

**WHEN DIET IS
NOT ENOUGH.**

Medline Active® Liquid Protein
Ready-to-use concentrated nutrition

ENHANCE HEALTH, ONE OUNCE AT A TIME

When diet alone is not enough, Medline Active® Liquid Protein with high protein content helps residents and patients get back to being themselves.

The importance of protein in improving health

Adequate protein intake plays an important role in improving many conditions commonly found in the elderly. Protein deficiency contributes to increased skin fragility, decreased immune function, poorer healing and longer recuperation from illness in older adults.¹ Patients who test for poor nutrition when they are admitted to the ICU may benefit most significantly from greater protein and energy intake, especially during longer ICU stays.²

Inadequate protein intake can also adversely affect wound healing:

- » Protein deficiency has been shown to contribute to poor wound healing rates with reduced collagen formation and can result in wounds rupturing along the surgical incision³
- » High wound exudate loss can result in a deficit of as much as 100 grams of protein in one day. This subsequently needs to be replaced with a high protein diet³

A small amount packs a powerful punch

Medline Active Liquid Protein consists of a dual protein source of hydrolyzed collagen and whey protein. A 1-oz. serving of **Active Liquid Protein contains 15 to 21 grams of protein**, roughly one-third of the FDA suggested daily value.⁴

The role of arginine

Medline Active Critical Care Liquid Protein contains 3.7 grams of arginine per 30 mL serving. Specialized nutrition containing arginine can help support the immune system to help the speed of recovery while hospitalized.⁵ Active Critical Care Liquid Protein also contains zinc and vitamin C, important nutrients for wound healing.^{6,7}

Easy to take

Because Active Liquid Protein is in liquid form, there's no need for mixing. It's easy to add Active Liquid Protein to hot or cold food or beverages, or to administer it orally or via feeding tube.

Bigger selection

Medline Active Liquid Protein is available in **sugar and sugar-free** options to meet patient and resident preferences. With better taste and smaller volume, you can experience improved compliance with prescribed dietary needs. Active Liquid Protein is gluten-free and lactose-free. Choose from Citrus Berry Punch, Orange Crème or Mild Citrus.

Small case count for optimal inventory control. A 4.2-oz. chicken breast typically contains 26.7 g of protein.³

WARNING: This product contains milk and whey isolate. Contains phenylalanine and should not be used by phenylketonurics.

Keep out of reach of children. Not for use by infants, children under age 4, or pregnant or lactating women. If tamper-resistant seal is broken do not use the product. Do not drink from the bottle or unit dose packs. This is medical food. Consult your healthcare professional on use of this product. Active Liquid Protein is not a sole source for nutrition and should not be used for weight reduction. Do not refrigerate. Shelf stable. 3-month shelf life from date opened.

A small amount goes a long way.

In addition to 30-oz. bottles, Medline Active Liquid Protein is now available in pre-measured 1-oz unit dose packets for convenient portability and dispensing.

BENEFITS

High Quality Nutrition

15 to 21 grams of protein for every 1-oz. serving along with other key nutrients.

Easy to Administer

Ready-to-use liquid for oral consumption or tube feeding.

Broad Selection

Available in a variety of sugar and sugar-free flavors.

Valuable Support

Access to on-staff registered dietitians and accredited continuing education courses on Medline University®, Medline's free online education resource.

Item No.	Description	Protein per 1-oz. Serving*	Pkg.	HCPCS
ENT693CB	Active Liquid Protein, Citrus Berry, 30-oz.	15 g	4/cs	B4155
ENT693SFCB	Active Liquid Protein, Sugar-Free Citrus Berry, 30-oz.	16 g	4/cs	B4155
ENT693SFCBUD	Active Liquid Protein, Sugar-Free Citrus Berry, 1-oz. Unit Dose	16 g	100/cs	B4155
ENT693OC	Active Liquid Protein, Orange Crème, 30-oz.	15 g	4/cs	B4155
ENT693SFOC	Active Liquid Protein, Sugar-Free Orange Crème, 30-oz.	16 g	4/cs	B4155
ENT697	Active Critical Care Liquid Protein, Sugar-Free Citrus Berry, 30-oz.	21 g	4/cs	B4155
ENT697UD	Active Critical Care Liquid Protein, Sugar-Free Citrus Berry, 1-oz. Unit Dose	21 g	100/cs	B4155
ENT693SFUD	Active Liquid Protein, Sugar-Free Mild Citrus, 1-oz. Unit Dose	16 g	100/cs	B4155
