

**Baxter**

ExactaMed 

Oral Liquid  
Medication Delivery

# We've increased the options... but the choice is clear

Baxter offers a full range of syringe sizes – 0.5, 1, 3, 5, 10, 20, 35 and 60 mL.

We've created an Oral Liquid Medication Delivery portfolio with a full range of syringes, sizes, packaging configurations and accessories so that **you can** decide the drug delivery system that works best for your pharmacy.

|               |                                    |
|---------------|------------------------------------|
| <b>COLORS</b> | Clear, Amber                       |
| <b>SIZES</b>  | 0.5, 1, 3, 5, 10, 20, 35 and 60 mL |

## SYRINGES

|                |                                    |
|----------------|------------------------------------|
| <b>ORAL</b>    | 0.5, 1, 3, 5, 10, 20, 35 and 60 mL |
| <b>TOPICAL</b> | 5, 10, and 20 mL                   |
| <b>VAGINAL</b> | 5 mL                               |

*The solution is easy when you have the right tools.*

1. Clearly marked graduations help promote accurate volume identification
2. Dispenser Tip designed to prevent wrong-route administration
3. Amber syringes provide protection for light-sensitive drugs
4. "Oral use only" labeling and white plunger rod provide clear differentiation from IV syringes
5. Distinctive blue printing designed for easy-to-read dose marking lines, even with dark liquids
6. Vaginal dispensers feature a rounded tip for patient comfort
7. Topical dispensers facilitate clean handling of topical medications such as creams and ointments
8. Self-righting tip caps designed for single-handed capping

# The right accessories to complete your oral dosing system

Our goal is to help you streamline your pharmacy practices. That is why we developed a complete system for preparing and administering oral medications with safety and efficiency in mind.

## **ADAPTACAP BOTTLE ADAPTER**

Converts a standard prescription bottle into a filling device for use with EXACTAMED Dispensers.

## **ADAPTACAP BOTTLE WELL**

ADAPTACAP Adapters with valved straw assembly for filling syringes without inverting source bottles.

## **UNIVERSAL BOTTLE ADAPTER**

Graduated bottle adapter with tethered closure converts most oral medical bottles into a filling device for use with EXACTAMED Dispensers.

## **ORAL SLIP-TO-ORAL SLIP CONNECTOR**

Connector for transferring fluids from one EXACTAMED Oral Syringe to another.

## **KWIKVIAL CONTAINER**

Plastic vials with heat-sealed foil lids for unit dose packaging, delivery and administration of oral liquid medications. Plastic tray keeps vials clean, separated and in fill position.

## **TAMPER-EVIDENT ORAL TIP CAP**

Three-part plastic cap used to indicate tampering on an EXACTAMED Syringe.

## **TAMPER-INDICATING SEAL**

Foil, tamper indicator for use with syringes (plungers and / or caps), prescription bottles, small ointment tubes, screw top vials and other closures requiring tamper indication.

## **MARK-A-DOSE LABEL**

Clear adhesive label to mark any graduated container for a dosage regimen. Perfect for use in an outpatient pharmacy.

## **ORAL LABEL**

Pre-printed, pin-feed labels for identification of oral medications.
