THE PRODUCT

RECLAIM YOUR LIBERTY

The Wiesner Incontinence Clamp is an external medical device used to control urine leakage by compressing the urethra and preventing the flow of urine

As the #1 Incontinence Clamp sold in its class through Amazon, Wiesner Healthcare has designed a device that is the answer for active men with incontinence issues. Designed as an adjunct to pads and undergarments the Wiesner Clamp provides the freedom for men to return to activities they were enjoying before.

BENEFITS FROM THE CLAMP

Confidence

Freedom

Life as it was before

The Wiesner Clamp is a simple solution to a complex problem.

The Wiesner Clamp is to be used as an additional option for male incontinence.

It is recommended that clamps be worn no longer than 2.5 hours at a time.

Used together with pads and undergarments there is now a full solution available to men that will allow them to resume normal activities.

The Wiesner Clamp is easy to use, comfortable and a discrete, odorless and dry solution.

TESTIMONIALS

“ Could not do without! Gain a lot of independence and mobility in order to get around. I am on my second purchase. So grateful for my surgeon suggestion for this product. ”

“ I am three weeks post prostatectomy and I have heavy bladder leakage later in the day. I can sit and lay flat with no problems, but standing causes me to fill up pads pretty quick. Used the clamp for the first time this past Saturday and it changed my life! No leaking for the two hours I wore it. Used it again yesterday, Father's Day, for about 6 hrs. Not one drop of urine in the 6 hrs I had it on and for most of the time, I forgot I was wearing it. ”

“ I bought this for my Dad who at 76 yrs old is still very active except for problems with incontinence. He still drives & loves to do his own shopping. Before having this clamp, he literally couldn't go anywhere without having embarrassing accidents & wet pants. Now, he's able to go anywhere he needs to without fear of embarrassment. ”

“ Recently had my prostate removed and incontinence comes with this procedure. I purchased this product so I could go shopping, nite out, dining without filling up a pad. Found this product to do exactly what I wanted "Freedom". ”

COMPANY

We are a company committed to Human Health, which is why we focus all of our efforts and knowledge on creating medical devices that improve the Quality of Life for a greater number of people.

Wiesner Healthcare is a sister company of Optiformas, a plastic injection molding company with the ability to produce products such as this at a high volume, over 2 million units a month. Wiesner Healthcare is a registered DME provider and this clamp is supported by Medicare under HPICS A4356 and can be replaced 4 times a year.
