

Introducing Medline Bath Safety Products with Microban® Antimicrobial Technology

What is Microban® Antimicrobial Protection?

Microban® protection fights the growth of microbes that can cause stains and odors on your bath safety products. And because Microban® protection is built-in during the manufacturing process, it won't wash off or wear away providing continuous antimicrobial protection for the life of the product.

See the Microban Difference

On an **unprotected surface**, microbes such as bacteria, mold, and mildew can double in number every 15-20 minutes.

Products manufactured with Microban® technology:
Microban technology works to penetrate the cell wall of the microbe so that it can't grow or reproduce.
Medline bath safety products with Microban® technology stay cleaner and fresher between routine cleanings.

This information is based upon standard laboratory tests and is provided for comparative purposes to substantiate antimicrobial activity for non-public health applications. MICROBAN® is a registered trademark of Microban Products Company. Microban Products Company makes neither direct nor implied health claims and does not protect the user from disease causing microorganisms. Microban® technology is not designed to replace normal cleaning practices. Antimicrobial action limited to product surface.

Bath Bench

Ideal for those who have difficulty sitting in a standard bathtub or standing in a shower.

Angled legs distribute weight over a large area to increase stability. Durable, anodized aluminum frame is rust-resistant. 300 lb. weight capacity.

The bathroom can be a breeding ground for microbes such as bacteria, mold and mildew.

High humidity and moisture can create an ample food source where bacteria can double in number every 20 minutes.

Medline bath safety products with Microban® antimicrobial technology help prevent the growth of stain and odor causing bacteria, mold and mildew.
