting with friends become easier and less tiring.
The soft, upholstered pommel transfers. It can easily be removed for hoist length to support self-transfer but has been designed with additional comfort. They have armrests made of soft PU designed for comfort. They have been designed with additional length to support self-transfer but can easily be removed for hoist transfers.

3. Armrests

4. Vertical pelvic support

5. Four-point pelvic harness

6. Armrests

The four-point harness is designed for comfort and stability. It ensures the correct support for the trunk. The four-point harness is available in plastic or wood. The backrest has a large range of height adjustment which cannot be done with the client in the seat.

The Hydraulic Chassis has a large range of height adjustment which can be achieved while the client is in the chair. The mechanism has been designed to assist the carer lifting a heavier weight.

The powered chassis has the same range of height adjustment as the hydraulic and hi-low. However, it is fully powered and can be controlled by either the carer or the client using the handset provided while the client is in the seat.
The standard product includes one piece seat base, split backrest with push handle and chassis. (Seat and base are attached, seat not removable)

Seat shell and chassis

Everyday Activity Seat on basic chassis

Everyday Activity Seat on hi-low gas spring chassis

Everyday Activity Seat on hydraulic chassis

ACCESSORIES

For our full range of accessories and further product information please visit our website: www.leckey.com
Established in 1983, Leckey is a globally recognised pioneer in the research and development of products that help adults and children with disabilities to go, do, enjoy and participate in everyday activities throughout the day and night.

We take a highly clinical approach to product design and development. Through in-depth clinical research studies with leading universities, and extensive trials with occupational therapists, physiotherapists, users and their families, we continue to develop posturally supportive, family friendly products for all-day care, at every stage of life.

Through early intervention, childhood and adulthood, Leckey’s experienced team of designers, therapists and bioengineers work together to develop products that meet the clinical needs of the healthcare professionals and the social needs of the user.

To achieve this, we work with the healthcare professionals, the individuals and carers who use our products every day. With their help, we create the dependable, durable, proven and high performance products that we are known for worldwide.
