Increase Profitability with Medline's Exclusive, Value-Added Programs

Whether you are purchasing for a hospital, nursing home or HME business, Medline understands the issues your industry is facing and can provide solutions. We offer many value-added programs that are designed with your needs in mind.

Increase your knowledge on patient lifting, explore financing options, or get planogram assistance. The following pages highlight the many programs we offer that will save you time and money while increasing peace-of-mind.

For more information on any of the programs we offer, please contact your Medline sales representative.

Factory Direct

Buy straight from our factory for savings up to 20%!

FREE Freight on all direct shipments

Product Delivered right to your door

Custom Labeling and Embroidery available on any order

90 Days to Pay after arrival of goods

Drop Ship

Build your customer base, reduce costs and simplify your operations. Straight from our distribution centers to your customer's front door.

Products! Medline stocks thousands of products and now you can too.

$9.95/Shipment! No minimum order and one flat fee per shipping address on over 10,000 top-selling Medline medical products means significant savings.

Fast Delivery. With 30 distribution centers across the USA, 95% of Medline's customers can expect their deliveries in less than two days.

Expand Your Market. Drop shipping lets you sell statewide or nationwide.

Cut Delivery Costs. Trucks, drivers, fuel, insurance — look for all these expenses to decrease.

Slash Inventories. With Medline's DSP, you don't have to keep all the items you sell in stock—DSP items stay in our warehouse until you sell one.

Financing

Improve your cash flow with flexible financing options.*

Open Account Billing With trade credit from Medline, you'll free up other credit lines and enjoy easy ordering and billing without the hassle of credit card limits.

Leasing Lets you spread your payments over an extended time frame. 12-month, 24-month and 36-month leasing programs are available.

Deferred Payment Plans On many purchases you may take up to 6 or 12 months to pay without interest, all through Medline.

Consigned Inventory** Our Consigned Inventory Program is simple and straightforward. Each month, your Medline sales representative will take a physical inventory and you will be billed only for the products you sold.

*All financing, ordering and payment options are offered subject to credit approval by Medline's finance department. Not every business will qualify.
**Subject to financial approval on the consignment program. Call your Medline sales representative for additional details.

Show The Best with Medline's Top 10

Stock your store with Top Selling Cash Sale items. These proven winners with customers will make a direct impact on your bottom line.

Utilize Medline's graphic design resources with customizable falls management flyers PDFs, driver's upsell checklist PDFs, and posters. Free with qualifying purchases, this program is designed to drive falls equipment cash sales and onsite upsells.

Showroom Merchandising

Generate cash sales, create a pleasant shopping experience for customers, and deliver bottom-line profits to your business.

Space Planning

Your Medline sales representative has the retail merchandising experience you need and can show you how to present products, exude a feeling of wellness, and maximize valuable shelf space. From purposefully designed planograms to eye-popping retail packaging and signage, your Medline sales rep will work with you to create a pleasant and educational shopping experience for your customers. As they are drawn to your well-organized and visually appealing displays, they'll be evaluating higher-end products that are more profitable for you.

Our planograms and insight will help your store:

- Maximize valuable shelf space to generate more profit
- Organize your showroom to enhance the customer experience
- Determine appropriate inventory levels
- Convey breadth and depth of products to your customers

Retail Packaging

Medline's packaging is designed to communicate a product's features and benefits. This helps you stay in-the-know on the products we offer.

Your customers can confidently select the right product with:

- Brightly colored packaging and clear product photos
- Guides to complementary products to further enhance mobility and wellness

Merchandising Kits

Set the tone of your store with lively and colorful displays. Use one kit for every 4 feet of Guardian products.

Merchandising kit includes:
One 4-ft (1.22 meter) valance
Two aisle pop-out signs
Two posters
A complete set of reorder cards
A sample set of slat wall hooks

To Qualify:
For every 4' of Guardian planogram you purchase from Medline, you will receive a FREE Guardian retail merchandising kit. See Guardian Planograms on pages 9-13

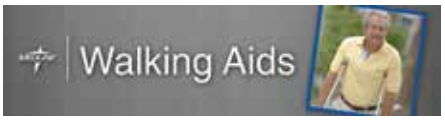
MDSKITG – Guardian Retail Merchandising Kit

Banner Displays

Capture attention with 72" x 36" ft (183 x 91.4 cm) vinyl mesh banners with height-adjustable banner stands.
- Colorful and engaging photography portrays wellness
- Enriches customer experience while shopping

To Qualify:
For every $2,500 worth of DME products sold, you receive one FREE banner stand.
DME includes: wheelchairs, walkers, rollators, bath safety, crutches, canes, orthopedic soft goods, beds and lifts.

MDSWALKBAN – Walking Aids
MDSBATHBAN – Bath Safety
MDSWHEELBAN – Wheelchairs



Category Signs

Make it easy for your customers to see all of the great products you offer – and where they are in your store – with professional and uniform signage that hangs from the ceiling or clips to the top of a gondola. **Receive one FREE Category Sign Kit with every $3,500 worth of DME products sold.** DME products include wheelchairs, walkers, rollators, bath safety, crutches, canes, orthopedic soft goods, beds, and lifts.

Improve the shopping experience and maintain a professional look with category signs. Category sign kit includes:
- Incontinence
- Aids for Daily Living
- Walking Aids
- Caregiver Products
- Bath Safety
- Wound Care
- Diagnostics
- Wheelchairs
- Respiratory
- Bedroom
- First Aid

Order MDSCATSIGNKIT for a spool of chain link and (2) S hooks per sign to hang from the ceiling as well as two plastic clips per sign to display at the top of a gondola. 4 x 1 ft (122 x 30.5 cm)

Retail Displays

The right product mix, right away. Top sellers and profit generators are organized by product family for quick customer service and education. Ask your Medline sales representative for electronic versions of the planograms on the following pages.

- Carefully selected product mix based on proven sales statistics—to grow revenue
- Heavily analyzed product location and groupings—to entice and educate buyers
- Great for a new showroom or a remodel of an existing space
- Promote the same brand that has been trusted by physical therapists and clinicians for over 60 years

Medline will design customized wall displays tailored to fit your available space. Our displays can provide many benefits, such as:

- Streamlining space planning in order to help you increase space productivity
- Allowing you to visualize product placement
- Maximizing selling potential to every square foot of space
- Tightening inventory control and ensuring sufficient inventory levels
- Better positioning of related products

* Please contact your Medline sales representative to see if you qualify for a FREE CURAD® header.

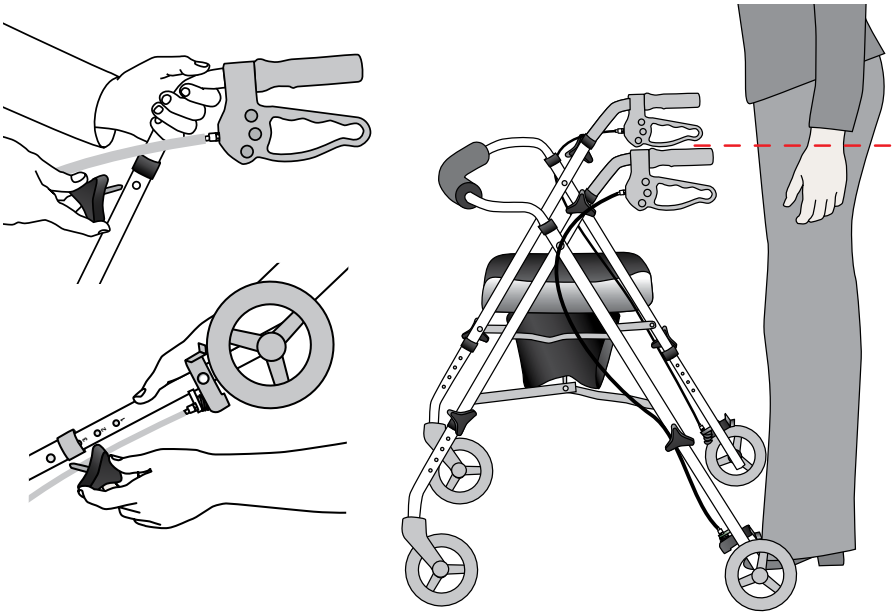
Sizing Guide for Rollators, Walkers, Crutches and Canes

Rollators

Rollators provide users with both a mobility aid and a seat to rest on when tired. These two functions require two measurements be taken to accurately size a rollator. Some rollators only allow for adjustments on the handles, while other rollators adjust at both the handles and on the legs for a more custom fit.

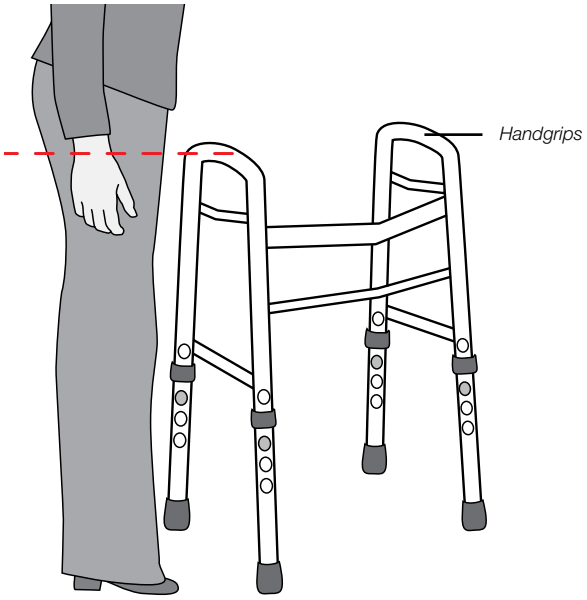
1. Measure from the ground to the crease in the back of the knee. (See Dimension A, page 21)
2. Adjust the rollator legs accordingly so the seat is at same height as A.
3. Keeping arms at your side with a natural bend at the elbow, measure from the ground to the center of the wrist. (See Dimension B, page 21).



Walkers

Proper walker sizing can help prevent poor posture and prevent injury from misuse or falling. Medline's walkers all use push-button mechanisms that let the walkers adjust to various heights.

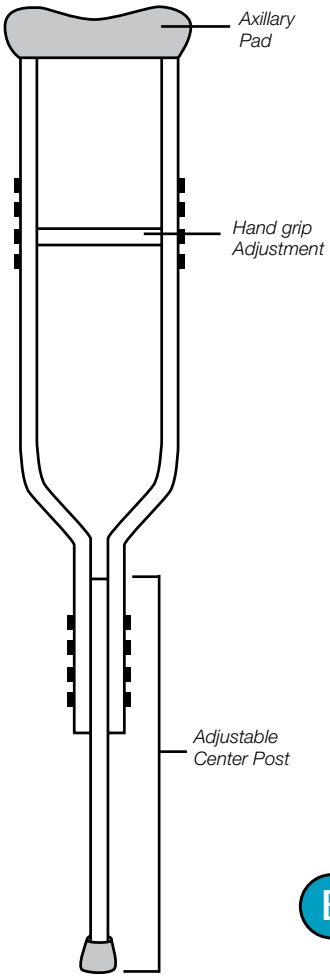
1. Select a walker that is appropriate to the weight of the patient.
2. Keeping arms at your side with a natural bend at the elbow, measure from the ground to the center of the wrist. (See Dimension B, page 21)
3. Adjust all four legs to the same height so that the handgrips match the same height as the wrist.

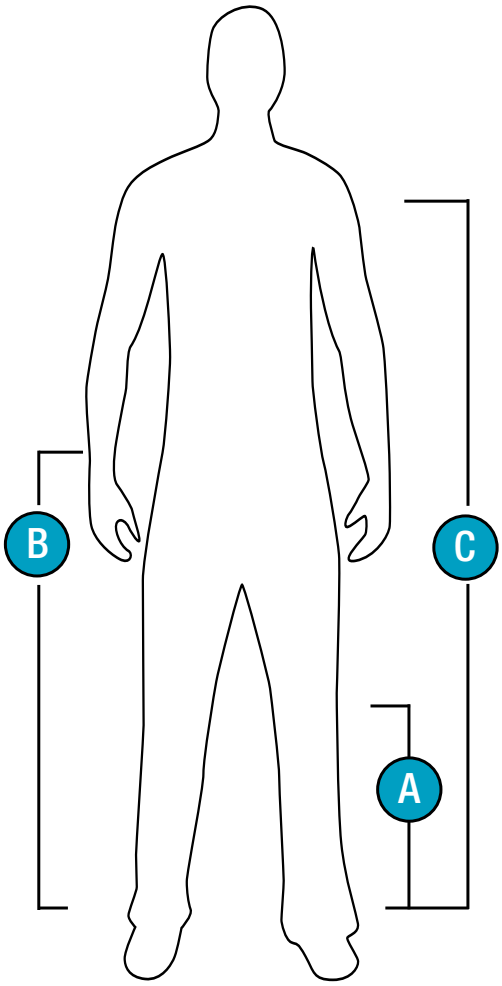


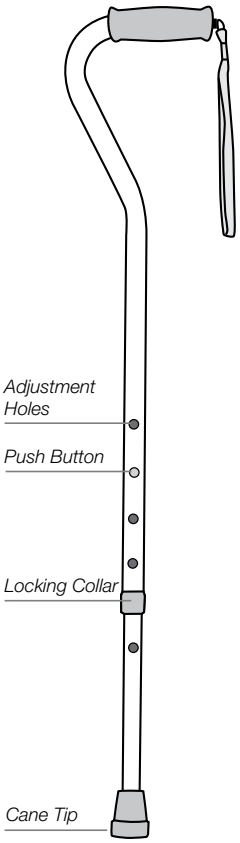
Axillary Crutches

Crutches are the traditional mobility aid for when one leg is almost entirely non-weight-bearing. Aluminum or wooden axillary (under the arm) models can be adjusted easily to both key measures: your overall height and hand height.

1. Select a pair of crutches that is appropriate to the weight of the patient.
2. When sizing for axillary crutches, first measure from the ground to near the bottom of the axilla, or armpit. The crutch cushion should be two to three inches below the axilla. When standing straight, the cushion should not be touching the axilla. This measurement will be the overall crutch height. (See Dimension C)
3. Keeping arms at your side with a natural bend at the elbow, measure from the ground to the center of the wrist. This measurement will be the hand grip height. (See Dimension B)







Sizing Your Cane

Standard canes with a single tip should only be used for those looking for help with balance. Quad canes are useful for those looking to bear weight as they have a wider base. When sizing a cane, follow the steps below.

1. Select a cane that is appropriate to the weight of the patient.
2. Keeping arms at your side with a natural bend at the elbow, measure from the ground to the center of the wrist. This measurement will determine the ideal cane height. (See Dimension B)
3. Loosen the collar on the cane and press the push-button lock, slide the lower tube into or out of the body of the cane until you get to the wrist-height measurement, and let the push button “click” into the closest hole to the measurement. Tighten the collar (check and re-tighten the collar regularly).

NEW! Performance and Style Rollators

- A superior group of rollators for a customer looking for more than the basic
- Engineered with design features that solve specific problems for the user
- Unique colors and additional accessories make these models ideal for a retail showroom
- All models use loop-style hand brakes you push down to lock and pull up to release

MDS86845

Empower Rollator

Versatility meets personality with the Empower Rollator. Padded backrest flips to enable sitting from either side and a simple seat latch allows users to move it for step-in support. Adjustment points are bright yellow making them easy to find. This rollator's patented design allows it to fold completely flat, making it even easier to store. Other features include extra-wide memory foam seat, adjustable legs to vary seat height, comfortable armrests and spacious neoprene storage bag. Also comes standard with folding cup holder, removable storage tote, tray organizer and reflective tape for safety.

MDS86835EURO

Simplicity Rollator

Staying active and mobile has never been easier with our new Simplicity Rollator! Folds up with one hand and stores super compact. Quick release 8" (20.3 cm) casters come standard on its sleek European style frame. Features a roomy, removable storage bag, a convenient stow-n-go clip, a bell for safety and cane and cup holder.

MDS86835SHE*

Posh Rollator

Whether it's on Rodeo Drive or to the grocery store, the Posh Rollator adds stability while reducing stress on the body. Weighing 11 lbs. (5 kg), this durable rollator is 40% lighter than all other rollators on the market. It features a reinforced, pink aluminum frame that is safe and easy to maneuver. Comes standard with a cosmetic mirror, 2 water-resistant zebra print storage bags and a convenient strap to fold the rollator.

MDS86835HE*

Stealth Rollator

The rollator designed for a rugged, stylish man. Features a roomy matte black frame with 7" (17.8 cm) chrome hubs. Comes standard with a cup holder, a rearview mirror, a utility belt and a flashlight!

Deluxe Comfort Rollator with Memory Foam Seat

Find comfortable seating and smooth operation in one model. Extra thick, memory foam seat contours comfortably to create an ideal cushion for tired users while the large, 8" (20 cm) wheels glide smoothly over most surfaces. Convenient cup holder and cane holder come standard. Also comes standard with front storage pouch!

MDS86825SL SERIES

Freedom Ultra Light Rollator

Weighing only 11 lbs. (5 kg), the Freedom rollator is the lightest model on the market. Light weight and folding capabilities make this the ideal model to get in and out of the car/storage. Height-adjustable arms and legs let users find a perfect fit as this rollator accommodates users 4'11"-6'4" (150-193 cm).

MDS808200TR SERIES

Excel Translator: Combination Transport Chair and Rollator

In just seconds, our Excel Translator easily converts from a rollator to a transport chair and vice-versa. Comes with a convenient cup holder, under-the-seat storage bag, zippered side carrying case, and easy-to-adjust push-button foot rests. You will be delighted with the comfortable, spacious seat which is more than 75% roomier than an average rollator seat.

Luxe Rollator w/ Extra-Wide Seat

Discover luxury in a product category that historically focuses on utility. Enjoy the comfort of an extra wide seat in a rollator that still maintains a lightweight design. Height-adjustable arms, legs, and backrest allow users to find a custom fit. Model comes standard with a nylon carry-all bag and a cup holder.

Breast Cancer Awareness Rollator

Support the fight against breast cancer with an eye-popping pink frame and pink ribbon symbol imprinted on seat and backrest. Model comes with a handy basket, large 8" (20 cm) wheels and fully padded seat. ***$2.00 from the sale of every rollator is donated to the National Breast Cancer Foundation.***

MDS86825

Rollator with 8" Wheels

A notch above the standard rollator, with a design focused on dependability. Large 8" (20 cm) wheels are ideal for outdoor terrain and fully padded seat and extra thick backrest provide a quality resting area.

GUARDIAN® Performance and Style Walkers

- A superior group of walkers for customers looking for more than the basic
- Engineered with design features that solve specific problems for the user
- Attractive accents and colors make these models ideal to display in a retail showroom

Help patients get up faster with bi-level hand grips.

Stand Assist Walker

Get patients standing upright and ready-to-go with the Stand Assist walker. Seated users can gradually progress from the lower level of handles to the top level to help stand more easily. Bi-level handles also allow user to position walker over the toilet and use as a toilet safety frame for use in the bathroom when away from home.

Folds flat for easy storage

Folding Paddle Walker

An ideal design for patients with manual dexterity limitations, the paddle mechanism can be flipped-up or pushed-down to fold the walker. Location of the paddles allows patients to keep hands on the grip while using the paddle mechanism.

Compact Folding Paddle Walker

Stylish blue color gives this walker some real personality. Walker comes with paddle folding mechanism for easy operation and legs also fold up making it perfect for transportation or storage. Model comes with both extension legs and the 5" (12.7 cm) wheels in one retail box.

Hemi Sidesteppers and Non-Folding Walkers

- Lightweight design allows the hemi sidestepper to be maneuvered easily even with just one arm
- Hemi sidestepper and non-folding walker provide more stability and weight-bearing ability than a quad cane
- Hemi Sidestepper and non-folding walker are height-adjustable in 1" (2.5 cm) increments

G07770

MDS86620

MDS86204

Premium Hemi Sidestepper

Lightweight frame and folding capabilities make this walking aid ideal for travel and storage. Bi-level hand grips offer extra assistance for users getting in and out of chairs.

Standard Hemi Sidestepper

Wider base provides more stability than a quad cane. Sidestepper provides support and stability to those with limited or no dexterity in one arm or hand.

Basic Non-Folding Walker

Secure frame without folding mechanisms eliminates even the slightest wobble for users needing maximum assistance with balance.

GUARDIAN® Bariatric Walkers

- Higher weight capacities keep larger patients active and moving
- Extra-wide frames give larger patients a more comfortable fit
- Two-button folding capabilities let patients receive support through narrow spaces

Compare walkers side-by-side on page 35

G30754B

MDS86410XWW

G07767

Premium Bariatric 650 lb (295 kg) Capacity

Reinforced aluminum frame with steel "K" cross brace and steel cross braces on each side provide durability. Model has an extra wide frame with 22" (56 cm) between the handgrips for larger patients.

Standard Bariatric 500 lb (227 kg) Capacity

Aluminum frame with front cross brace and dual side braces provides durability. Model has an extra wide frame with 20" (51 cm) between hand grips for larger patients. Available with or without bariatric wheels.

Basic Extra Duty 400 lb (181 kg) Capacity

Lightweight aluminum frame with Guardian steel "K" cross brace. Weighs only 7.5 lbs (3.4 kg) with a 400 lb (181 kg) weight capacity. Walker has 19" (48.3 cm) between handgrips giving extra room for larger patients.

Pediatric Walkers

- Pediatric walking aids feature “grow-with-you” height adjustability
- Models with wheels maneuver well over normal floor obstacles and are ideal for outdoor play areas
- Guardian pediatric walkers have a design to meet everyone’s needs, even the smallest child

G07749

G07751

G07782

Children’s Folding Walker

Lightweight aluminum frame maintains “A” frame design to provide greater balance. Children’s folding walkers have comfortable vinyl hand grips designed for a child’s hand.

Children’s Non-Folding Walker

Lightweight, aluminum frame with proportionally large width to length for a wide stance and greater stability. Large rubber tips come standard to provide long braking action as this model comes with 3" (7.62 cm) front wheels.

Strider Prescription Walker

The infinite configurations accommodate the special needs of children with disabilities. Handles adjust without tools to allow an infinite number of positions for desired posture. Strider walkers have an extra wide base for maximum stability, safety and balance.

MDS86430W

Folding capabilities make this cane perfect for fitting in a suitcase or carry-on luggage.

Offset Handle Canes

- Offset handle design centers the user's weight over the strongest part of the cane
- Ergonomically designed to provide comfort and support for partial weight-bearing users
- Push-button, height-adjustable to find the perfect height
- Secured with a locking ring to provide quiet, rattle-free use and added safety

G05555

G05356

MDS86420

Premium Sure Grip

Offers an ergonomically correct design that relieves palm fatigue and provides extra comfort for the long term user. Sure grip design is easier to grasp and offers enhanced durability for long-term use.

Standard Vinyl Hand Grip

Contoured vinyl hand grip is easy to grasp and offers enhanced durability for long-term use.

Basic Medline Foam Hand Grip

Contoured handles with foam hand grips provide a comfortable, secure grip, complete with convenient wrist straps.

Knee Walkers

- Universal design allows use with either a left or right below-the-knee injury
- Weil Knee Walker with Zero-Turn Radius

MDS86000G2B*

MDS86000G2

Designed by Dr. Lowell Weil Jr., Podiatric consultant to the Chicago White Sox baseball club.

Premium Weil Knee Walker G2 and G2B

Easy and comfortable to use, the G2 is a great alternative to crutches and features the Zero-Turn-Radius (ZTR) lever. The ZTR allows the end-user to change the front wheels from rigid to swivel while locking the tiller to ensure the alignment integrity is maintained. This is beneficial when in tight places. The unique 3-wheel design is ideal for end-users with either a left or right leg below-the- knee injury. A full length, extra-padded leg rest prevents discomfort. Tool-free for easy height adjustments. Basket and cup holder come standard.

MDS81000

Basic Knee Walker

Great for transportation, the basic 4-wheel design is lightweight and folds down easily. Model has a universal front brake. Cup holder comes standard.

Falls Among Older Adults: An Overview

The chances are good that a senior citizen will take a fall during the year. A fall can be devastating to the person's health and well-being. Understanding the risks of falls, where they tend to occur, and possible solutions will help you address the concerns.

How big is the problem?

- One out of three adults age 65 and older falls each year.
- Among those age 65 and older, falls are the leading cause of injury or accidental death. They are also the most common cause of nonfatal injuries and hospital admissions for trauma.
- In 2008, over 19,700 older adults died from unintentional fall injuries.

What outcomes are linked to falls?

- 20% to 30% of people who fall suffer moderate to severe injuries such as lacerations, hip fractures, or head traumas. These injuries can make it hard to get around or live independently, and increase the risk of early death.
- Falls are the most common cause of traumatic brain injuries, or TBI. In 2000, TBI accounted for 46% of fatal falls among older adults.
- Most fractures among older adults are caused by falls. The most common are fractures of the spine, hip, forearm, leg, ankle, pelvis, upper arm and hand.
- Many people who fall, even if they are not injured, develop a fear of falling. This fear may cause them to limit their activities, leading to reduced mobility and loss of physical fitness, which in turn increases their actual risk of falling.

Who is at risk?

FATAL FALLS

- In 2008, 82% of fall deaths were among people 65 and older.
- Men are more likely to die from a fall. After adjusting for age, the fall fatality rate in 2007 was 46% higher for men than for women.

NONFATAL FALLS

- The chances of falling and of being seriously injured in a fall increase with age. In 2009, the rate of fall injuries for adults 85 and older was almost four times that for adults 65 to 74.
- People age 75 and older who fall are four to five times more likely than those age 65 to 74 to be admitted to a long-term care facility for a year or longer.
- Women are more likely than men to be injured in a fall. In 2009, women were 58% more likely than men to suffer a nonfatal fall injury.

How can older adults prevent falls?

Older adults can take several steps to protect their independence and reduce their chances of falling. They can:

- Exercise regularly. It's important that the exercises focus on increasing leg strength and improving balance. Tai Chi programs are especially good.
- Ask their doctor or pharmacist to review their medicines—both prescription and over-the counter—to reduce side effects and interactions that may cause dizziness or drowsiness.
- Have their eyes checked by an eye doctor at least once a year and update their eyeglasses to maximize their vision.
- Make their homes safer by reducing tripping hazards, adding grab bars and railings, and improving the lighting in their homes.

Additional ways to lower hip fracture risk include:

- Getting adequate calcium and vitamin D in the diet.
- Undertaking a program of weight-bearing exercise.
- Getting screened and treated for osteoporosis.

Making Your Bathroom Safer

To help provide security and stability, use the guide below to understand where bath safety products can be located in and around the bathroom.

A. Handheld Shower

G98035

Hand held showers should be used for anyone who bathes with a shower chair or transfer bench. The 86" (218 cm) long hose allows a person to remain seated while bathing.

B. Elevated Toilet Seat

G30270A

When bending is difficult, using the toilet can present a potential fall risk. Using a raised toilet seat will reduce the degree of required bending, thereby reducing fall risk.

C. Bathroom Grab Bars and Assist Bars

Install grab bars in your bathroom to offer support in areas where falls are most likely to occur. These areas include anywhere that might have a wet surface or anywhere people tend to bend frequently. A grab bar's primary use is to steady the user and may not support the weight of a falling individual.

G98006

Bathtub Assist Bar – Clamps directly onto the tub wall. The assist bar helps make entry and exit safer.

Wall-Mounted Grab Bars (not shown) – Mounts directly to your wall to provide an extra grip when standing or sitting in the tub.

D. Transfer Bench

MDS86952

When getting in and out of the tub becomes a difficult and potentially dangerous task, transfer benches are a careful alternative. The person bathing can sit down on the outside of the bathtub, swing their legs over the wall, and then easily slide across the seat while holding onto a hand rail mounted on the opposite side.

Bathroom Safety and Mobility Questions—Answered by Medline

Health conditions can create safety challenges in the bathroom and impair your mobility. These answers can point you towards products that improve bathroom safety and enhance your mobility.

How can I make it easier to get into and out of my bathtub?

A **transfer bench** straddles the side of the bathtub, allowing you to sit down outside the tub and then move over the surface of the bench into the bathtub. You may also want to consider installing grab bars on the walls of the shower/tub area.

How can I prevent falling when I am bathing or showering?

A **bath bench** can be placed inside your bathtub or shower. You can then safely sit on the bench while you wash your body. You may also want to consider installing grab bars on the walls and using a hand-held shower attachment to make showering easier.

How can I make it easier to get up from a toilet seat?

A **raised toilet seat** can easily be installed on top of your toilet seat. The advantage of a raised toilet seat is that it provides additional height, decreasing the distance you have to sit down or stand up.

How can I keep myself steady and prevent falling when I am standing in the shower?

Consider installing **grab bars** on the walls. Grab bars provide safety and support to help you maintain balance.

How can I keep the cast on my arm dry while I am bathing or showering?

A **cast protector** is a plastic sleeve that can be pulled over your hand and forearm, shielding your cast from the water.

How can I take care of toileting closer to my bed?

A **bedside commode** can be placed next to your bed, making it easy and accessible anytime. You can also use commode liners inside the commode bucket to make cleanup easier and sanitary.

What kind of walking aid would allow me to safely walk along outdoors, but sit down if I become tired?

A **rollator** has four wheels, handbrakes, and a padded seat on which you can sit. A rollator allows you to safely walk along, but sit on the padded seat if you become tired.

Should I use a standard wheelchair (large wheels in rear) or a transport chair (small wheels in rear)?

A **standard wheelchair** allows you to self-propel yourself without the aid of a caregiver. Although a **transport chair** requires a caregiver to push the chair, a transport chair is smaller and lighter than a standard wheelchair—making a transport chair easier to transport in an automobile. Some people choose to own both a standard wheelchair and a transport chair, so they have the best of both worlds.

What kind of walking aid would allow me to be pushed (transported) part of the time and walk along part of the time?

A **combination transport chair/rollator** is a convenient device which converts in seconds between the modes of transport chair and rollator. You can walk along and get exercise, sit and rest when you are tired, or be pushed along with the device in transport chair mode.

Bath Benches

- Bath benches help patients who have difficulty sitting in a standard bath tub or standing in the shower
- Benches with a back give extra support and comfort
- Stools without a back provide easy access and maneuverability when bathing
- Non-slip, rubber feet resist slipping on the bathtub or shower floor
- Legs are height-adjustable for a proper fit

G98027

Premium Padded Bath Bench

Extra thick padding on seat and backrest provides additional comfort for long term use. Bench features an extra deep seat 16.5" (42 cm), for greater stability and comfort when bathing.

MDS89755R

Standard Composite Plastic Bath Bench

Durable and rustproof all-plastic construction. Comes with an extra deep and wide seat for user comfort. Removable arms help aid patient balance, but can be removed for easier transfers.

G30402

Basic Bath Bench

Textured, blow-molded polyethylene seats have built-in hand holds to provide extra safety. Angled legs distribute weight over a large area to increase patient stability. Durable anodized aluminum frame is rust resistant.

MDS89745AXW

Premium Bariatric Bath Bench 550 lb Capacity

Dual cross brace with durable welds provide extra stability and support. Bench has a blow molded seat with high-strength, aluminum frame to prevent rusting.

MDS89745RA*

Standard Bath Bench with Arms

Ideal for patients that need extra support when getting on and off the bench. Padded hand-grip for comfort also reduces slipping.

MDS89745R

Basic Bath Bench

High Density, polyethylene seat and back with built-in hand grips. Angled legs distribute weight over a large area to increase patient security. Durable, anodized aluminum frame is rust resistant.

GUARDIAN® Bath Bench Accessories

- Additional items to go with your bath bench to make bathing easier

CUR200ALL

G98035

G01212

Cast Protectors

Ideal for keeping casts, bandages or wounds dry while showering. Specially designed opening stretches to fit over the cast and then returns to its original shape to fit snugly against the arm.

Elevated Toilet Seats

- Makes using the toilet easier for those with trouble bending
- Available in a variety of locking mechanisms and mounting methods

MDS80326

Extra Wide with Legs 600 lb (272 kg) Capacity

Steel legs go to the floor and soft foam armrests provide maximum support in getting on and off the toilet.

G30270A

Locking with Padded Arms

Padded arm rests assist in getting on and off toilet. Locking device secures seat to toilet and requires no tools.

MDS80320S

Locking with Molded Arms

Arms assist in getting on and off the seat. Locking device secures the seat to the toilet.

MDS80315

Universal Locking

Height-adjustable brackets allow seat to fit over any toilet. Brackets are vinyl covered to prevent chipping or scratching of porcelain. Seat is height-adjustable with plastic splash guard to make cleaning easy.

MDS80324S

Hinged Bolt-On

Seat can be lifted and lowered with hinged design. Existing seat and lid make this model less noticeable.

G30250

Basic Raised Seat

Simple design made of polypropylene resin is easy to clean. Non-slip pads and lip inside toilet offer additional stability.

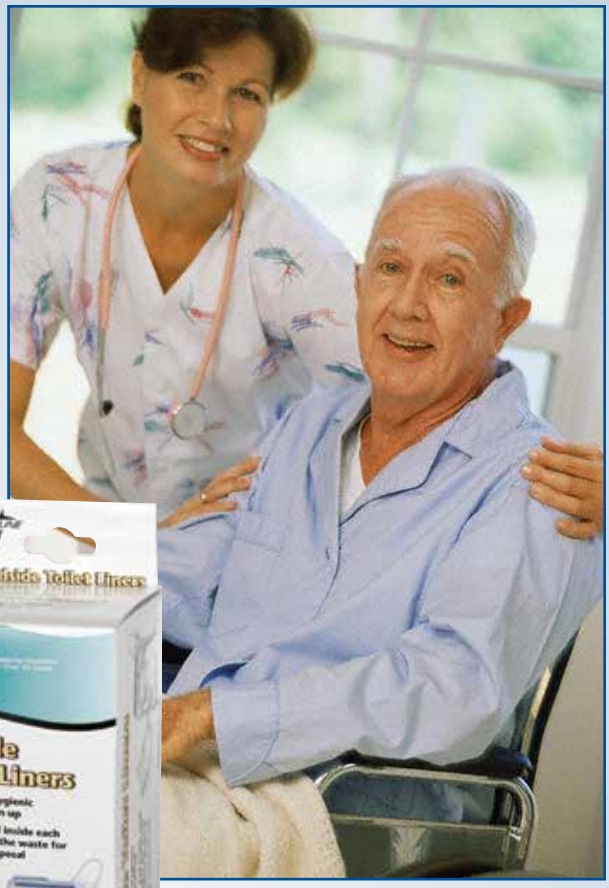
Never clean a commode bucket again—for less than the price of a Sunday newspaper.

Medline's disposable commode liners make commode cleanup easy and hygienic. Each liner includes an absorbent pad made from a polymer gelling agent that solidifies and neutralizes waste for convenient disposal. Because they are solidified, liquids will not move around in the commode, making transport easier. All you need to do is toss the liner in the garbage after use.

Disposable commode liners also eliminate contact between staff and human waste, to help reduce contamination. The average person will use two liners each day, at a suggest retail price of $1.50 each.

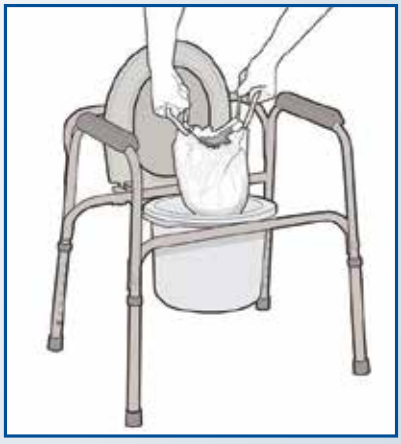


Item Number	Description	Pkg
Disposable Commode Liner		
MDS89664LINER	Commode Liner	12 liners/box, 6 boxes/cs

How to use Disposable Commode Liners

1. *Place the commode liner in the commode. Make sure that the liner is folded over the edge of the bucket.*

2. *As liquid hits the absorbent core, the polymer inside the core immediately begins converting the liquid into a solid. The core neutralizes odor as the liquid solidifies.*



3. *Simply toss the liner into the garbage after use.*

FREE Custom Laminated Labels

Stolen or lost wheelchairs are a frustrating problem for many institutions. Medline wants to help you solve that problem. For a limited time, when you order ten or more wheelchairs, we'll design custom, full-color, laminated labels you can put on the outside of the wheelchair's side panels. These attractive labels are great for discouraging theft and advertising your business or institution's name. All you have to do is give us your logo electronically and our graphic artists will do the rest! Your wheelchairs will look attractive and become a new marketing tool for your business or institution.

- Waterproof
- A theft deterrent
- Customized to your logo, fonts and colors
- Specify different departments and number your chairs
- Easily affixes to side panels on wheelchairs

Buy Factory Direct for Additional Savings!

Save up to 10% by using our "Factory Direct to You Program". Order now and receive:

- Free freight on all direct shipments
- Product delivered right to your door
- 90 days to pay after arrival of goods
- Finest quality embroidery or silkscreening of your logo available

Wheelchair Assessment Guide

A well maintained fleet of wheelchairs saves you money. It reduces down time, employees searching for wheelchairs when needed, and the added expense of purchasing replacements for broken chairs. By utilizing Medline's simple and easy to use chart, you can quickly and easily determine the current state of your wheelchair inventory, list out what parts you may need to repair current chairs, and replace models that have become worn out or dangerous to use. Contact your Medline Sales Representative to schedule your comprehensive wheelchair assessment and get those wheelchairs back on the floor and working properly.
*We also have a new excel version for iPad.

See wheelchair assessment guide in the back to evaluate your wheelchairs.

Your Medline wheelchair has a limited lifetime warranty on the frame and a one (1) year warranty on all other parts. Medline warrants that the frame will be free from defects in materials and workmanship for the life of the wheelchair. Medline warrants that all other parts of the wheelchair will be free from defects in materials and workmanship for a period of one (1) year from date of purchase by the original customer. This warranty applies only to the original purchaser of the wheelchair and is not transferable to any other entity or person. This warranty does not extend to, and Medline has no liability for, damage or failure occurring as a result of misuse, abuse, modification, loss or casualty, normal wear and tear or other causes unrelated to the manufacture and design of the product.

THIS IS THE SOLE AND EXCLUSIVE WARRANTY FOR THIS PRODUCT. THERE ARE NO OTHER WARRANTIES, EXPRESS OR IMPLIED AND ANY SUCH WARRANTIES ARE DISCLAIMED.

In the event of defect or failure covered by the warranties above, Medline will, at its option, repair or replace the wheelchair or part thereof. In the event of a defect or failure covered by this warranty, contact us at 1-800-MEDLINE. Medline is not responsible to the original purchaser, any user or any third party for any consequential or incidental damages arising from use or misuse of the wheelchair or any part thereof, under any circumstances.

THE MEDLINE DIFFERENCE

QUALITY ASSURANCE

Quality tig welding – provides greater frame strength, like a mountain bike.

Layers of durable, reinforced upholstery reduces sagging over time.

Double coating of chrome plating and powder coating gives maximum protection against rusting.

Non-marking tires help keep facility floors free of unsightly black marks.

Brass inserts – prevent stripping of upholstery screws.

MEDLINE GUARANTEE Lifetime warranty on frame. One year on all parts.

PREVENTING WHEELCHAIR THEFT

Wheelchair theft has been a problem for many institutions for years, but with the increased unemployment and higher costs of living, preventing theft has become imperative.

Wheelchairs are stolen for a variety of reasons. The person checking out of the hospital who is recently disabled but unable to afford the equipment he or she needs to function from day to day is often the culprit. Occassionally a patient may have recently broken his or her equipment and is unable to replace the chair. There have even been cases of a patient arriving in a broken and abused chair and swapping it out for a newer chair. Sometimes the chairs are found miles away at a subway station, shopping center, in parking garages, or even on the street near parking spaces.

Unfortunately, many hospital directors have to budget for the loss of equipment each year and it has become an expected loss. Missing chairs account for a large amount of lost dollars to an institution because the chairs are not available when and where they are needed. Often, the institution orders replacement chairs that may not have been needed. Here are some ways to guard against wheelchair loss and theft.

1. **Choose a model that fewer people want to steal.** The type of chair that is purchased may have a huge effect on how many of the wheelchairs are stolen. If a wheelchair can be user-propelled then it greatly increases the usefulness of the wheelchair to the patient. By using a transport chair that is less desirable to the patient, an institution can greatly reduce the number of stolen chairs.
2. **Label the chairs to identify your institution and the department to which the chairs belong.** Adding custom logos, embroidery, stenciling, or ordering chairs in different colors may help. These differences can make it easier for security or parking lot attendants to spot a chair when it is moved outside of its normal usage area.
3. **Attach anti-fold devices below the seat or overhead to discourage theft.** Preventing the patient from being able to put a wheelchair in his or her vehicle has also proven to be an effective deterrent for theft. Anti-theft and anti-fold bars are common solutions to this problem. Preventing a wheelchair from being folded causes it to be exceedingly difficult when attempting to stow the wheelchair into a vehicle. Overhead anti-theft devices can help to make the chair too tall or long to be stored in a vehicle. Adding a flag or a fixed height IV pole can also decrease the convenience of folding and storing the wheelchair.
4. **Setting up designated storage areas, numbering chairs, labeling chairs to specific wings or departments, or even the use of tracking devices** can bring the incident rate of lost chairs down. Some locations go so far as to offer a day of amnesty for a patient to return, without repercussions, the wheelchairs that he or she may have "accidentally" acquired.
5. **Lock the leg rests on the chair.** Missing parts is also a large problem in many locations, but this is easily preventable. By installing Tinnerman nuts on the chair, the leg rests become permanently attached to the chair. These caps come with a wrench that is used to tighten a set screw into the pins that keep the leg rests on the wheelchairs. They install in less than two minutes, but can save hours of wasted time searching for leg riggings that fit your chair.

A Transport or Companion Chair may greatly decrease theft

Numbering or labeling chairs to specific wings or departments can decrease theft and help to keep chairs in their designated area.

Flip it to convert it!

In just seconds, our Excel Translator easily converts from a rollator to a transport chair and vice-versa. The Excel Translator allows users to sit down and ride in a transport chair when their legs get tired. And, transport chair users can stand up and walk along when they want to get more exercise. Best of all, you only need to own one piece of equipment, rather than two!

Advanced | Pressure Redistribution Cushions

Air Cell Cushions

Offer superb pressure relief. These therapeutic cushions provide ultimate care to fragile tissue. Individual cells adjust to each patient's body contours, flexing in multiple directions and decreasing body weight per unit area of the cushion. Made of flame-retardant, latex-free neoprene rubber, it comes with a washable all-way stretch cover and hand pump for inflation. Two heights available.

Bariatric | Pressure Redistribution Cushions

MDTSP72420

Support Pro 7 Series

Two layers of high resiliency foam increases comfort and decreases the risk for pressure ulcers. The non contour seating surface allows for easy patient transfers. The waterfall front eliminates pressure points behind the knee. The coccyx cut out unloads pressure off of bony prominences. A strap is attached to help secure the cushion to the wheelchair. 750 lb (340 kg) weight capacity.

SideMinder

As a fully adjustable lateral support, the SideMinder is recommended for users with moderate to severe impairment in their ability to maintain proper posture. This support is available with either standard or contoured lateral pads that adjust horizontally or vertically. For even the most difficult to correct postural asymmetries, the SideMinder is fully functional support.

MDTSDMDR	16-24 (41-61)

Medline Back Cushion

The Medline Back Cushion is a comfortable support cushion that fits in front of a standard wheelchair back, eliminating the hammock effect of a sling back. Two layers of high density foam provide support for the entire back. The ShearX all-way stretch cover reduces skin shear and is fluid-proof. Straps onto the wheelchair and is easy to remove.

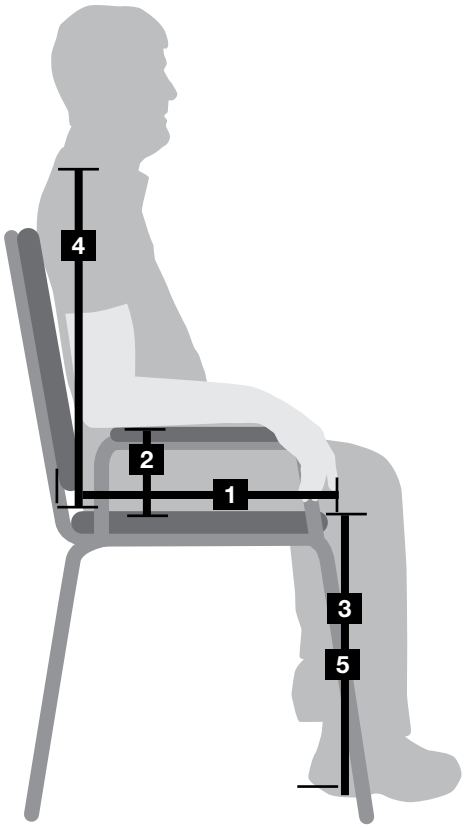
How To Determine Which Wheelchair Is The Best Fit

Achieving a proper fit for a user in his or her new wheelchair can be extremely critical to the patient's health and wellness. It can make the difference between either promoting recovery or causing further injury. Some of the issues that an improper fit can cause for the user of the wheelchair are:

- Posture issues
- Breathing problems
- Sores
- Discomfort
- Pelvic issues
- Hip problems

Measure for a perfect fit



1 Determine Seat Size

- Seat width should be determined by measuring from hip to hip in a straight line. Add two inches to this measurement.
- Seat depth should be determined by measuring from the back of the hip to the back of the knee of the user while seated. Subtract one inch from this measurement.

2 Determine Arm Type and Height

- If the user is going to be standing up to do pivot transfers, they will require a full-length arm on the chair to help support them as they push off to stand.
- Desk-length arms are suggested for ease of use with tables and desks.
- Determine the height of the wheelchair arm by measuring from the elbow to the seat of the chair while the user is holding their arms up with their elbows bent at a ninety degree angle. Height adjustable arms are suggested when possible.

3 Determine Footrest Style

- Elevating leg rests are always suggested when patients are required to raise their legs for conditions such as edema, swelling or injury.
- Determine the length of the footrest by measuring from the back of the knee to the heel of the foot.
- In taller patients, consider using articulating leg rests. These leg rests extend longer as the elevating portion of the leg rest rises.

4 Determine Back Height

- Determine the measurement from the patient's scapula or collarbone down to the seat while the user is sitting in a chair.
- Taller back heights may be required for patients that require upper trunk support or other support devices that may be installed for the user.

5 Determine Floor to Seat Height

- Determine if the user will need to use his or her feet to propel or move. Measure the distance between the back of the knee to the heel to determine the seat to floor height.

6 Determine Wheelchair Weight and Weight Limit

- Determine the patient's weight in order to choose what weight capacity wheelchair will be required.
- Determine the level of upper body strength in the user. Weaker patients will require lighter wheelchairs.

High-Quality Beds

Medline beds meet or exceed very stringent dynamic and static load requirements. Each bed is inspected and fully system tested at maximum weight capacity.

Overall Cost Effectiveness

As National Competitive Bidding (NCB) moves forward, reimbursements are being slashed by up to 30 percent.[1] To offset these reductions, it's more important than ever to find new ways to cut costs:

- Reduced overall cost of ownership – Because Medline beds stand the test of time, we offer some of the longest warranties in the industry.
- Reduced risks – Medline has beds and motors that are very light, reducing the risk of back injuries or property damage during storage, setup and transport.
- Economical beds for rentals that you expect to cap out – Our Basic beds offer a lower price-point to help reduce your up-front costs, and they still come with a generous five-year warranty.
- Increased efficiency – The electronics on Medline's MedLite beds are washable, so cleaning doesn't require removal of the motor. And with our wide selection, you can get everything you need, without having to shop around.

Reliable Service

Medline has a large staff of friendly and knowledgeable home care bed specialists, sales representatives and customer service agents who are waiting to provide you with world-class support.

Standard on all Medline beds, the heavy-duty remote control resists breakage and moisture

MedLite Beds

High-Quality

- Premium Linak® motors provide smooth reliable operation for years
- Recessed headspring supports and foot assembly reduce the chance of pinching and injuries

Light

- We have some of the industry's lightest beds, making transport, setup and storage much easier
- Our MedLite semi-electric bed weighs only 137 lbs (62 kgs)
- The 24V DC motors are also lightweight – and quiet

Strong

- An extra steel plate is welded to the middle of the frame ensuring strong and stable support
- Painted frames have three coats of enamel plus a clear coat for a strong, chip and scratch-resistant finish
- Durable plastic woodgrain end panels resist breakage
- Heavy-duty remotes resist breakage and moisture

Easy-To-Use

- The beds can be cleaned without having to remove the motor, and the electronics can be washed down with standard water pressure
- End panels are easy to wipe down and keep clean
- Smooth rolling, casters make the bed easy to move
- Convertible to a low bed using MedLite Low Bed Conversion Kit Sold separately (see p. 109)

Light beds with a great warranty! MedLite beds help reduce the risk of back injuries or property damage because they are among the lightest home care beds in the industry.

Height range	18"-26.5" (46 cm-67 cm)
Casters	Four (2 locking)
Warranty	2 years for electrical and mechanical components; lifetime for the bed frame

Item Number	Description
MDR107004	Bariatric Full-Electric Bed

Strong

- Comfortably accommodates larger patients with a 600 lb. (272 kg) weight capacity and an extra-wide deck: 42" (107 cm) x 80" (203 cm)
- Reinforced pan deck creates a strong bedding surface

MEDLINE WARRANTY 2 YEARS

Easy

- Split-frame design sets up with minimal tools and simplifies delivery
- Smooth rolling casters allow easy positioning of bed

Reliable

- Strong AC motors provide reliable lifting for years
- Durable remote features easy-to-access buttons

Premium Extra Weight Capacity Full-Electric Bariatric Bed

Ultra-strong beds with a full 1,000 lb. (454 kg) weight capacity

BHAKP48801
Mattress included.
Bed rails sold separately

tem Number	Description
BHAKP48801	Three Quarter, 48"W (122 cm), Extra Weight Capacity Full Electric Bariatric Bed
BHAKP54801	Full, 54"W (137 cm), Extra Weight Capacity Full Electric Bariatric Bed
BHAKP60801	Queen, 60"W (152 cm), Extra Weight Capacity Full Electric Bariatric Bed
BHAKP384801	Adjustable Width, 38" x 80" (97 x 203 cm) converts to 48" x 80" (122 x 203 cm) Extra Weight Capacity Full Electric Bariatric Bed
BHATRKP1000	Trapeze for Extra Weight Capacity Full Electric Bariatric Bed
BHARA01920	Bed Rails
BHARA01920EX	Bed Rails for Low-Air Loss Mattress
BHASC1000	Scale for Extra Weight Capacity Full Electric Bariatric Bed

Features

- Linak motors allow for dynamic movement without disturbing a partner or surrounding residents
- Includes mattress
- Foot section does not pitch down, but plateaus to help reduce edema of lower extremities
- Multiple positions (Trendelenberg, Reverse Trendelenberg and Cardio Chair)
- Independent head and knee gatch for personalized positioning

Specifications

Weight capacity	1,000 lbs. (454 kg)
Height range	15.25"-24.5" (39-62 cm)
Casters	Four locking casters
Warranty	1 year for electrical and mechanical components; 5 years for the bed frame

Premium Full-Electric Bariatric Beds

Two available widths in one easy-to-operate bed. Slide feature adjusts the bed width from 38"-48" (97-122 cm), allowing the bed to be used as a gurney for easy transfer through doorways.

BHAQP3848
Mattress included.
Bed rails sold separately.

Features

- Linak motors allow for dynamic movement without disturbing a partner or surrounding residents
- Foot section does not pitch down, but plateaus to help reduce edema of lower extremities
- Includes mattress
- Three DC motors for the head section, foot section and overall height
- Optional bed-mounted trapeze, 6" (15 cm) extended length to 86" (218 cm), heavy-duty side rails and digital scale

Specifications

Weight capacity	750 lbs. (340 kg)
Height range	15"-28" (38-71 cm)
Casters	Four locking casters
Warranty	1 year for electrical and mechanical components; 5 years for the bed frame

Item Number	Description
BHAQP3880	38"W (97 cm) Full-Electric Bariatric Bed
BHAQP4880	48"W (122 cm) Full-Electric Bariatric Bed
BHAQP5480	54"W (137 cm) Full-Electric Bariatric Bed
BHAQP6080	60"W (152 cm) Full-Electric Bariatric Bed
BHAQP3848	Adjustable-Width Bariatric Bed
BHARA01920	Bed Rails
BHARA01920EX	Bed Rails for Low-Air Loss Mattress
BHATRQP48	Trapeze for Full-Electric Bariatric Beds

Premium Low-Height Full-Electric Bariatric Beds

Low height helps minimize the possibility of injuries for patients who pose a risk of falling out of the bed.

BHALB3848
Mattress included.
Bed rails sold separately

Features

- Linak motors allow for dynamic movement without disturbing a partner or surrounding residents
- Foot section does not pitch down, but plateaus to reduce edema of lower extremities
- Includes mattress
- Three DC motors for the head section, foot section and overall height
- Optional bed-mounted trapeze, 6" (15 cm) extended length to 86" (218 cm), heavy-duty side rails and digital scale

Specifications

Weight capacity	750 lbs. (340 kg)
Casters	Four locking casters
Height range	9"-24" (23-61 cm)
Warranty	1 year for electrical and mechanical components; 5 years for the bed frame

Item Number	Description
BHALB3848	Low-Height, Full-Electric Bariatric Bed, Adjustable Width, 38"-48" x 80" (97-122 cm x 203 cm)
BHARA01920	Bed Rails
BHARA01920EX	Bed Rails for Low-Air Loss Mattress
BHATRQP48	Trapeze for Full-Electric Bariatric Beds
BHASC1000	Scale for Low-Height Full-Electric Bariatric Bed

MedLite and Basic Bed Accessories

Low Bed Conversion Kit

Convert your Full-Electric MedLite bed into a MedLite Low bed!

- Easy installation – no tools needed!

Item Number	Description
MDSLOWBED	MedLite Low Bed Conversion Kit
MDSLOWBASIC	Basic Low Bed Conversion Kit

4" (10 cm) Bed Extension Kit

Increases bed length from 80" to 84" (203 to 213 cm)

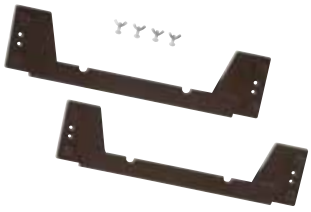
- Easy assembly – no tools needed!
- Retains 450 lb (204 kg) capacity

Item Number	Description
MDR630EXTN	4" (10 cm) for MedLite Bed
MDRBEDEXT	4" (10 cm) for Basic Bed

Transport Cart

Makes beds easy to transport and facilitates efficient storage

Item Number	Description
MDSBEDCART	Transport Cart



Mattresses

Durable 8-oz. vinyl mattresses feature antimicrobial ticking

- Inverted side seams for patient comfort and caretaker convenience
- Your choice of innersprings, standard foam or high performance fiber

Innerspring

Item Number	L x W x H: Inch (cm)	Weight Capacity
MDR237827	80 x 36 x 7 (203 x 91 x 18)	250 lbs. (113 kg)

Item Number	L x W x H: Inch (cm)	Weight Capacity
MDR230981E	80 x 36 x 6 (203 x 91 x 15)	350 lbs. (159 kg)

High Performance Fiber

Item Number	L x W x H: Inch (cm)	Weight Capacity
MDR237827E	80 x 36 x 6 (203 x 91 x 15)	250 lbs. (113 kg)

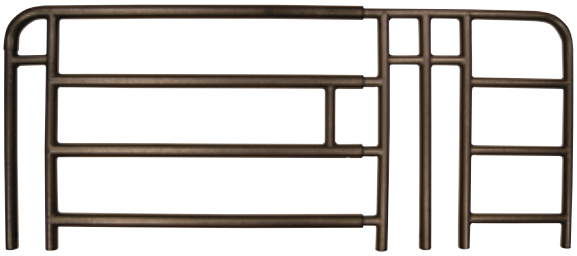
Side Rails

Safety and security allows rest, without worry

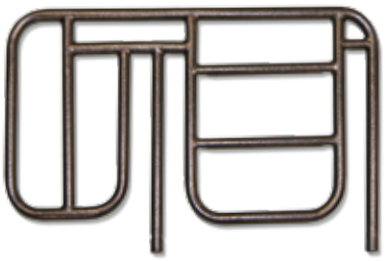
Standard Side Rails

Tool-free installation!

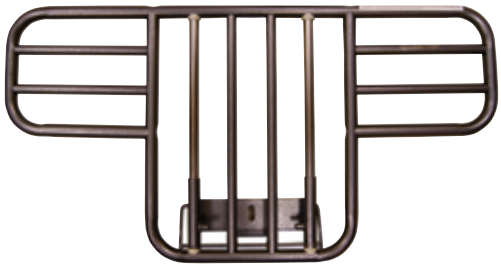
- Attractive hammertone finish hides fingerprints and complements home décor
- Spacing between bars is less than 4" (10 cm) for patient safety
- MDS89694N adjusts in length from 48" to 72" (122 to 183 cm)
- All rails meet FDA Entrapment Guidelines
- New dual-purpose rails (MDS89698N) can be used as guard and assist rails



Item Number	Description
MDS89694N	Full Side Rail, 4 Bar Telescoping



Item Number	Description
MDS89698N	Half Rail, Double Bars

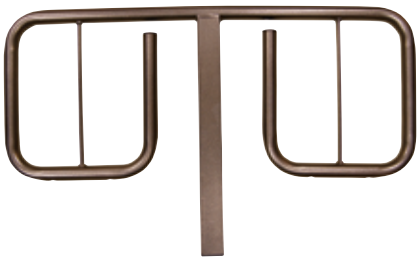


Item Number	Description
MDS89697	Half Rail, Small Gap Clamp-on

Bariatric Side Rails

Easy installation with minimal tools.

- Pull knob to adjust height of the rail
- Rail mounts to the pan deck under the mattress for a safe and solid mount
- Rail is easily and quickly removable with a pull of the button



Item Number	Description
MDS89697BAR	Half Rail, Bolt-On

Hammertone Finish on all Side Rails

Trapeze Bars

Giving a hand in changing or transferring positions

- Frames are constructed with heavy-gauge steel for maximum strength and support

Standard Trapeze Bar

Wall bumpers and padded mounting brackets protect bed ends and wall surfaces.

- Assembles without tools
- Optional base allows trapeze to be free standing
- Assisted weight capacity: 250 lbs. (113 kg)

Item Number	Description
MDS80615T	Trapeze Bar
MDS80616T	Trapeze Base (Optional)

Mounts to bed or optional base.

Lightweight, Bariatric Trapeze Bar

Lightweight and easy-to-assemble for transport

- Assisted weight capacity of 500 lbs. (227 kg)
- Assisted weight capacity: 55 lbs. (25 kg)

Item Number	Description
MDS500TPZ	Bariatric Trapeze Bar

Bariatric Trapeze Bar

Four-piece sub-assembly significantly reduces set-up time

- Tool-free design simplifies assembly
- Assisted weight capacity: 1,000 lbs. (454 kg)

Item Number	Description
MDS1000TPZ	Bariatric Trapeze Bar

Overbed Tables

Ideal for reading, eating and writing

- Holds up to 50 lbs. (23 kg)

Composite-Top

Unlike wood tables, this durable table will not crack or peel. It's easy to keep clean and impervious to moisture.

- 28" x 15" (71 x 38 cm) molded composite top
- One-hand adjustable from 30" to 47" (76 to 119 cm)

Item Number	Description
MDS107015	Composite-Top

Laminate Top

Automatic spring lift mechanism adjusts height from 28" to 45" (71 to 114 cm).

- 30" x 15" (76 x 38 cm) top with walnut wood grain melamine laminate with a "T" mold edge

Item Number	Description
MDS104015	Walnut Laminate

Raised edge holds books and papers in place.

Laminate Tilt-Top

Separate tilt and raise/lower handles for safe and independent operation of table functions.

- 30" x 15" (76 x 38 cm) top with walnut wood grain melamine laminate with a "T" mold edge
- Three-position tilt with squeeze of the handle
- Height adj. from 28" to 45" (71 to 114 cm)

Item Number	Description
MDS104950	Walnut Laminate Tilt-Top

Growing Number of Injuries Among Delivery Drivers
US Department of Labor Statistics on Occupational Injuries

Increase of 24 percent for light or delivery service truck drivers!

The number of reported nonfatal occupational injury and illness cases that require days away from work to recuperate decreased by 9 percent in 2009 for private industry, state government and local government, according to the Bureau of Labor Statistics. The total incidence rate decreased 5 percent to 117 cases per 10,000 full-time workers. Some of the overall decrease in case counts may be attributed to economic factors, including a decrease in employment and total hours worked, particularly in construction and manufacturing.

CASE CHARACTERISTICS

Overexertion accounted for 22 percent of all occupational injuries and illnesses. Among the seven occupations with high case counts and incidence rates, it was the leading event or exposure for nursing aides, orderlies and attendants; janitors and cleaners; and all truck drivers (except driver/sales workers).

Table A
Percent of Total Musculoskeletal Disorders by Selected Body Part

Occupation	Total	Shoulder	Back	Abdomen	Arm	Wrist	Leg	Multiple Body Parts
Truck drivers, light or delivery services	100	12.6	47.6	5.2	3.7	1.4	14.3	4.7

KEY FINDINGS:

Despite the total decrease in the incidence rate, the following occupations in the private sector had increases in their rates:

- Light or delivery service truck drivers **(increased 24 percent)**
- Restaurant cooks (increased 20 percent)
- Landscapers and grounds-keepers (increased 10 percent)
- Registered nurses (increased 5 percent)

Table B
Nonfatal Occupational Injuries and Illnesses Involving Days Away from Work (Private Industry)

Occupation	Number	Median Days Away From Work
Truck drivers, light or delivery services	31,600	14

The study also showed that with truck drivers, light or delivery services, there was a median of 14 days away from work as a result of these injuries. With statistics like these, HME dealers can't afford to take delivery drivers' backs for granted.

Adapted from Nonfatal Occupational Injuries and Illnesses Requiring Days Away From Work. Available at http://www.bls.gov/news.release/archives/osh2_11092010.pdf. Accessed September 30, 2011.

DID YOU KNOW

Medline's MedLite beds are up to 40 lbs. lighter than most other home care bed available today, helping you reduce the risk of injuries to your delivery drivers.

Falls Management and Safe Patient Handling: Growing Concerns

Each year one-third of adults 65 and older experiences a fall.[1] Among those who fall, 20 to 30 percent suffer moderate to severe injuries that make it hardc for them to get around or live independently, and increase their risk of early death.1 Recent compliance regulations, as outlined by the Joint Commission's Patient Safety Goals and the Centers for Medicare and Medicaid Services (CMS) guidelines, have created increased urgency for the prevention of patient and resident falls.[2,3]

Falls and safe patient handling go hand in hand. Patients who are not handled properly are more likely to fall. Also, improving the safety of patient handling has come to the forefront as greater numbers of healthcare workers sustain injuries on the job. In 2009 more than 46,000 registered nurses, licensed practical nurses, nurse's aides and other healthcare workers reported injuries related to work-related musculoskeletal disorders. More than one-third of back injuries among nurses have been associated with the handling of patients.[4]

What is the solution? The potential for patient and staff injury as a consequence of manual handling is reduced when caregivers implement a safe patient handling program that incorporates the use of mechanical devices specially designed to move patients safely.[5] These devices provide a more secure process for lifting, transferring and repositioning and also help prevent patient falls. Caregivers also comment that use of this technology lessens patient anxiety and enhances patient dignity and autonomy. Research shows that use of patient handling equipment reduces staff injuries and lost work time as well.[6]

Education and Product Interventions

Medline can help healthcare facilities improve falls management and enhance safe patient handling by providing a number of useful products to be used in conjunction with a comprehensive falls management program. We hope you will find this guide helpful in learning more about falls and safe patient handling and helping your facility select appropriate products. We also welcome you to consider participating in Medline's Falls Management Program and Safe 'N Easy Lifting Program.

Bath Lift

Designed to assist you or a family member to bathe safely and comfortably.

Features

- Simple up/down buttons raise and lower you into the water
- Easy-to-clean with just soap or mild detergent
- The unit comes apart in 3 sections making it easy to store or transport
- Comfortable soft foam seat and contoured backrest
- Secure installation – side panels are supported by tub walls and suction cups hold lift securely in place to bottom of tub
- Quick rechargeable control

Specifications

Weight capacity	300 lb (136 kg)
Latex Free	Yes

Item Number	Description
MDS300BL	300 lb (136 kg) Bathtub Lift

Stand Assists

Stand assists are used for lifting residents who are partially dependent, have some weight-bearing capacity, are cooperative, can sit up on the edge of the bed with or without assistance, and are able to bend hips, knees, and ankles. Transfers include moving to and from beds, chairs, bathing, and toileting.

Manual Stand Assist

Features

- STA204 features industry-leading 450 lb (204 kg) weight capacity and spreadable base
- Appropriate for partial weight-bearing patients with some upper body strength
- Perfect for functional rehabilitation therapy
- Affordable alternative to battery-powered stand assists
- Patient grasps an assist bar and pulls up using their upper body strength

Item Number	Description	Seat Width
STA182	400 lb (181 kg)	20" (51 cm)
STA204	450 lb (204 kg)	20" (51 cm)

STA182

Battery-Powered Stand Assist

Features

- NEW removable battery pack for convenient off-board charging
- Appropriate for partial weight-bearing patients
- Removable foot platform for gait training
- Battery-powered stand assists available in 3 weight capacities
- Controls are easy-to-operate

Specifications

Cradle type	6 point
Battery voltage	24V battery, 80-100 lifts/charge
Warranty	3 years for mechanical/electrical components; 1 year for battery

Item Number	Description
MDS400SA	400 lb (181 kg) Stand Assist
MDS500SA*	500 lb (227 kg) Stand Assist
MDS600SA	600 lb (272 kg) Stand Assist

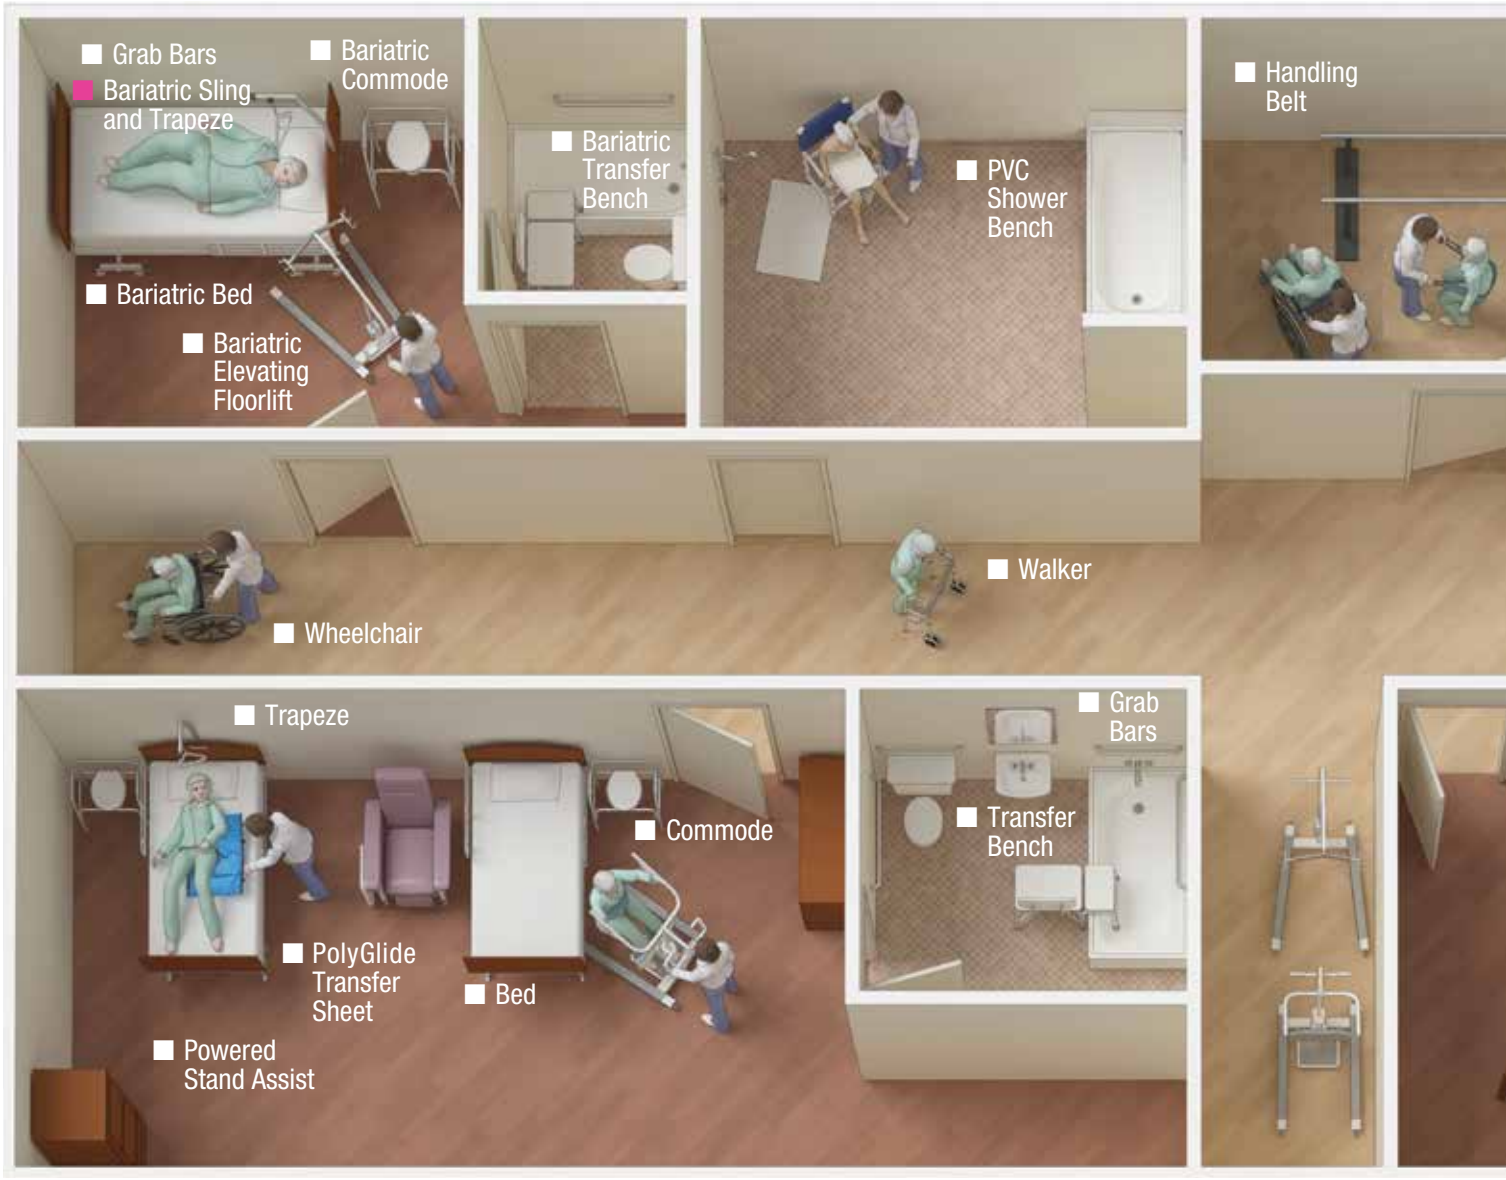
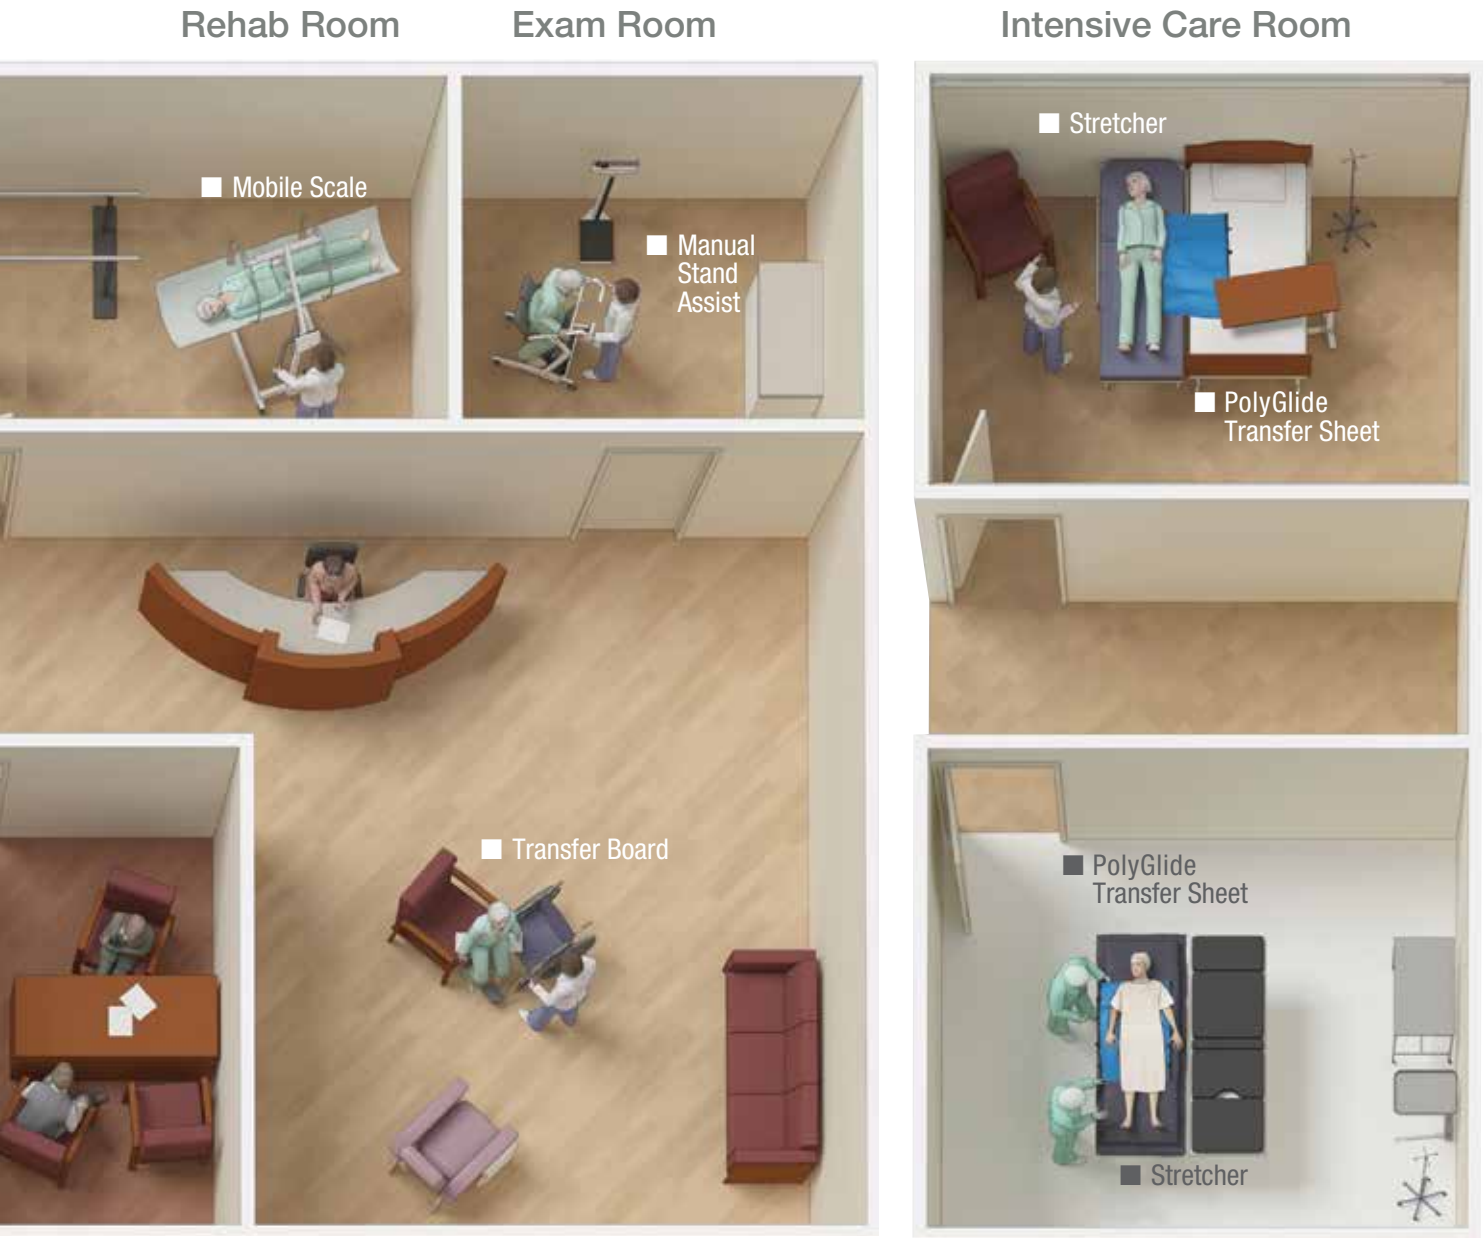
* Many customers purchase MDS600EL since it lifts 6" (15.2 cm) higher than the MDS400EL and has 10" (25.4 cm) more room between the patient and actuator. MDS400EL is recommended only if you have very limited space in your facility.

Medline Has the Right Patient Handling Equipment For Your Entire Facility





Invest in Reducing Caregiver Injuries.

"Cost-benefit analyses demonstrate that the initial investment in lifting equipment and employee training can be recovered in two to three years through reductions in workers' compensation expenses."

"Research has shown that safe resident lifting programs reduce resident-handling workers' compensation injury rates by 61%, lost workday injury rates by 66%, restricted workdays by 38%, and the number of workers suffering from repeat injuries."

Collins JW, Wolf L, Bell J, Evanoff B [2004]. An Evaluation of a "Best Practices". Musculoskeletal Injury Prevention Program in Nursing Homes. Injury Prevention 10:206-211.

Full Body Slings

Designed with comfort and safety in mind, these slings feature a unique, fully padded fabric that forms a soft yet supportive surface. The full-body slings have a 4-point hookup. Full body slings have the primary advantage of fewer loops to connect to the cradle, as well as versatility to be used with either 4-point or 6-point lift cradles.

Washable for 4-Point or 6-Point Cradles

Padded Toileting Slings

Specifically designed for toileting and hygiene functions, the large opening around the seat of the sling facilitates dressing and undressing for toileting. These slings also feature a unique, fully padded fabric that forms a soft yet supportive surface. The stretch-resistant material means the slings will hold their shape for extended support and easy positioning. Patient must have head and neck control to use this sling. This sling can be used in combination with Medline's stand assist or elevating floor lift.

Single Patient Stand Assist Slings

Item Number	Description
MDSMDSA662	Medium, 400 lb (181 kg) Torso 29"-48" (74-122 cm)
MDSDSA663	Large, 400 lb (181 kg) Torso 36"-60" (91-152 cm)

Sling Specifications Determination Chart

	Small	Medium	Large	Bariatric
1. Measure circumference in inches around the shoulders (A)				
U-Shaped Universal Slings	*28"-45" (71-114 cm)*	*37"-57" (94-145 cm)*	*47"-67" (119-170 cm)*	*57"-80" (145-203 cm)*
2. Measure circumference in inches around the chest (B)				
Toileting Slings	*26"-42" (66-107 cm)*	*30"-48" (76-122 cm)*	*38"-60" (97-152 cm)*	*58"-73" (147-185 cm)*
Stand Assist Slings	*28"-42" (71-107 cm)*	*30"-48" (76-122 cm)*	*36"-60" (91-152 cm)*	*50"-79" (127-201 cm)*
3. Weigh the patient				
Full-Body Slings	*N/A (45-82 kg)*	*100-180 lb (73-127 kg)*	*160-280 lb (91-272 kg)*	*200-600 lb*
3. Determine sling size: Small, Medium, Large or Baritric				

ABOVE DIMENSIONS ARE GUIDELINES AND MAY VARY BY USER

Evaluating Your Patient Handling Program

If you answer "NO" to any of the questions below, there are opportunities for improvement.

YES NO

1. **Are we designing tasks to limit the amount of weight nurses lift?** *(35 pounds is the maximum weight a nurse should be expected to lift.)*[3]
2. **Are we avoiding manual handling of patients as much as possible?** *(Skin tears and falls can sometimes be traced back to manual handling.)*
3. **Are we avoiding light duty as much as possible by preventing injuries?** *(Morale problems sometimes stem from light duty assignments among nurses.)*
4. **Are we decreasing our workers compensation claims by enforcing safe patient lifting?** *(Back injuries can cost as much as $50,000 in some cases.)*[2]
5. **Are we successfully retaining our best nurses?** *(12% of nurses exit the profession due to chronic back pain.)*[1]
6. **Do we have an effective and consistent means of determining if and how a patient should be handled by a mechanical lift?** *(A proper assessment should consider a patient's complete medical history, current physical condition and cognitive state.)*
7. **Are we properly training our nurses and do they comply with our lifting policy?** *(Lifting policies are sometimes ignored, with nurses choosing to manually handle patients.)*
8. **Do we have enough patient lifts?** *(You should have at least 1 lift for every 8 patients who require it.)*[4]
9. **Are we effectively employing stand assists?** *(Stand assists should be used for most patients who are partial weight-bearing.)*
10. **Are our lifting equipment and slings always in safe and working order?** *(Frequent equipment breakdowns and frayed or missing slings are two reasons why nurses get in the habit of manually handling rather than using lifts.)*

Studies show that approximately 52% of all nurses experience significant back pain each year, and 12% of nurses leave the profession because of chronic back pain.[1] Financially, a single back injury can cost an institution more than $50,000 in workers compensation claims, lost time, light duty, and turnover.[2] Despite these statistics, many healthcare institutions have been slow to implement the proper lifting programs and equipment to reduce further injuries and help ensure safety for both workers and patients.

Rifton® Equipment Rehab SoloLift and SoloVest

Lifts to support your facility's rehabilition department.

SoloLift

- Supports all patients, up to 350 lbs., even those with no weight-bearing ability.
- Enables a single caregiver to transfer a patient to and from a wheelchair, chair, toilet, gait trainer, bed, or the floor.
- Creates many new opportunities for easier and more dignified transfers by lifting patients in a natural sit-to-stand arc, from above the waist, using the specialized SoloVest.

Specifications

Overall Length	48" (122 cm)
Overall Width	31" (79 cm) min – 52" (132 cm) max
Overall Height	39" (99 cm) min – 72.5" (185 cm) max
SoloLift Weight	140 lbs (64 kgs)
SoloVest Weight	5 lbs (2.3 kgs)

Item Number	Description
MDSR711	Frame, SoloLift, R711
MDSR712	Frame, SoloLift, with Scale, R712
MDSR706	Cord, Power Supply, R706

MDSR703

MDSR701

MDSR702

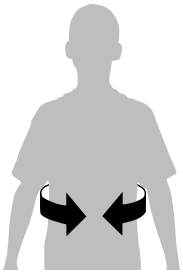
SoloVest

- With no straps below the waist, preparing the patient for transfer is easier, and clothing remains accessible for toileting.
- Foam padding helps ensure comfort and skin protection around the patient's arms and upper torso.
- Tightens with just two straps secured by automotive-grade snap-in buckles.

Item Number	Description
MDSR703	SoloVest, 350 lb (159 kg), Small (Green) Girth: 22"-34" (56-86 cm), R703
MDSR701	SoloVest, 350 lb (159 kg), Medium (Lt. Blue) Girth: 28"-40" (71-102 cm), R701
MDSR702	SoloVest, 350 lb (159 kg) , Large (Dark Blue) Girth: 36"-60" (91-152 cm), R702

Ordering Your SoloLift and SoloVest:

1. Determine which size SoloVest is appropriate by measuring girth.
2. Select the frame model (with or without scale), which includes two leg straps, two batteries, and a battery charger.
3. Order power supply cord.



Caregiver must consider patient's girth when selecting appropriate SoloVest.

Important:

User's weight and height must not exceed maximum 350 lbs / 76" (159 kg/193 cm).

Gait Pacer

- Prompts mount anywhere; no tools required
- Simple two-handed height adjusts in 1" increments
- Innovative casters with separate swivel lock, brake, variable drag and one-way ratchet control
- Fits easily in car trunks and through 32" door frames
- Easy rear access for transfers from SoloLift
- Patients can face either way (posterior or anterior)

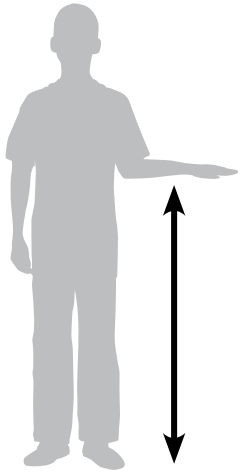
Rifton Tram

To see the Rifton Tram or more Rifton equipment please contact your Medline sales representative.



How to order:

1. Determine the size needed based on the patient's size by measuring the vertical distance from the bent elbow to the floor while the user is standing upright. Choose the gait trainer that allows for growth.
2. Select frame and color.
3. Choose the accessories you need based on frame size selected.

Important:

Make sure the chest prompt width is adequate, allowing for growth. User's weight must not exceed the maximum working load. Small and medium prompts are recommended for most users of the medium Pacer.

Gait Belts

Gait belts are designed to make it easier for caregivers to assist patients with less risk of back injury.

Wipe-able Polypro Gait Belts

Features

- Sturdy quick-release or metal buckles make it easy for caregivers to assist patients during transfers
- Polypropylene material means gait belts can be wiped down between uses
- Available in regular: 60" (154 cm) and bariatric: 72" (183 cm) sizing

Item Number	Length: Inch (cm)	Description	Color	Pkg
MDT821206BLU	60 (154)	Plastic Quick-Release Buckle	Blue	1/cs
MDT821206RAIN	60 (154)	Plastic Quick-Release Buckle	Rainbow	1/cs
MDT821207BLU	60 (154)	Metal Buckle	Blue	1/cs
MDT821207BLUL	72 (183)	Metal Buckle	Blue	1/cs

Washable Cotton Gait Belts

Features

- Washable cotton material means these belts are reusable
- Available in petite: 54" (137 cm), regular: 60" (154 cm), and bariatric: 72" (183 cm) sizing
- Variety of colors, including falls management yellow, to fit your facility's needs

Item Number	Length: Inch (cm)	Description	Color	Pkg

Body Holder

Features

- Designed for use in bed or wheelchair, this cotton restraint may be positioned on chest and/or legs to control bucking and kicking
- Slot may be positioned in front or rear to allow patient limited freedom to roll on the MDT828122C
- Straps tie to bed or wheelchair tilt bars

Item Number	Description	Pkg
MDT828122C	Medium, Cotton Body Holder Restraint	6 ea/cs
PSY2219	Quick-Release 5th Point Strap	1 ea/cs

Mitt Protectors

Features

- Poly cotton fabric that is filled with resilient polyester pile
- Used with stroke patients to prevent contracture or to exercise fingers in rehabilitation, and to also help prevent scratching or picking
- Completely washable; fits left or right hand
- Safety Check design allows the top flap to fold back to check the patient's hand while the product is in use
- The Finger Control Mitt Protector and the Cotton Flexible or Rigid Mitt Protector can be attached to bed frame or wheelchair with supplied strap if arm restraint is needed: cotton

Item Number	Description	Pkg
MDT823243	Safety Check Mitt Protector	1 pr/cs
MDT823256	Cotton Flexible Mitt Protector	1 pr/cs
MDT823266	Cotton Rigid Mitt Protector	1 pr/cs
MDT823242	Finger Control Mitt Protector with Mesh Back	1 pr/cs

Palm Grip

Features

- For stroke patients, hand contractures or as a hand exerciser
- Soft cotton terry helps absorb perspiration
- Elastic strip holds grip in place
- Machine washable
- 2.5" x 4.5" (6.35 x 11.4 cm)

Item Number	Description	Pkg
MDT821300	Terry with Elastic-Strap	1 ea/cs

Arm Slings

Features

- The triangular arm sling is a lightweight basic muslin sling fits any patient
- The universal arm sling is a well-ventilated arm sling that fits any patient, and crosses in back to provide support

Item Number	Description	Pkg
MDT824085	Triangular Arm Sling, 18" x 36" (46 x 91 cm)	12 ea/cs
MDT823210	Universal Arm Sling	1 ea/cs

Drainage Bag Holder

Features

- Made from durable poly/cotton
- Attaches to wheelchair frame with 100% polyester straps
- 3 separate snap positions allow easy adjustment

Item Number	Description	Pkg
MDT825150	Polyester and Cotton Drain Bag Holder	1 ea/cs

Transfer Boards

- Smooth and strong, allowing for quick and effective patient transfers
- Made of high density polyethylene
- Easy to clean

Full Length

Optional: Three 2" (5 cm) web nylon restraint straps with side release plastic buckles help ensure safe and secure transfers

Item Number	Description
PVCM600A	71" L x 23.5" W (180 cm L x 60 cm W) 8 carrying handles 500 lb (227 kg) weight capacity

Half Length

Optional: Two 2" (5 cm) web nylon restraint straps with side release plastic buckles help ensure safe and secure transfers

Item Number	Description
PVCM600H	31" L x 23" W (79 cm L x 58 cm W) 6 carrying handles 500 lb (227 kg) weight capacity

Narrow Full-Length

Optional: Three 2" (5 cm) web nylon restraint straps with side release plastic buckles help ensure safe and secure transfers

Item Number	Description
PVCM600N	71" L x 15.75" W (180 cm L x 40 cm W) 8 carrying handles 500 lb (227 kg) weight capacity

Wide Full-Length

Optional: Three 2" (5 cm) web nylon restraint straps with side release plastic buckles help ensure safe and secure transfers

Item Number	Description
PVCM600W	71" L x 35.5" W (180 cm L x 90 cm W) 8 carrying handles 500 lb (227 kg) weight capacity

Airpal Inflatable Transfer Mats

To learn more about inflatable transfer mats please contact your Medline sales representative.

PolyGlide Transfer Sheets

Helps reduce the potential of patient and caregiver injury

- PolyGlide transfer sheets minimize manual patient handling during lateral transfers and repositioning,thereby helping to increase patient comfort.
- For the caregivers, transfer sheets reduce the effort required during lateral transfers and repositioning and hence help to minimize potential caregiver back injuries.

Autoclavable for Use in the OR!

- Can be autoclaved providing sterility for OR use.
- Long lasting PolyGlide transfer sheets can be washed up to 150 times without losing the Anti-Bacterial finish.*

Provides barrier protection

- Constructed of Polyester and Taffeta with a Silicon finish.
- PolyGlide transfer sheets have a Micro Barrier and finish.

Promotes safe handling procedures

- Optional storage bag can be attached to bed or stretcher making sheets easy to access, which may increase compliance.

* Recommended washing is 149 to 167° F and drying from 122 to 149° F. Chlorine bleach is not recommended, but hydrogen peroxide or peracetic acid can be used instead. This product does not protect users or others, from disease causing bacteria.

Designed for general patient transport; fully welded frame and litter top; shipped set-up no assembly is required; Four IV receptacles; Full perimeter non-marring bumper; All surface casters; Two locking casters; chrome plated frame, Beachwood/Beige powder coat litter top.

Optional Accessories: *Swing down side rails; Mattress pad; Manual Fowler back rest*

Item Number	Description
MPH08S1050	350 lb (159 kg) weight capacity

SAFE LIFTING AND MOVEMENT OF NURSING HOME RESIDENTS

Benefits, Cost and Effectiveness of a Safe Resident Lifting Program

Excerpted from DHHS (NIOSH) Publication Number 2006-117

What are the benefits of a safe resident lifting program?

The following benefits can be derived from a safe resident lifting program that includes mechanical lifting equipment, worker training on the use of the lifts, and a written resident lifting policy:

Benefits for Residents

- *Improved quality of care*
- *Improved resident safety and comfort*
- *Improved resident satisfaction*
- *Reduced risk of falls, being dropped, friction burns, dislocated shoulders*
- *Reduced skin tears and bruises*

Benefits for Employers

- *Reduced number and severity of staff injuries*
- *Improved resident safety*
- *Reduced workers' compensation medical and indemnity costs*
- *Reduced lost workdays*
- *Reduced restricted workdays*
- *Reduced overtime and sick leave*
- *Improved recruitment and retention of caregivers*
- *Fewer resources required to replace injured staff*

Benefits for Caregivers

- *Reduced risk of injury*
- *Improved job satisfaction*
- *Increased morale*
- *Injured caregivers are less likely to be re-injured*
- *Pregnant caregivers can work longer*
- *Staff can work to an older age*
- *More energy at the end of the work shift*
- *Less pain and muscle fatigue on a daily basis*

How effective is mechanical lifting equipment in preventing injuries to caregivers?

Research has shown that safe resident lifting programs reduce resident-handling workers' compensation injury rates by 61%, lost workday injury rates by 66%, restricted workdays by 38%, and the number of workers suffering from repeat injuries. Similar findings have been reported by other investigators.

Furthermore, this research has shown an increase in caregiver job satisfaction, and a decrease in "unsafe" patient handling practices performed. Nurses ranked lifting equipment as the most important element in a safe lifting program.

What benefits will a safe resident lifting program have for nursing home residents?

Although some residents may be reluctant to try new lifting devices, studies have shown that the use of mechanical lifting equipment increases a resident's comfort and feelings of security when compared to manual methods. Injuries to residents are also reduced because the mechanical lifts protect residents from being dropped. Anecdotal information indicates that a reduction in skin tears and bruises may result when residents are handled mechanically rather than manually.

Bag/Liner Program

Strong, Lightweight and Guaranteed

The PVC Advantage

Built Strong to Last

- *5-year limited warranty, 100% rust-proof frame won't fade, stain or chip.*
- *Engineered with reinforced double tubing at key stress points, bonded with industrial-strength adhesive*
- *All new materials for consistent product performance*

Safe and Comfortable

- *Smooth surfaces and rounded corners*
- *PVC is warm to the touch; metals may tend to feel hot or cold*
- *Anti-slip grips are standard on all shower chairs*

Clean and Sanitary

- *Impervious PVC sheds water and any other fluids, making cleaning and disinfecting easy*
- *PVC exhibits great stain and odor resistance*
- *Inhibits the growth of bacteria and fungi*

1.5" (3.8 cm) fittings are 20% deeper than most for a solid foundation

Anti-slip grips

Medline's PVC designs meet the rigorous demands of the healthcare environment.

Industrial-strength adhesives for a solid feel and durable performance.

Double tubing at key stress points–a frame within a frame.

MEDLINE WARRANTY 5 YEARS

Medline stands behind your PVC products with a 5-year, limited warranty on the frame.

Replaceable casters in a variety of styles for every condition and budget

PVC Shower Chairs

PVCM1183VS

Premium Platform Chair

Deluxe, heavy duty seat provides additional seating room inside arms and snaps on/off for easy cleaning and disinfecting.

MDT5100CP	Protective Cover	Each

MDT5100

Deluxe Personal Safety Alarm

- Unique magnetic pull cord alarm with nurse call compatibility
- No on/off switch prevents tampering
- Volume control
- Tamper-resistant safety locking clip

Item Number	Description	Pkg
MDT5200	Deluxe Personal Safety Alarm	Each
MDT5200CP	Protective Cover	Each
MDT84BRKT	Bed Bracket	Each
MICRXCORD	Replacement Pullcord	Each

Wireless Pressure-Sensing Safety Alarms

- Reduce tripping hazards and eliminate broken or tangled pad cords.
- Cordless pads communicate with the monitor using wireless technology with both an audible and visual alert.
- Mount the monitor up to 15-20 feet away from the sensor pads to eliminate bedside alarm noise in the resident's room.

MDT8800

Features

- Fully adjustable volume
- Tamper proof technology with caregiver key
- Light alerts caregiver if signal is lost
- Comes with protective cover
- Volume control

Item Number	Description	Pkg
MDT8800	Wireless Monitor (Up to 2 pads)	Each
MDT433CMU	Central Monitoring Unit (Up to 30 pads)	Each

Wireless Alarm Pressure Mats & Accessories

Item Number	Description	Pkg
MDT88365B1	Bed Sensor Mat, 1-year warranty	Each
MDT88365XWB1	Bed Sensor Mat, 1-year warranty, X-Wide	Each

Aids to Daily Living

Making Physical Activity a Part of an Older Adult's Life

When it comes to getting the physical activity you need each week, it's important to pick activities you enjoy and that match your abilities. This will help ensure that you stick with them.

Things to Keep in Mind

- Try to do a variety of activities. This can make physical activity more enjoyable and reduce your risk of injury.
- Regular physical activity is still safe and beneficial even if you have problems doing normal daily activities, such as climbing stairs or walking.
- If you have to take a break from your regular workout routine due to an illness such as the flu, be sure to start again at a lower level and slowly work back up to your usual level of activity.
- To get to and stay at a healthy weight, start by doing the equivalent of 150 minutes of moderate-intensity aerobic activity each week. Keep in mind that you may need to do more activity or reduce the number of calories you eat to get to your desired weight.

Improving Your Balance

- Check with your local senior center to see if they offer balance training or tai chi classes.
- Are you at risk for falling because you've fallen in the past or have trouble walking? Older adults who are at risk for falling should do exercises that help them with balance.
- Try to do balance training on at least 3 days a week and do standardized exercises from a program that's been proven to reduce falls. These exercises might include backward walking, sideways walking, heel walking, toe walking, and practicing standing from a sitting position.

What if You Have a Chronic Condition?

- If you have a health condition such as arthritis, diabetes or heart disease, it doesn't mean you can't be active. In fact, it's just the opposite. Regular physical activity can improve your quality of life and even reduce your risk of developing other conditions.
- Talk with your doctor to find out if your health condition limits, in any way, your ability to be active. Then, work with your doctor to come up with a physical activity plan that matches your abilities.
- What's important is that you avoid being inactive. Even 60 minutes a week of moderate-intensity aerobic activity is good for you.

"Medline has great quality products that assist our residents in rehabilitating to their fullest potential. Our Medline rep, Ed, is always assisting us with finding the best, most cost-effective products to use."

Lori S., Director of Nursing

What if You Have a Disability?

- If you are an older adult with a disability, regular physical activity can provide you with important health benefits, such as a stronger heart, lungs and muscles, improved mental health and a better ability to do everyday tasks.
- It's best to talk with your health care provider before you begin a physical activity routine. Try to get advice from a professional with experience in physical activity and disability.

When to Check With Your Doctor

- Doing activity that requires moderate effort is safe for most people, but if you have a health condition such as heart disease, arthritis or diabetes, be sure to talk with your doctor about the types and amounts of physical activity that are right for you.

InTENSity TENS Unit

The InTENSity® 10 digital TENS device has 10 pre-set selections by body part for easy and effective use. With the press of two buttons, the device is ready to operate effectively based on the area of the body being treated.

Features:

- Helps with muscle and joint pain
- Includes lead wires, 4 self-stick high quality electrodes, 9V battery, hard plastic carrying case and instruction booklet

Item Number	Description	Pkg
MDSDI1010	Digital Tens Unit, Dual Channel	Each

Deluxe TENS Unit

Best valued digital TENS unit on the market. The digital processor is more accurately precise and has established itself as the preferred doctor's choice for effective pain relief.

Features:

- Dual channel for use with 2 or 4 electrodes
- 5 Modes: Burst, Modulation, Constant, MRW, SD, Bi-Pulse
- Pulse Width: 50-300(uS), Pulse Rate: 2-150(HZ)
- 100 mA maximum strength amplitude
- Wave Form: Asymmetrical Bi-Phasic Square Pulse

Item Number	Description	Pkg
MDSDT7202	Dual Channel, Single Mode	Each

Basic TENS Units

MDS86725

MDS86710

Features:

- Dual isolated channels, two leads per channel
- Pulse amplitude (constant current): Adjustable 0 - 80 mA, 500 Ohm load
- Pulse frequency: Adjustable 2-150(HZ)
- Pulse width (micro seconds): Adjustable 60-250 us
- Mode selector: N (Normal) for continuous output (MDS86710 only)
- Mode selector: Burst (B), N (Normal), or Modulation (M) (MDS86725 only)

Item Number	Description	Pkg
MDS86725	Dual Channel, 3 Mode	Each
MDS86710	Dual Channel, Single Mode	Each

Pain Relief

Point Relief® Topical Hot and Cold Pain Relief

- Designed for home exercise programs and individual patient use
- Combine exercise products that increase strength with pain relieving spray to increase comfort
- Kits are designed to target specific areas on the body

MDS100	Lightweight, Economy Exerciser	Upper and Lower Body	2 ea/cs

Overhead Shoulder Pulley Exercisers

- Pulley exercisers increase shoulder ROM
- Portable design can be easily transported and fitted to most doors

MDSP501023

Single Over-Door Pulley

- Models available with clamp or with strap

MDSP501010

Double Over-Door Pulley

- Deluxe exerciser has 2 pulleys and bracket for smooth and easy operation.

MDSBLRAMBRPH

Shoulder Pulley with Clamp

- Economy over-door shoulder pulley systems available with either a webbing door strap or metal bracket

Item Number	Description	Pkg
MDSP501023	Single Pulley with Strap	Each
MDSP501010	Deluxe, Double Handle Pulley	Each
MDSBLRAMBRPH	Shoulder Pulley with Clamp	Each

Fold-to-Activate EASY ACTIVATION Hot & Cold Packs

Only Medline offers the fold-to-activate feature across the product line

So easy to use! No more wrestling with the pack to get the inner lining to burst. Simply fold Medline's pack in half, and the lining bursts easily to activate the chemical reaction inside.

In answer to requests for packs that were easier to activate, Medline collaborated with customers, and the result is our new fold-to-activate packs. This new design replaces the industry standard – "squeeze to activate" – hot and cold packs, which can be difficult to use. When having to squeeze to activate, it can take several attempts before the inner lining bursts, which can be frustrating and time-consuming. The new design eliminates this frustration and saves time.

FOLD TO ACTIVATE

Denotes products with fold-to-activate technology

Instant Packs

Several sizes and types – plus fold-to-activate convenience.

Our wide selection of instant hot and cold packs are designed to fit your specific needs and budget, whether you're looking for soft, pliable material that easily conforms to the affected area, an insulating effect or a basic pack that gets the job done. And our new fold-to-activate feature provides quick, hassle-free activation.

Denotes products with fold-to-activate technology

So easy to use! No more wrestling with the pack to get the inner lining to burst. Simply fold Medline's pack in half, and the lining bursts easily to activate the chemical reaction inside.

How It Works

Fold the product in half | Shake | Wrap in Cloth | Apply

Deluxe Instant Packs—A Pack And Holder All In One

- Sweatless, paper-covered pack allows for direct contact with the patient's skin
- Deluxe packs save money and effort by eliminating the need for compress holders or towels

Item Number	Description	Size: Inches (cm)	Target Temp	Pkg
MDS148000	Cold Pack	6.75 x 9 (17.1 x 22.9)	32ºF/0ºC	24/cs
MDS148010	Cold Pack	5 x 7.5 (12.7 x 19)	32ºF/0ºC	24/cs
MDS149000	Hot Pack	6.75 x 9 (17.1 x 22.9)	115ºF/46.1ºC	24/cs
MDS149010	Hot Pack	5 x 7.5 (12.7 x 19)	115ºF/46.1ºC	48/cs

Accu-Therm® Insulated Instant Packs For Targeted, Longer-Lasting Therapy

- Additional insulating layer directs heat or cold directly to affected area
- Insulation provides a longer-lasting effect
- Soft and pliable bag conforms easily to the affected area
- Use with Medline compress holders on page 169

Item Number	Description	Size: Inches (cm)	Target Temp	Pkg
MDS139000	Cold Pack	6 x 10 (15.2 x 25.4)	32ºF/0ºC	24/cs
MDS139005	Hot Pack	6 x 10 (15.2 x 25.4)	135ºF/57.2ºC	24/cs

Instant Packs

Accu-Therm® Instant Hot And Cold Packs Conform Easily To Affected Area

- Our top seller!
- Soft and pliable bag conforms easily to the affected area
- Use with Medline compress holders shown below

Item Number	Description	Size: Inches (cm)	Target Temp	Pkg
MDS138000	Cold Pack	6 x 10 (15.2 x 25.4)	32ºF/0ºC	24/cs
MDS138010	Cold Pack	4 x 6 (10.2 x 15.2)	32ºF/0ºC	16/cs

MDS137020	Cold Pack	5 x 6 (12.7 x 15.2)	32ºF/0ºC	50cs
MDS137050	Hot Pack	5.75 x 7 (14.6 x 17.8)	120ºF/48.9ºC	24/cs

Compress Holders

- Protect the skin from extreme temperatures while holding hot or cold packs in place
- Specially designed to fit Accu-Therm and Standard Instant Packs

Item Number	Size: Inches (cm)	Type	Closure	Pkg
MDS138085	6 x 10.5 (15.2 x 26.7)	Nonwoven	Handheld	100/cs
MDS138090	6 x 35 (15.2 x 88.9)	Elastic Wrap	Hook & Loop	24/cs

Instant Warm Packs For Even Warming

- Lower target temperature (110ºF/43.3ºC) is excellent for use on delicate skin and patients with poor circulation.
- Gel-like material provides consistent warmth throughout the pack to reduce the likelihood of burns
- 4" x 11" size is made with soft, non-woven backed material for added patient comfort

Item Number	Description	Size: Inches (cm)	Target Temp	Pkg
MDS139007	Warm Pack	6 x 6 (15.2cm x 15.2)	110ºF/43.3ºC	36/cs

Perineal Packs

All-in-one design eliminates the need for separate pads and packs.

Our combined perineal pack/OB pads are economical and convenient because they provide therapy and absorbency all in one product. The high degree of absorbency also reduces the need for frequent changing, freeing up caregivers' time and allowing new moms more privacy and rest.

Premium Perineal Cold Packs Conform To The Body For Comfort

FOLD TO ACTIVATE

- Hour-glass shape is extra wide for optimum absorbency
- Generous size reduces the need to use with extra OB pads
- Tape tabs at front and back for secure placement

Item Number	Description	Size: Inches (cm)	Shape	Absorbency	Adhesive	Pkg
MDS158055	Premium Cold Pack	6.75 x 14.25 (17.1 x 36.2)	Contoured	Heavy	Tabs	24/cs

Deluxe Perineal Warm And Cold Packs—Our Top Seller!

FOLD TO ACTIVATE

- Highly absorbent pad reduces leakage
- Adhesive strip for secure placement
- Warm packs provide comfort after cold therapy is discontinued

Item Number	Description	Size: Inches (cm)	Shape	Absorbency	Adhesive	Pkg
MDS148055	Deluxe Cold Pack	4.5 x 14.25 (11.4 x 36.2)	Straight	Heavy	Strip	24/cs
MDS148065	Deluxe Warm Pack	4.5 x 14.25 (11.4 x 36.2)	Straight	Heavy	Strip	24/cs

Standard Perineal Cold Packs Save You Money

FOLD TO ACTIVATE

- Best option for the cost-conscious facility
- Features a standard weight OB pad

Item Number	Description	Size: Inches (cm)	Target Temp	Pkg
MDS1016	Transport Warmer	10 x 16 (25.4 x 40.6)	104ºF/40ºC	6/cs

Ice Bags

A variety of options for specialized cold therapy. The different shapes and sizes of these ice bags accommodate the varied needs of your patients. And reusable closures make them easy to refill for repeated use on a single patient. The soft, spunbound outer layer protects the skin, while the dual-layer inner lining keeps moisture in the bag as the ice begins to melt.

Tie-On Bag For Targeted, Hands-Free Cold Therapy

- Four 14" (35.6cm) ties allow bag to be attached right to affected area
- Easy open-and-close reusable clamp closure
- Available in two sizes

Item Number	Closure	Size: Inches (cm)	Attachment Method	Pkg
NON4410	Clamp	5 x 12 (12.7 x 30.5)	4 Ties	50/cs
NON4420	Clamp	6.5 x 14 (16.5 x 35.6)	4 Ties	50/cs

Handheld Bag For Easy Repositioning

- Easy open-and-close reusable clamp closure

Wrist Splints

- Provides support for mild sprains or strains, tendonitis and carpal tunnel syndrome
- Also suitable for arthritis, weakness in the wrist or support after cast removal

6" (15.2 cm) Foam with Aluminum Stay

Low profile design

- Internal top stay is movable and attaches with hook backing to allow for adjustment
- Foam material provides all-day comfort
- Universal size accommodates most men and women

7" (17.8 cm) Elastic with Aluminum Stay

Ideal for carpal tunnel

- Internal aluminum stay gives added support to stabilize the wrist
- Comfortable elastic material provides consistent compression without retaining heat

8" (20.3 cm) Foam with Aluminim Stay

Extreme comfort for all-day wear

- Slip-on design for easy application
- Nylon-backed foam provides all-day comfort
- Internal aluminum stay helps immobilize the wrist

Thumb Brace

- Lightweight material immobilizes the thumb and wrist while allowing for full use of the fingers

8" (20.3 cm) Suede Lace-Up

Optimum stability

- Lightweight aluminum stay positioned on the palm restricts movement
- Product features a single-pull lace closure for easy application

Wrist & Forearm Splint with Abducted Thumb

Easy application

- Easy-to-apply design with three forearm straps that secure for a high level of compression
- Ideal for immobilizing stable thumb fractures, sprains and joint dislocations

Thumb Brace

Universal, comfortable protection

- Self-absorbent lining provides comfort for all-day wear
- Compression straps are easily adjustable for a customizable fit
- Fits left or right thumb
- Ideal support for symptoms of arthritis, tendonitis, DeQuervain's tendonitis and gamekeeper's/skier's thumb

Thumb Brace—Universal			
ORT18220D	Universal	4-11 (10.2-28)	4 bx/cs

Back Support

Provides support for lower back strain, lumbar sprains, and to help with lifting.

Universal

Compression for comfort

- Two 4-inch, side-pull elastic panels for 360 degrees of compression
- The low profile design fits comfortably and discreetly under clothing for all-day wear
- Six plastic stays prevent rolling
- Provides support to the lower back and abdominal muscles

Item Number	Size	Dimensions: Inch (cm) (Circ. of Waist)	Pkg
ORT22000D	Universal	33-48 (83.8-122)	4 bx/cs

Maternity Belt

Extreme comfort for all-day wear

- Conforming, anti-roll stays prevent product from rolling over
- Lifts the abdominal area without adding additional pressure.
- Fits most sizes during various stages of pregnancy
- Helps relieve back and abdominal discomfort associated with pregnancy

Item Number	Size	Dress Size	Pkg
ORT22300D	Regular	6-14	4 bx/cs
ORT22300LD	Large	16-20	4 bx/cs

Hernia Belt

With Compression Pads

Lightweight material for added comfort and breathability

- Hook-and-loop closure allows for easy adjustments and a comfortable fit
- Low-profile design hides easily under clothing
- Removable foam compression pads help support weakened muscles in the herniated area
- Ideal support for inguinal hernias

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT22400SD	Small	30-35 (76.2-88.9)	4 bx/cs
ORT22400MD	Medium	35-41 (88.9-104.2)	4 bx/cs
ORT22400LD	Large	41-46 (104.2-116.8)	4 bx/cs

Arm Slings

Ideal for hand, wrist, upper and lower arm injuries in adults and children.

Universal

Breathable material

- Universal size designed with a wide, adjustable shoulder strap and foam pad for comfort
- Breathable polyester mesh allows air circulation and reduces heat buildup
- Arm pocket folds inward for shorter arms

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT11010D	Universal	19.33 x 7.75 (49.1 x 19.7)	4 bx/cs

Pediatric Print with Shoulder Pad

Fun, colorful print

- Generous arm pocket accommodates casts and bandages
- Adjustable shoulder strap with foam pad provides comfort

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT11400XXSD	Infant	9.5 x 5.5 (24 x 14)	2 bx/cs
ORT11400XSD	Toddler	10.75 x 6.5 (27.3 x 16)	2 bx/cs
ORT11400SD	Child	12 x 5.75 (30.5 x 14.6)	4 bx/cs

Cervical Collar

Firm Foam with 6" Extension Piece

Used in hospitals

- Serpentine style allows the chin to rest comfortably while supporting the head
- Comes in universal size; 6-inch extension piece allows the collar to expand to fit larger sizes
- Restricts neck motion, allowing muscles to rest

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT130105D	Universal	3.5 x 22 (8.9 x 55.9)	4 bx/cs

Cast and Bandage Protectors

Adult and Youth Sizes

Waterproof

- Unique design allows for easy one-hand application and eliminates the need for tape or straps
- Ideal for keeping casts, bandages or wounds dry while showering

Item Number	Size	Count	Pkg
CUR200AAA	Adult Arm	2	6 bx/cs
CUR200ALL	Adult Leg	2	6 bx/cs
CUR100KAA	Kids Arm	2	6 bx/cs
CUR100KLL	Kids Leg	2	6 bx/cs

Ankle Stirrups

Support for ankle instability, weak or injured ankles, mild to moderate sprains or strains and after cast removal. Universal design fits either ankle. Foot strap adjusts to accommodate many widths

Air & Foam Splint

Conforms and supports

- A combination of air and foam bladders inflate and deflate for desired compression

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT27200D	Universal	10 (25.4)	4 bx/cs

Memory Foam Padded Splint

Optimally conforms and supports

- Luxurious memory foam bladders provide superior, customizable support

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT27110D	Universal	10 (25.4)	4 bx/cs

Foam Padded Splint

Cast-like support

- Foam bladders conform to the natural contours of the ankle for a comfortable and supportive fit

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT27100D	Universal	10 (25.4)	4 bx/cs

Plantar Fasciitis Kit

Extreme comfort for a restful sleep

- Comfortably holds the foot in the recommended therapeutic position all night long for those suffering from Plantar Fasciitis
- Also includes exercise band and informational brochure

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT28410KITD	Universal	10 (25.4)	4 bx/cs

Heel and Elbow Protector

Universal Knit Design

Dual purpose

- Latex-free, stretchable elastic material provides comfort and support for heels and elbows
- Built-in pad adds protection while allowing full range of motion
- Pull-over design for easy application
- Includes two heel and elbow protectors in each box

Item Number	Size	Dimensions: Inch (cm)	Pkg
MDT823340	Universal	One size fits most	4 bx/cs

Abdominal Binder

9" Height Premium 3-Panel Design

Used in hospitals

- Elastic material provides optimum support for weakened abdominal muscles following surgical procedures including Cesarean section
- Tri-panel design reduces rolling

Item Number	Size	Dimensions: Inch (cm) (Circ. of Waist)	Pkg
ORT21110SMD	Small/Medium	30-45 (76.2-114.3)	4 bx/cs
ORT21110LXLD	Large/X-Large	46-62 (116.8-157.5)	4 bx/cs

Rib Belt

Universal

Used in hospitals

- High-quality elastic material for added comfort
- Contoured design accommodates both men and women
- Provides support for fractured or bruised ribs

Item Number	Size	Dimensions: Inch (cm) (Circ. of Rib Cage)	Pkg
ORT20100FD	Universal	28-50 (71.1-127)	4 bx/cs

Neoprene Knee Supports

- Support and compression for knee sprains and strains, symptoms of arthritis, knee contusions and instability
- Neoprene fabric has four-way stretch for optimal comfort and durability
- Retains heat while providing compressive support

Hinged with U-Shaped Support

Soft seam design to reduce irritation

- Covered hinges add comfort as they help stabilize the knee
- Removable U-shaped support may be positioned above, below or on either side of the knee cap for continual support
- Provides support for ACL/PCL ligament sprains, osteoarthritis, patella dislocations and knee instability

Item Number	Size	Dimensions: Inch (cm) (Circ. at Knee Cap)	Pkg
ORT23220SD	Small	13-14 (33-38.1)	4 bx/cs
ORT23220MD	Medium	14-15 (35.6-38.1)	4 bx/cs
ORT23220LD	Large	15-16 (38.1-40.6)	4 bx/cs
ORT23220XLD	X-Large	16-18 (40.6-45.7)	4 bx/cs
ORT232202XLD	2X-Large	18-20 (45.7-50.8)	2 bx/cs

J-Shaped Support

Targeted relief

- Durable neoprene material provides consistent compression and comfort
- J-shaped support maintains proper alignment of the kneecap
- Adjustable compression straps provide increased stability
- Product features spiral stays that provide stability while allowing for full range of motion
- Ideal support for lateral pressure syndrome, patella instabilities and lateral dislocation of kneecaps

Item Number	Size	Dimensions: Inch (cm) (Circ. at Knee Cap)	Pkg
ORT23250RSD	Right, Small	14-15 (35.6-38.1)	4 bx/cs
ORT23250RMD	Right, Medium	16-17 (40.6-43.2)	4 bx/cs
ORT23250RLD	Right, Large	18-19 (45.7-48.3)	4 bx/cs
ORT23250RXLD	Right, X-Large	20-21 (50.8-53.3)	4 bx/cs
ORT23250R2XLD	Right, 2X-Large	22-23 (55.9-58.4)	2 bx/cs
ORT23250LSD	Left, Small	14-15 (35.6-39)	4 bx/cs
ORT23250LMD	Left, Medium	16-17 (40.6-43.2)	4 bx/cs
ORT23250LLD	Left, Large	18-19 (45.7-48.3)	4 bx/cs
ORT23250LXLD	Left, X-Large	20-21 (50.8-53.3)	4 bx/cs
ORT23250L2XLD	Left, 2X-Large	22-23 (55.9-58.4)	2 bx/cs

Pull-Over

Four-way stretch material

- Knee is fully enclosed and supported by neoprene fabric

Item Number	Size	Dimensions: Inch (cm) (Circ. at Knee Cap)	Pkg
ORT23210SD	Small	13-14 (33-35.6)	4 bx/cs
ORT23210MD	Medium	14-16 (35.6-40.6)	4 bx/cs
ORT23210LD	Large	16-18 (40.6-45.7)	4 bx/cs
ORT23210XLD	X-Large	18-20 (45.7-50.8)	4 bx/cs
ORT232102XLD	2X-Large	20-22 (50.8-55.9)	2 bx/cs

Universal Neoprene Wrap-Around

Wrap-around style allows for a comfortable tapered fit

- The opening at the back of the knee prevents bunching during physical activity
- Ideal support for slight or moderate knee strains, patella dislocations, patellar tendonitis, swollen knees, runner's knee and patellar instability

Item Number	Size	Dimensions: Inch (cm) (Circ. at Knee Cap)	Pkg
ORT23260D	Universal	12-21 (80.5-53.3)	4 bx/cs

Pull-Over with Open Patella

Helps relieve patella pressure

- Triple-reinforced open patella stitching for added support and durability

Item Number	Size	Dimensions: Inch (cm) (Circ. at Knee Cap)	Pkg
ORT23200SD	Small	13-14 (33-35.6)	4 bx/cs
ORT23200MD	Medium	14-16 (35.6-40.6)	4 bx/cs
ORT23200LD	Large	16-18 (40.6-45.7)	4 bx/cs
ORT23200XLD	X-Large	18-20 (45.7-50.8)	4 bx/cs
ORT232002XLD	2X-Large	20-22 (50.8-55.9)	2 bx/cs

Elastic Knee Supports

Provides compression and support for conditions such as swelling, arthritis, sprains, strains and contusions. Preventive support for athletes.

Pull-Over

Helps control swelling

- Pull-over design for easy application
- Elastic material helps reduce swelling by increasing compression
- Preventative support for athletes

Item Number	Size	Dimensions: Inch (cm) (Circ. at Knee Cap)	Pkg
ORT23100SD	Small	14 - 16 (35.6 - 40.6)	4 bx/cs
ORT23100MD	Medium	16 - 18 (40.6 - 45.7)	4 bx/cs
ORT23100LD	Large	18 - 20 (45.7 - 50.8)	4 bx/cs
ORT23100XLD	X-Large	20 - 22 (50.8 - 55.9)	4 bx/cs
ORT231002XLD	2X-Large	22 - 24 (55.9 - 61)	2 bx/cs

Pull-Over with Cartilage Pads

Extra padding for optimum stability

- Plastic stays on both sides of the brace help prevent bunching while providing side-to-side knee cap support
- Additional cushioning also helps stabilize the knee cap

Item Number	Size	Dimensions: Inch (cm) (Circ. at Knee Cap)	Pkg
ORT23110SD	Small	11 - 13 (27.9 - 33)	4 bx/cs
ORT23110MD	Medium	13 - 15 (33 - 38.1)	4 bx/cs
ORT23110LD	Large	15 - 16.5 (38.1 - 41.9)	4 bx/cs
ORT23110XLD	X-Large	16.5 - 18 (41.9 - 45.7)	4 bx/cs
ORT231102XLD	2X-Large	18 - 19.5 (45.7 - 49.5)	2 bx/cs

Patella Strap

Universal Patella Strap with Compression Pad

Targeted relief

- Pressure pad for targeted compression to support the tendon below the kneecap
- Unique design to help relieve discomfort associated with Osgood-Schlatter disease and patellar dislocation
- Provides support for an injured or weakened patella, patella tracking and elevation

Item Number	Size	Dimensions: Inch (cm) (Circ. at Knee Cap)	Pkg
ORT25000D	Universal	11-18 (27.9-45.7)	4 bx/cs

* Measure circumference of leg 4 inches above knee.

Wrist Supports and Wrist Band

Support and compression for weak or injured wrists.

Universal Neoprene Wrap-Around Wrist Support

Low profile

- Won't interfere with everyday activity
- Wrap-around application provides compression and allows for easy, one-handed adjustment
- Recommended for DeQuervain's tendonitis, gamekeeper's/skier's thumb and carpal tunnel syndrome

Item Number	Size	Dimensions: Inch (cm) (Circ. at Wrist)	Pkg
ORT19700D	Universal	4-11 (10.2-27.9)	4

Elastic Wrist Support

Easy application

- Latex-free elastic material provides consistent compression to relieve discomfort for weak or injured wrists
- Pull-over design for easy application
- Ideal support for mild sprains and strains and overuse injuries of the wrist

Item Number	Size	Dimensions: Inch (cm) (Circ. at Wrist)	Pkg
ORT19600SD	Small	5-6 (12.7-15.2)	4
ORT19600MD	Medium	6-7 (15.2-17.8)	4
ORT19600LD	Large	7-8.5 (17.8-21.6)	4
ORT19600XLD	X-Large	8.5 (21.6) and up	4

Wrist Band

Elastic Wrist Band

Compression for comfort.

- Knit design offers uniform compression and flexibility for everyday use
- Latex-free elastic material provides firm, comfortable support
- Fits right or left wrist. For mild sprains and strains, weak wrists

Item Number	Size	Dimensions: Inch (cm) (Circ. at Wrist)	Pkg
ORT19500SD	Small	5.5-6.5 (13.9-16.5)	4
ORT19500MD	Medium	6.5-7.5 (16.5-19)	4
ORT19500LD	Large	7.5-8.5 (19-21.6)	4
ORT19500XLD	X-Large	8.5-9.5 (21.6-24)	4

Ankle Supports

A variety of styles for injuries or support following surgery.

Elastic Figure 8 Wrap

Simulates taping

- Latex-free elastic material provides lightweight support during physical activity
- Figure 8 design simulates taping for added stability and compression
- Adjustable hook-and-loop closure for a secure fit
- Fits right or left ankle
- Ideal support for swelling, tendonitis, mild sprains and strains and weak ankles

Item Number	Size	Dimensions: Inch (cm) (Circ. at Ankle*)	Pkg
ORT26120SD	Small	7 - 8.5 (17.8 - 21.6)	4 bx/cs
ORT26120MD	Medium	8.5 - 9.5 (21.6 - 24)	4 bx/cs
ORT26120LD	Large	9.5 - 11 (24 - 27.9)	4 bx/cs
ORT26120XLD	X-Large	11 - 12.5 (27.9 - 31.8)	4 bx/cs

Neoprene Pull-Over with Open Heel

Warmth and compression

- Retains heat for added comfort while providing compressive support
- Open heel design allows for complete range of movement
- Fits right or left ankle
- Ideal support for mild sprains and strains, ankle instability

Item Number	Size	Dimensions: Inch (cm) (Circ. at Ankle*)	Pkg
ORT26200SD	Small	8 - 9.5 (20.3 - 24)	4 bx/cs
ORT26200MD	Medium	9.5 - 11 (24.1 - 27.9)	4 bx/cs
ORT26200LD	Large	11 - 12.5 (27.9 - 31.8)	4 bx/cs
ORT26200XLD	X-Large	12.5 - 14.5 (31.8 - 36.8)	4 bx/cs
ORT262002XLD	2X-Large	14.5 - 16 (36.8 - 40.6)	2 bx/cs

*Measure circumference just above the ankle bone

Lace-Up Vinyl Brace

Strong support

- Metal stays provide stability to both sides of the ankle
- Flexible and breathable material allows for a comfortable fit
- Fits right or left ankle
- Ideal support for weak or injured ankles, mild or moderate sprains and ankle instability

Item Number	Size	Shoe Size Men's	Shoe Size Women's	Pkg
ORT27500SD	Small	8 - 9	9 - 10	4 bx/cs
ORT27500MD	Medium	9 - 11	10 - 12	4 bx/cs
ORT27500LD	Large	11 - 13	12 - 14	4 bx/cs
ORT27500XLD	X-Large	13 - 14	—	4 bx/cs

Lace-Up Figure 8 Brace

Strong support

- Low-profile design for a comfortable feel
- Plastic inserts on the medial and lateral sides provide added stability
- Fits right or left ankle
- Ideal for ankle instability, mild or moderate sprains, athletic activity, post-surgery ankle weakness and injury prevention

Item Number	Size	Shoe Size Men's	Shoe Size Women's	Pkg
ORT27600SD	Small	6 - 7	7 - 9	4 bx/cs
ORT27600MD	Medium	8 - 10	10 - 11	4 bx/cs
ORT27600LD	Large	11+	12+	4 bx/cs

Elastic Pull-Over with Open Heel

Helps control swelling

- High-quality elastic provides uniform compression to comfortably reduce swelling during physical activity
- Constructed with an open heel design for less bulk and more comfort inside a shoe
- Ideal support for weak or injured ankles

Item Number	Size	Dimensions: Inch (cm)*	Pkg
ORT26100SD	Small	7 - 8.5 (17.8 - 21.6)	4 bx/cs
ORT26100MD	Medium	8.5 - 10 (21.6 - 25.4)	4 bx/cs
ORT26100LD	Large	10 - 11.5 (25.4 - 29.2)	4 bx/cs
ORT26100XLD	X-Large	11.5 - 13.5 (29.2 - 34.3)	4 bx/cs
ORT261002XLD	2X-Large	13.5 - 15 (34.3 - 38.1)	2 bx/cs

* Circumference from base of heel around the ankle

Ask about our full line of compression hosiery

Elbow Supports

A variety of sizes are available in both elastic and neoprene fabric.

Neoprene Sleeve with Compression Strap

Targeted relief

- Slip-on style for easy application
- Neoprene material provides support and compression for the elbow
- Adjustable strap gives centralized support
- Fits right or left arm
- Ideal for tennis elbow, tendonitis, inflammation and mild sprains and strains

Item Number	Size	Dimensions: Inch (cm) (Circ. of the arm*)	Pkg
ORT17300SD	Small	7-9 (17.8-22.9)	4 bx/cs
ORT17300MD	Medium	9-10.5 (22.9-26.7)	4 bx/cs
ORT17300LD	Large	10.5-13.5 (26.7-34.3)	4 bx/cs
ORT17300XLD	X-Large	13.5-15 (34.3-38.1)	4 bx/cs

*Measure the circumference of the arm 3" (7.62 cm) below the center of the elbow

Elastic Pull-Over

Easy application

- Lightweight, latex-free elastic provides comfort and support for the elbow
- Pull-over design for easy, comfortable application
- Fits right or left arm. Ideal for symptoms of tennis or golfer's elbow and mild sprains and strains

Item Number	Size	Dimensions: Inch (cm) (Circ. of the arm*)	Pkg
ORT17400SD	Small	8-9 (20.3-22.9)	4 bx/cs
ORT17400MD	Medium	9-10 (22.9-25.4)	4 bx/cs
ORT17400LD	Large	10-10.5 (25.4-29.2)	4 bx/cs
ORT17400XLD	X-Large	11.5-13 (29.2-33)	4 bx/cs

*Measure the circumference of the arm 3" (7.62 cm) below the center of the elbow

Tennis Elbow

Compression Support Strap

Targeted relief

- Made with neoprene fabric for added comfort and warmth
- Hook-and-loop closure allows for easy application and adjustment
- Deluxe version provides maximum support with a pressure pad for targeted compression
- Provides support for tennis elbow, inflammation, irritation or slight tearing of the muscles and tendons just below the elbow

Item Number	Size	Dimensions: Inch (cm)	Pkg
ORT17100D	Universal, Standard	2 x 21 (5.1 x 53.3)	4 bx/cs
ORT17110D	Universal, Deluxe	2.75 x 31 (7 x 78.7)	4 bx/cs

Non-Retail Packaged Soft Goods

Also available for your display.

Standard Short Leg Walker

Designed to help maintain a normal gait

- Low profile design minimizes the difference in height leg to help maintain a normal walking gait and balance
- Wide distance between the uprights accommodate extra dressings and swelling
- Nonskid rocker bottom sole for safety
- Fits left or right leg

Size	Short Leg Item Number	Ankle Item Number

Deluxe Pneumatic Walker

Deluxe Pneumatic Short Leg and Ankle Walkers allow you to pump air into the walker for desired compression.

- Pneumatic system increases stability while decreasing pain and swelling
- Air is easily adjusted to achieve desired compression
- Low profile design minimizes the difference in leg height to help maintain a normal walking gait and balance
- Nonskid rocker bottom sole for safety
- Accommodates swelling patterns that occur throughout the rehabilitation process
- Fits left or right leg

Support Devices for the Back

Almost everyone will experience back pain at some point in their lives. The pain can vary from mild to severe. It can be acute or chronic. Most back pain is the result of trauma or a disorder such as arthritis. Pain from trauma may be caused by a sports or work-related injury.

However it happens, back pain can make everyday activities difficult. Symptoms may range from a muscle ache to shooting or stabbing pain, limited flexibility and range of motion, or even an inability to stand straight.

Back braces can help. They support the abdomen, take some of the load off the lower back, restrict motion and improve posture. Back braces are recommended for conditions such as lumbar muscle weakness, lumbar sprains and strains, pulled muscles, degenerative disc disease and herniated discs. Surgeons also recommend back braces for support and stabilization following spinal surgery.

Back Support with Suspenders

Aids in safe lifting

- Outer elastic panels provide adjustable compression
- Four internal stays prevent belt from rolling while providing additional lower back and abdominal support
- Comes with removable elastic suspenders

Item Number	Size	Dimensions: Inch (cm) (Circ. at Waist)	Pkg

Back Support with Dual-Pulley System

Low-profile design

- Support hides comfortably under clothing
- Metal stays provide added support for the lower back and abdomen
- Dual-pulley system allows for a proper fit with tailored compression
- Ideal for weak muscles and lower back pain

Item Number	Size	Dimensions: Inch (cm) (Circ. at Waist)	Pkg

Food Bumpers

Transforms the side of a plate into a high wall that helps prevent spills and assists in getting food onto a fork or spoon.

Extremely practical for people who tend to push food off the plate due to a lack of coordination.

Artho Thumbs-Up Cup

The ergonomic design of the mug increases leverage, aids in raising the cup to the lips without wrist motion and reduces spillage caused by tremors. Ideal for people who have decreased grip strength, wrist pain, hand deformities, tremors or need to keep the wrist in a neutral position.

Jar Opener

Securely holds wet, slippery jars and protects hands from hot pots and pans. Ideal for anyone who may experience difficulty in the kitchen due to diminished hand strength or coordination.

Convalescent Vacuum Feeding Cup

Specially designed cups eliminate the need to raise the head while drinking and enable a person to drink even while lying down.

Scooper Bowl and Plate with Suction Cup Base

High rim and reverse curve on one side aid in scooping food onto a utensil without spilling over the side. Suction cup base prevents skidding.

MDS745340000	Scooper Bowl with Suction Cup Base

Redware

Why Red Tableware? The human eye has more receptors in the retina to see red than any other color.

People who have Alzheimer's disease experience impairments not only in their cognitive abilities but also in their physiological status. Almost 40% of Alzheimer's patients experience significant weight loss[1]. A Boston University study suggests that this significant weight loss is due, in part, to the loss of the ability to distinguish contrast between colors. People with Alzheimer's are not able to distinguish light-colored food and drink when served in typically light-colored tableware. When using tableware that offered a high contrast to the food and drink (i.e., bright red), researchers noticed that the participants in the study increased their food intake by 24% and liquid intake by 84%[1].

Long-term care institutions are now leveraging the information gained from studies such as the Boston University study. Institutions are using red tableware in order to help Alzheimer's patients better see the food on their plates.

[1] Dunne TE, Neargardener SA, Cipollini, PB, Cronin-Golomb A. Visual contrast enhances food and liquid intake in advanced Alzheimer's disease. Clinical Nutrition 2004; 23:533-538.

Deluxe Redware Tableware Set

Includes partitioned scoop dish with lid, inner-lip plate, drinking cup, built-up fork and spoon.

Basic Redware Tableware Set

Includes scooper dish with non-skid base, drinking cup, built-up fork and spoon.

MDSD1210	Deluxe Sock/Stocking Aid

Household

Leg Loop™ Leg Lift

Foot loop stays open making it easier to position over foot, then closes when strap is pulled. Assists people with limited lower extremity strength to lift the leg and foot onto a wheelchair footrest, bed, into a car, etc. Rigid middle section allows for easy maneuverability. 36" (91.4 cm) in length.

Bed Rope Ladder

Helps people who have trouble getting up in bed to pull them into a sitting position. Ladder attaches to the bed frame and consists of five plastic rungs. Total length is 57-3⁄8" (145.7 cm).

Stick-to-Stand System

Measuring stick ensures that adjustable furniture (beds, chairs, commodes, etc.) is set at the correct height reducing the risk of falls. The Stick-to-Stand System enables you to correctly measure a person's lower leg length and then, without having to do any math, determine the correct furniture height for the individual by simply following the color coded lines on the stick.

Bed Assist Bar

Built to last, featuring a soft grip for comfort, pocket for handy storage and full length legs and straps for added safety. Sturdily constructed bar offers quick and easy tool-free assembly.

Big Lamp Switch

Big three-spoked knob creates more leverage and enables a person to turn lamp switches on and off with greater ease.

Swivel Seat

Removable machine washable cover. Slip resistant base provides security.

Medline Ultra Reacher

Product is specially designed with a full hand grip allowing the use of all four fingers for greater grip strength. Plus, non-slip rubber tabs over compose jaws latch onto items more securely. Weighs only 14 oz with a reach of 31" (79 cm).

Door Knob Extender

Converts a doorknob into a door lever providing extra leverage, making it easier for people with limited hand function to open doors.

Soft-Touch Leg Rest

Two position foot/leg rest helps to alleviate knee and back discomfort. Ideal for people with back, leg or foot pain and for people in wheelchairs who need to readjust their sitting position often in order to increase comfort and reduce the risk of pressure sores.
