

# sorbion sana gentle

## Atraumatic Wound Healing

**sorbion sana gentle** combines a **hydration response technology** core and a unique 3D wound contact layer to support tissue development. **sorbion sana gentle** is indicated as a primary dressing for low to highly exuding wounds of varying aetiologies and is hypoallergenic, making it an ideal dressing for all patients even those with contact sensitivities.

**Hydration response technology** binds two specially selected active components that work together to help absorb and retain large quantities of wound exudate and detrimental agents, which are damaging the wound.

### Key benefits

- ✓ Outstanding exudate absorption capacity and retention<sup>[11]</sup>
- ✓ Tissue protection - minimises pain and trauma<sup>[15]</sup>
- ✓ Hypoallergenic - ideal for sensitive skin<sup>[15]</sup>
- ✓ Cost effective - up to 7 days wear time
- ✓ Easy application - dual sided
- ✓ Promotes fast healing<sup>[16]</sup>
- ✓ No need for wound contact layer
- ✓ No need to layer-up dressings
- ✓ Can be used effectively under compression<sup>[15]</sup>
- ✓ Peri-wound protection helps prevent maceration and excoriation<sup>[16]</sup>

### Exudate management

**sorbion sana gentle** may be used across the spectrum for low to highly exuding wounds:

	Sloughy	Exudate	Granulating	Epithelialising
<b>sorbion sana gentle</b>	✓	Any	✓	✓
Superabsorbent	✓	High		
Foam	✓	Low / medium	✓	✓
Hydrofibre	✓	Low		

### Clinically effective

Contact sensitivities among patients with chronic wounds are prevalent. Whilst a vast array of wound contact dressings and bandages exist, many of these contain potential skin sensitising agents and should be avoided.<sup>[15]</sup>

**sorbion sana gentle's** hypoallergenic properties are ideal for sensitive skin, helping to prevent clinical deterioration where contact sensitivities are known, thus preventing 'avoidable incidences of harm'<sup>[17]</sup> by ensuring patients have positive outcomes.

Mr M. 42 yrs.  
Extensive slough, ulceration.  
Anti-phospholipid syndrome – multiple DVT.

Venous leg ulcer of a 51 year old female patient. Treated with **sorbion sana** in the granulating phase of healing.

Ulcer is cleaner. Islands of epithelium extending. No skin sensitivities. Exudate controlled & dressing frequency reduced from 5 to 3 times per week.

After 15 weeks the wound is completely healed.

### QIPP and cost effectiveness

**sorbion sana gentle** provides the combined benefits of a wound contact layer and optimum fluid management properties.

The Quality, Innovation, Productivity & Prevention (QIPP) programme focuses on improved quality of life and total cost savings. **sorbion sana gentle** meets NHS priorities by providing an innovative, high quality product and the opportunity for the NHS to reduce costs by: improving healing rates, reducing nursing visits and reducing dressing changes.<sup>[16]</sup>

Foams, hydrofibres and superabsorbents are often used inappropriately or in combination with other products leading to high costs. **sorbion sana gentle** provides a cost effective alternative:
