

Features & Benefits

- Designed to drape like a natural breast so that it moves with the body, even flattening when a woman lies down
- Select styles feature a soft, clear gel layer that hugs the body and is extra gentle to scar areas
- Comfort+ material integrated into the silicone reduces perspiration by equalizing the temperature behind the form

★ New styles!

Doing light right.

Introducing Amoena Natura Xtra Light with Comfort+

Our Challenge	To design a breast form that is lighter than our lightweight forms but still durable enough to stay upright in a bra pocket.
Our Solution	Create a 2-layer form with: <ul style="list-style-type: none"> • A new silicone formulation to make the form lighter-than-lightweight • A slightly firmer back layer to help stabilize the form in the bra pocket—with Comfort+ built-in for an added benefit.
The Result	Nearly 40% lighter* Stays in place Doesn't break down Comfort+ benefits New anatomical shape
Learn More	It's not easy to create a lightweight form that conforms to Amoena quality standards. Find out how we did it: www.amoena.us/xtra-light

*Nearly 40% lighter than standard silicone forms of the same shape and size.
