

sorbion sachet border

Hypoallergenic Adhesive Dressing

sorbion sachet border is an adhesive variant in the growing **sorbion sachet** range, providing maximum performance and comfort.

The innovative design combines a protective shield to external contaminants and the **hydration response technology** core makes **sorbion sachet border** ideal for moderate to highly exuding wounds where quick and easy application is required.

The product design of **sorbion sachet border** provides excellent fluid management properties:

- ✓ Outstanding exudate absorption capacity and retention^[1]
- ✓ Management of proteases, cytokines and free radicals^[3]
- ✓ Reduction of bacterial load^[4]
- ✓ Soft debridement^[2]
- ✓ Maintains dressing integrity^[5]
- ✓ Long lasting patient comfort^[9,10]
- ✓ Easy to apply^[8]
- ✓ Helps to reduce odour^[6]
- ✓ Peri-wound protection helps prevent maceration and excoriation^[7]
- ✓ Up to 4 days wear time

sorbion contact

Atraumatic Protection

sorbion contact combines an innovative 3 dimensional structure with an inert material (ultra low density polyethylene). **sorbion contact** is a modern wound contact layer that provides atraumatic protection with minimum wound contact.

The product design of **sorbion contact** provides atraumatic protection:

- ✓ No adhesion^[14]
- ✓ Gentle^[14]
- ✓ Minimises trauma^[14]
- ✓ Easy removal^[14]
- ✓ Supports the drainage of wound fluids
- ✓ Breathable
- ✓ Free from allergens: silicone, fats and latex
- ✓ Up to 7 days wear time
- ✓ Wide variety of applications including Negative Pressure Wound Therapy^[14]
- ✓ Supports secondary dressings
- ✓ Flexible^[14]
- ✓ May be cut to shape
