

VaPro

Touch Free Hydrophilic Intermittent Catheter

Simple. Clean. Independence.

The VaPro and VaPro Plus hydrophilic intermittent catheters help provide the right balance of ease-of-use and protection, thanks to the unique design and exceptional features.

People First: Timm Seestadt

"I thought that racing wheelchair was amazing," Timm says. "It only had three wheels and looked really fast. I was very excited and I realized that's what I wanted to do – to race and to go as fast as I possibly could."

Patient Needs

Easy Handling

- Patients benefit from an intermittent catheter that can be easily gripped and manipulated, and the need is amplified for those with limited dexterity

Independence

- For patients, keeping or achieving their independence can be everything
- Balancing intermittent self-catheterization with daily life can be a challenge

Adherence to a Schedule

- Learning to catheterize can create apprehension and challenges^{1,2}
- Mastering the IC procedure and adhering to a catheterization schedule is important to helping patients maintain long-term health^{1,3}
- If the catheter is easy to use, the patient is more likely to adhere to a catheterization schedule³

What healthcare practitioners are saying about the VaPro catheter:⁴

“Easy to explain to patients how to use the product.”

– Medical Assistant

“Easy to maneuver and lubricity is a plus.”

– Registered Nurse

“Less steps means better adherence to proper use.”

– Registered Nurse

VaPro and VaPro Plus Catheters

- The VaPro catheter is designed to help reduce bacterial contamination and be easy to use
- In an independent assessment, 89% of respondents who evaluated the VaPro catheter were “likely” or “very likely” to recommend the VaPro catheter with “ease of use” and reduced contamination as the most often mentioned reasons⁴

Protective tip

helps bypass bacteria in distal urethra

Protective sleeve

promotes easy handling and helps reduce bacterial contamination

Prehydrated and ready to use

Pure catheter hydration technology makes the catheter ready to use right out of the package

Easy-to-open packaging

large finger holes with tear strip to help facilitate easy opening

For those who prefer gel lubrication

Advance Plus intermittent catheter system

The Advance Plus intermittent catheter system features a Touch Free technique enabling users to catheterize with confidence – virtually anytime, anywhere.

Available with an integrated 1000 mL collection bag

A4353 Defined⁵

An intermittent urinary catheter with insertion supplies (A4353) is a kit, which includes a catheter and all supplies necessary for a single, sterile insertion (see below).

Code A4353 may be used if any of the following 1, 2 or 3 is supplied:

1. A single sterile package containing both an intermittent urinary catheter and all necessary insertion/collection supplies; or,
2. A sterile intermittent urinary catheter plus a separately-packaged sterile kit containing all necessary insertion/collection supplies; or,
3. A sterile “no-touch” type of catheter system.

- Ready-to-use, single-use intermittent catheter
- Hydrophilic-coated PVC catheter
- Protective tip and sleeve supports no-touch insertion technique
- 2 smooth catheter eyelets
- Color-coded funnel
- Adhesive tab for adhering packaging to a surface

This intermittent catheter is a flexible tubular device that is inserted through the urethra by male, female, and pediatric patients who need to drain urine from the bladder.

WARNING: To help reduce the potential for infection and/or other complications, do not reuse. If discomfort or any sign of trauma occurs, discontinue use immediately and consult your healthcare practitioner.

PRECAUTION: Please consult a medical professional before using this product if any of the following conditions are present: Severed urethra, unexplained urethral bleeding, pronounced stricture, false passage, urethritis – inflammation of the urethra, prostatitis – inflammation of the prostate gland, epididymitis – inflammation of the epididymis (testicle tube). Self-catheterization should follow the plan of care and advice given by your healthcare practitioner and be carried out only in accordance with the instructions for use provided. Because catheterization frequency varies by person, the recommended frequency of your catheterization should be provided by your healthcare practitioner. For any other questions about your catheterization, please contact your healthcare practitioner.

CAUTION: Rx Only. Federal (USA) Law restricts this device to sale by or on the order of a physician or other healthcare practitioner licensed under state law to order this product. Prior to use of this device, be sure to read (i) the complete information on how to use this device including Warnings, Cautions, and Instructions for Use, and (ii) all other package inserts and labels supplied with the product.
