*Specialized Hearing Solutions*

**HomeAware™**

**Complete Home Alerting System**

## HomeAware™ Main Kit - HA360MK

The HomeAware incorporates safety, security and peace of mind. The revolutionary TruAlert D-RF monitoring technology checks your system every 2-3 minutes, 27/7 and even in the event of a power failure. Each time a transmitter sends a signal, the alert message will scroll across your HA360M display, such as "DOOR", "PHONE", etc. No matter the degree of your hearing or visual challenges, you are sure to be alerted with the 110 dB extra-loud alarm, powerful bed shaker and the large 2 inch notification alert scrolling on the display. Additional receivers will extend the range another 1,000 feet, and so on giving it unlimited range.

The HA360M has an Internal battery backup that it is provided by using (5) standard alkaline AA type batteries. Battery backup will provide up to 72 hours of continuous backup the longest of any system of its type available.

### Features

- Flashing strobe with scrolling alert messages on a bright red large 2 inch display
- Powerful bed shaker and adjustable alarm up to 105 dB
- Dual alarm clock with alarm and snooze duration
- Compatible with all traditional and new HomeAware™ receivers
- Monitoring of low batteries and broken links between Main Unit and transmitters
- Caller ID screen with large display
- Range up to 1,000 feet! Extend-able range with additional receivers
- USB plug charges your cell while you sleep
- Full battery back up

## HomeAware™ Deluxe Receiver (must be used with a Main Unit) - HA360RK2

The Deluxe Receiver will alert you to all signals from the Sonic Alert HomeAware HA360M Main Unit. The scrolling displays scrolls large 2 inch text of whatever transmitter has triggered the HA360M (DOOR, BABY, SMOKE, etc.) along with flashing light notification.

Add additional receivers to the HomeAware HA360M for notification in multiple rooms. **Must be used with the HA360M Main Unit and does not receive signals directly from transmitters.**

### Features

- Scrolling text and flashing light notification
- Scrolling large bright red 2 inch text
- Functions as an alarm clock with flash notification (no audible alarm or bed sha
- Dual alarm and snooze functions on alarm clock
- Adds an additional 1,000ft of range to the HA360M Main Unit
- Caller ID for landline and videophone calls
- Full battery back up (5 AA batteries not included)

## HomeAware™ Basic Receiver (must be used with a Main Unit)- HA360BRK

The Basic Receiver is a cost effective way to receive alerts from the HomeAware HA360M Main Unit in every room of your home! It has bright LED icons that will alert you to doorbell, baby cry, phone call, etc. Once a transmitter has sent a signal to the HA360M, the Basic Receiver will light up a corresponding icon, which will flash to get your attention. **Must be used with the HA360M Main Unit and does not receive signals directly from transmitters**

### Features

- Bright flashing LED icons
- Different flash patterns for each alert sent
- Adds an additional 1,000 ft of range to the HA360M Main Unit
- Battery Backup (3 AA batteries not included)

## HomeAware™ Main Unit + Fire/CO Alert + Internal Smoke/CO Listener Package - HA360MVSB

The HomeAware™ Main Unit + Fire/CO Alert + Internal Smoke/CO Listener will wake you up fast and get you moving via the extra loud 110dB alarm, flashing strobe light, easy to read 2-inch scrolling display and a powerful bed shaker. From the moment you plug the HomeAware in, it begins listening via a built-in microphone for your smoke and CO detectors which will trigger the system to alert via light, sound and its powerful bed shaker. The built-in Smoke/CO listener that will alert you to your smoke and CO detectors in case of an emergency. Supervision to make sure all systems are connected and ready to send alerts for any HomeAware connected devices such as the doorbell and other available accessories.

## HomeAware™ Main Unit + Smoke & CO Listener Package (doorbell included) - HA360MKS

The HomeAware™ Main Unit + Smoke & CO Listener will wake you up fast and get you moving via the extra loud 110dB alarm, flashing strobe light, easy to read 2-inch scrolling display and a powerful bed shaker. From the moment you plug the HomeAware in, it begins listening via a built-in microphone for your smoke and CO detectors which will trigger the system to alert via light, sound and its powerful bed shaker. Comes with a remote (wireless) doorbell, bed shaker and a built-in Smoke/CO listener that will alert you to your smoke and CO detectors in case of an emergency. Supervision to make sure all systems are connected and ready to send alerts for any HomeAware connected devices such as the doorbell and other available accessories.

## HomeAware™ Main Unit + Bed Shaker Package (doorbell not included) - HA360MV

The HomeAware incorporates safety, security and peace of mind. The revolutionary TruAlert D-RF monitoring technology checks your system every 2-3 minutes, 27/7 and even in the event of a power failure. Each time a transmitter sends a signal, the alert message will scroll across your HA360M display, such as "DOOR", "PHONE", etc. No matter the degree of your hearing or visual challenges, you are sure to be alerted with the 110 dB extra-loud alarm, powerful bed shaker and the large 2 inch notification alert scrolling on the display. Additional receivers will extend the range another 1,000 feet, and so on giving it unlimited range.

The HA360M has an Internal battery backup that it is provided by using (5) standard alkaline AA type batteries. Battery backup will provide up to 72 hours of continuous backup the longest of any system of its type available.

## HomeAware™ Main Unit + Smartphone Signaler With Bed Shaker Package - HA360MVSPT

The HomeAware™ Main Unit + HA360SPT Smartphone transmitter allows you to link your Apple or Android smartphone to your HomeAware™ system. The smartphone transmitter also will push alerts to your smart watch depending on the model. (Samsung Gear, Fitbit, Apple, Pebble and etc.)

Plug the HA360SP into the back of the HA360M Main Unit and it will create a link with your Bluetooth smartphone. Download the free HomeAware app to your phone.

The HA360M Main Unit will alert you to calls and texts with flashing lights, loud alarm and vibration. It will scroll either "CELL" or "TEXT" across the screen along with the caller's number or name.

## HomeAware™ Smoke / CO Transmitter - HA360SSCK

The HomeAware™ Smoke/CO (carbon monoxide) transmitter will alert you to the sounds produced by the smoke and CO detectors already installed in your home. This transmitter alerts you through the HomeAware™ Main unit and remote receivers located in other rooms.

Place the Smoke/CO Transmitter near a detector and it will listen for the T3 alarm sound from a smoke detector and the T4 sound from a CO detector. Once one of your detectors goes off, it sends a signal to the HA360M Main Unit, which will scroll "SMOKE" or "CO" across the screen depending on the emergency.

## HomeAware™ Baby Cry Transmitter - HA360SSBCK

The HomeAware™ Baby Cry transmitter will send a signal to the HA360M Main Unit and all remote receivers when it hears a baby crying, then the HA360M will scroll "BABY" across the screen along with alerting you by lights and vibration.

You can adjust the sensitivity of the Baby Cry detector. There are three levels to choose from. If you are not picking up the sound you need to be alerted to, simply move the sensitivity switch to a higher setting. If you have set this setting to HI and you are still not picking up the sound try moving the transmitter closer to the source sound.

## HomeAware™ Doorbell Transmitter - HA360DB

This versatile transmitter can be programmed to send many different alerts to the HomeAware HA360M Main Unit. Use it for additional doors, motion and as a help button or use as a replacement doorbell transmitter for the HA360M.

The HomeAware™ HA360DB Doorbell Transmitter will alert you when someone comes to visit and can be installed in minutes and requires no wires. You can add up to eight additional transmitters to accommodate other doors or use the doorbell transmitter as a portable personal SOS alert.

## HomeAware™ Smartphone Transmitter - HA360SPT

The HomeAware™ HA360SPT Smartphone transmitter allows you to link your Apple or Android smartphone to your HomeAware™ system. The smartphone transmitter also will push alerts to your smart watch depending on the model. (Samsung Gear, Fitbit, Apple, Pebble and etc.)

Plug the HA360SP into the back of the HA360M Main Unit and it will create a link with your Bluetooth smartphone. Download the free HomeAware app to your phone.

The HA360M Main Unit will alert you to calls and texts with flashing lights, loud alarm and vibration. It will scroll either "CELL" or "TEXT" across the screen along with the caller's number or name.

## HomeAware™ SonicBridge Unit - HA360BU

The HomeAware™ SonicBridge Unit allows traditional Sonic Alert receivers to work with the new HomeAware™ alerting system. The HomeAware™ is the only wireless system available that is compatible with all Sonic Alert remote receivers including the SA101, SA201, BL300, RH100 and SB1000 alarm clock. It also has the added feature of allowing a lamp to be plugged into it to allow for a flashing lamp option.

If a Traditional System transmitter activates a Traditional System receiver, a signal will not be sent to the HomeAware HA360M

## HomeAware™ Telephone / Videophone Transmitter - HA360VPT

Plug the HomeAware™ Telephone transmitter into any phone jack, fax machine or video relay box and the transmitter will send a signal to the HA360M Main Unit once a call has been received. The HA360M will scroll "PHONE", "FAX", or "VRS".

The transmitter plugs into and RL11 outlet and uses two #357 silver oxide batteries (included)

## HomeAware™ Dry Contact Transmitter - HA360DC

The HomeAware™ Dry Contact Universal Transmitter works to notify you to many different alerts if it is connected to the HomeAware main unit. This wireless transmitter will send a signal to the main unit and will make a loud sound, vibrate a bed shaker, or flash a strobe.

The universal remote start transmitter features five different door alerts such as FTDOOR and BKDOOR. It has other alerts such as a motion sensor alert (MOTION) and a help alert (HELP). The motion sensor alert and help alert could prove helpful in other situations. The universal remote start transmitter also connects to NOAA weather radio (STORM) or a home security system (SECURIT).

## HomeAware™ Universal Signaler - HA360US

The HomeAware™ Universal Transmitter works to notify you to many different alerts if it is connected to the HomeAware main unit. When the intercom is activated, if the kitchen timer goes off, when the garage door opens, if an alarm from a medical device activates, when the sub pump activates, and it can even notify you when the dog barks. It will send a signal throughout the HomeAware mesh network then a red LED light will start flashing. Depending on what you are trying to monitor the alert will be displayed on your HomeAware main unit.

INTCOM, KITCH, DRVWY, MDALERT, OXYGEN, FLOOD, and PET will scroll across your HomeAware main unit should it detect one of these alerts. There is a sensitivity setting switch which will allow you to program the HA360US to pick-up exactly what you prefer. You can choose from three levels, which include the HI setting that alerts you to more sounds and is most sensitive, the MED setting, which alerts you to less sound and is less sensitive, and the LO setting that is least sensitive of all.

## HomeAware™ Blink System - HA360B

This blinking alert will respond to different occurrences happening in and around your home. If you have a phone call incoming from a friend, an important text message from a family member or a fire alarm going off, the blinking alert of the system is the first product out there to use five colors to alert you to five distinct home events. The systems also functions as a blink doorbell.

### Features

- The brightest and most colorful signaling receiver on the market today
- Connects to the HomeAware main unit, transmitters, and receivers
- Blinks five unique colors to alert you to differing alerts when used with optional transmitters
- Simply press the link button on HA360B to link to HA360DB and other HomeAware receivers and transmitters
- Switch from receiver mode to main mode to reset the device
- The HA360B can be as far away as 400 feet from the Main Unit
- A fully-charged battery lasts for 48 hours
