

Instructions For Use

Select the appropriate Magellan™ Safety Needle for your procedure.

Secure the needle by holding the needle and twisting the syringe clockwise to fully seat the needle. Remove protective needle sheath.

Open package by peeling back paper tab and remove safety needle.

Draw up medication and administer injection using an aseptic technique in accordance with your facility's protocol.

Lock the safety shield using any of the following activation methods

...thumb

...finger

...flat surface

Verify locked position through audible and tactile "click". Locked position will completely cover needle tip.

Once safety shield is locked, immediately dispose of needle and syringe in an approved sharps container.

All Magellan[™] Safety Needles are ISO color-coded.
