

## **Cutisorb® Ultra**

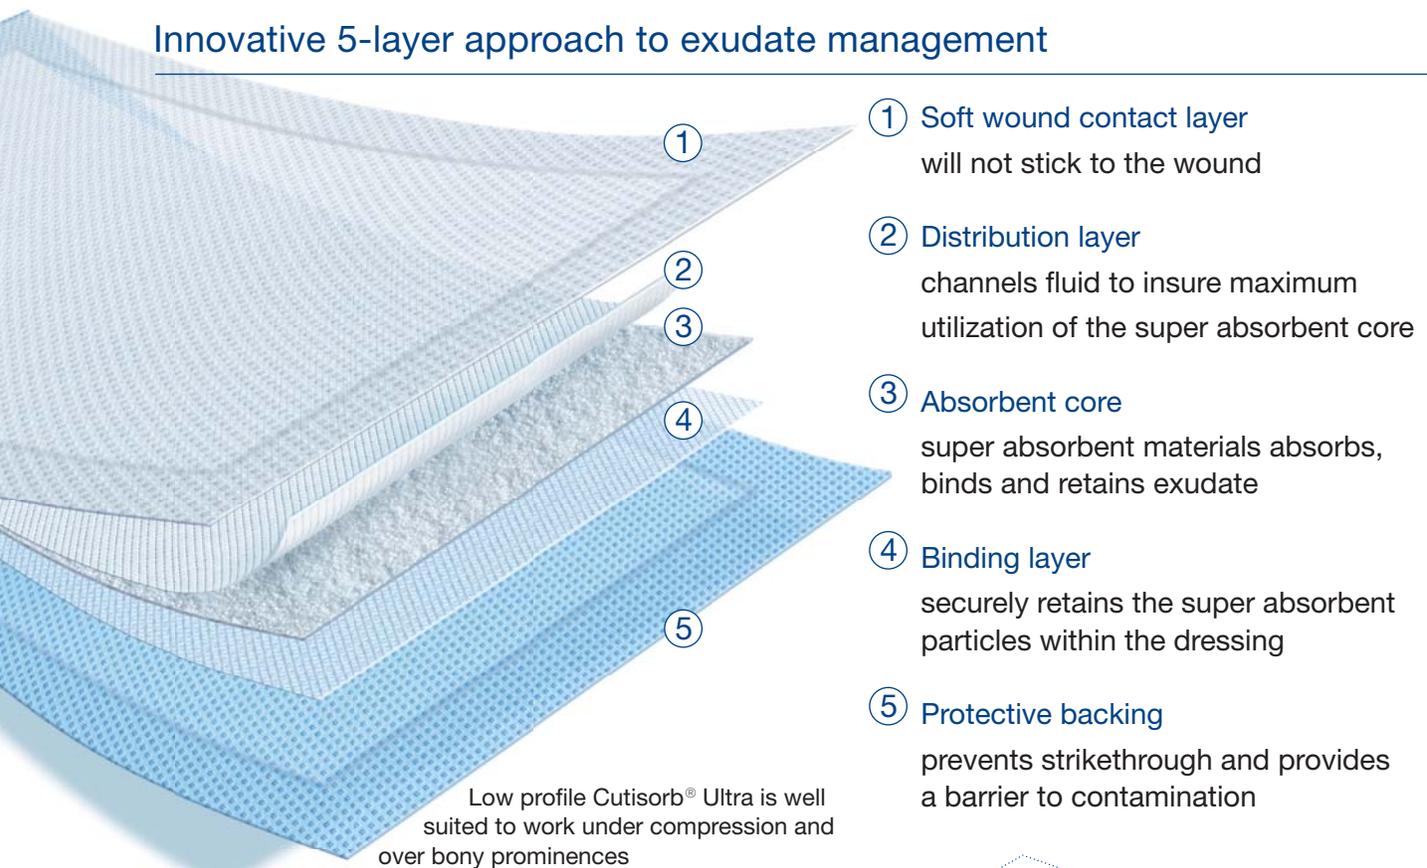

**Super absorbent  
wound dressing**

# Cutisorb® Ultra – Superior exudate management that wo

Cutisorb® Ultra combines innovative materials and state of the art manufacturing processes to provide superior absorption that works under pressure in moderate to highly exuding wounds. The incorporated distribution layer insures exudate is channeled throughout the dressing where the super absorbent particles quickly absorb and irreversibly bind moisture. The soft wound contact layer and superior absorption capacity insure gentle and less frequent dressing changes for a better quality of life during treatment.

## Innovative 5-layer approach to exudate management

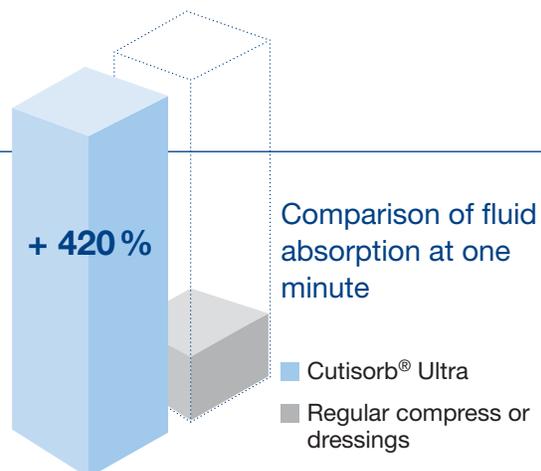

## Superior absorption and fluid management

Cutisorb® Ultra absorbs more than four times the exudate of other wound dressings and permanently locks it away from the wound and surrounding skin even under compression or pressure.

High capacity means less frequent dressing changes providing more undisturbed healing time and saving time, money and resources.

\* Data on file

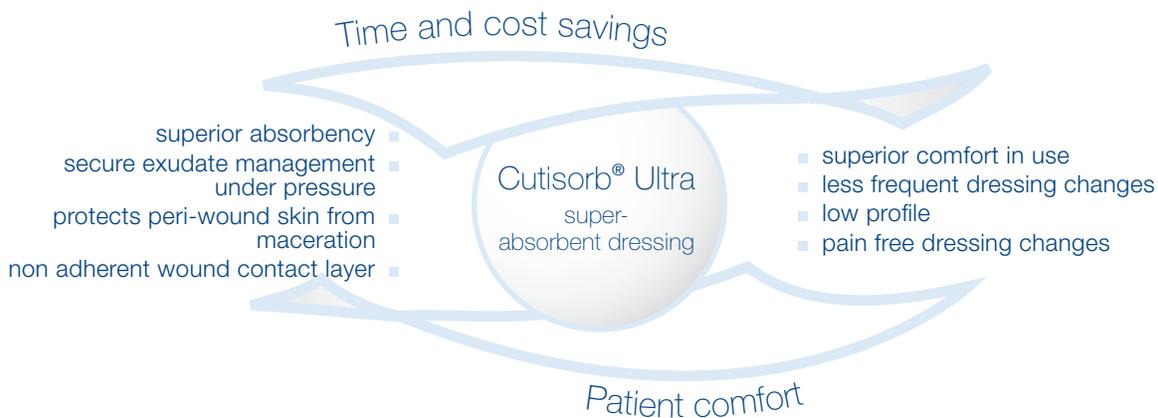

## Secure fluid management

Cutisorb® Ultra channels wound exudate to the dressing core where it is irreversibly bound to the super absorbers. The protective outer layer works with the super absorbers to protect the wound and prevent strikethrough and leakage even under pressure.

- 1 Cutisorb® Ultra
- 2 Standard absorption dressing

## Cutisorb® Ultra: See the difference, experience the benefits

## Indications

Cutisorb® Ultra is indicated for the management of moderate to highly exuding wound including

- pressure ulcers
- diabetic foot ulcers
- venous leg ulcers
- infected wounds under medical supervision

# Cutisorb® Ultra:

## Superior exudate management that works under pressure

- highly absorbent
  - ▶ fewer dressing changes
- maintains optimal wound moisture levels
  - ▶ faster wound healing
- super absorber retains fluid under compression
  - ▶ protects against maceration
- low profile
  - ▶ minimizes pressure points under compression or over bony prominences
- soft and conformable
  - ▶ for maximum patient comfort

### Wound Phase

-  Necrotic
-  Infected
-  Sloughy
-  Granulating
-  Epithelializing

### Wound Depth

-  Shallow
-  Deep
-  Shallow + deep

### Exudate

-  Dry to low
-  Low to medium
-  Medium to high
-  High to excessive

### Cutisorb® Ultra
