Z'Fogless™ Water Mirror

SUPERIOR TECHNOLOGY

How it Works:

1 Slide mirror portion straight up from base

2 Fills up in only a few Seconds!

Hold the mirror portion with water reservoir and fill with warm water from your shower

3 Slide mirror portion back down onto base

Multiple Mounting Methods:

1 **Suction Cups:** Insert suction cups (X3) into the keyholes on the base.

2 **Tape:** Ensure the surface is cleaned with alcohol and allowed to air dry.

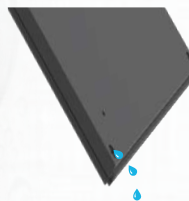

3 ***Silicone:** Apply the silicone to the back of the mirror base. *Silicone is only supplied with the ZW20TS/ ZW20TSBT Model

Squeegee:

The included storable squeegee is perfect for wiping shower overspray off the mirror surface.

Draining:

The drain hole allows water to run out the bottom of the unit in order to keep warmer water next to the mirror, helps prevent mildew, and allows the unit to empty so it is ready for future use.

Touch Light:

Simply touch the light sensor for easy ON/OFF lighting. Bright LEDs are targeted to light the jaw line with a glare-free reflection.

Z'Fogless vs Others:

- Short Fill Time vs • Long Fill Time
- Drains Automatically After Each Use vs • Must Empty after Each use
- Whole Face Viewing vs • Partial Face Viewing
- Light Focuses Directly on Jaw Line vs • General Lighting

Made In America
