

Ahhhh, the relief....

Satisfied users of **Apollo Cream™** report relief in treating the following conditions:

Incontinence/Body Waste:

- Urine scald
- Diaper rash
- Diarrheal skin breakdown
- Rectal Itch
- Saliva drool
- Perspiration irritation
- Prickly heat rash

Burns and Bites:

- Minor cuts and scrapes
- Minor burns
- Psoriasis - soothes itching
- Soothing relief for X-ray / chemotherapy skin reactions
- Sunburn discomforts - for instant, long lasting relief
- Insect bites - relieves itching

Surgical Sites:

- Ostomy care - before using skin barriers, appliances, etc.
- Itching under tapes and adhesives
- Over porous (paper) tapes - offers continued relief without affecting adherence
- Surgical incisions - reduces itching and pulling discomforts
- Around draining wounds
- Around decubitus sites
- Prior to applying a cast

Dry Skin

- Discomfort of cold sores
- Chapped lips
- Chapped hands

- Cuticle cream
- Psoriasis and Eczema - soothes itching and discomfort

Massages:

- Massage vehicle on pressure prone areas
- Massage vehicle for tired, aching feet
- Anti-embolism stockings - use before putting stockings on - won't affect elastic

Miscellaneous Uses:

- Behind-the-ear irritation from eye glasses
- Sensitive nose due to cold/hayfever
- Moisturizer/foundation under cosmetics

Satisfied users claim, "**Apollo Cream™** works like a 'Miracle!'"

Apollo Cream™ is recommended to help promote healing and bring soothing relief to red, sore, irritated, broken down skin.

DIRECTIONS

General Skin Irritations: Cleanse area if necessary. Apply **Apollo Cream™** to soothe red, sore irritated skin and massage until vanished completely.

Incontinent/Perineal Care: Thoroughly wash area with gentle cleanser (suggest Apollo's no-rinse Perine™) and pat dry. Apply **Apollo Cream™** to either help clear up or prevent skin breakdown.

Decubitus Ulcer (Preventive Care): **Apollo Cream™** can help prevent decubitus ulcers in areas prone to their development by massaging bony prominences (e.g. elbows, knees, hips, cheekbones, ankles, heels, etc.) with **Apollo Cream™** several times daily.

Stage 1 Ulcer: A Stage 1 ulcer has developed if skin is red and the redness does not disappear within 20 minutes. Use **Apollo Cream™** and gently massage the area surrounding the reddened area to encourage the return of circulation. **NOTE: Do Not** massage the reddened area directly. This can cause trauma. Consult with medical professionals.

Note: **Apollo Cream™**, when massaged in completely, will not interfere with tape adhesion. See some examples below:

Ostomy Care: Massage a very small amount of **Apollo Cream™** thoroughly into peristomal skin until vanished. Air dry 30 – 60 seconds. Use a skin barrier if necessary. Attach ostomy appliance.

Surgical Dressings: **Apollo Cream™** can be applied around draining wounds to protect skin before taping. **Apollo Cream™** can be rubbed through porous paper tapes, as necessary, to relieve itching and discomfort.

CONTAINS: Deionized Water, Lanolin Oil, Cetyl Alcohol, Propylene Glycol, Natural Vitamins A&D, Stearyl Alcohol, Bees Wax, Sodium Lauryl Sulfate, B.H.T., Quaternium-15, Benzethonium Chloride and Fragrance.
