

# Urology

**Products and resources designed  
with CAUTI prevention in mind**

At every step of your patient's journey, we are here to provide quality Dover™ urology products to help achieve a positive experience.

Cardinal Health offers a comprehensive portfolio of urology products that aid in all aspects of the urological care solution from chronic conditions to alternatives to Foleys when catheterization is unnecessary. Up to 25% of patients receive a Foley catheter during their stay in the hospital and each day a catheter is inserted, the risk of catheter associated urinary tract infection (CAUTI) increases by 3-7%.<sup>1,2</sup> CAUTIs are considered never events and top of mind for hospitals to reduce the patient risk associated with Foley catheters. We believe our products and educational resources help provide care for your patients during and after catheter insertion, when preventing the risk of CAUTI matters most.

# Dover™ Foley Catheter Insertion Trays: Closed System

Closed system trays provide all the necessary supplies to complete a catheter insertion and includes a pre-attached catheter on the drainage bag.

### Standard Foley Prep Trays include:

- Patient education pamphlet
- CSR wrap
- Fenestrated drape
- Moisture-proof underpad
- Blue nitrile exam gloves
- PVP-based antiseptic
- 10cc prefilled sterile water inflation syringe
- 10g lubricating jelly in bellow syringe
- Specimen container with label
- Foley reminder label

### Premium Foley Prep Trays also include:

- Pre-attached catheter securement device
- Castile soap towelettes
- Hand sanitizer

## Dover™ Foley Catheter Insertion Trays: Closed System

### Dover™ Silver Silicone Foley Urine Meter Trays

- Dover™ 100% silicone Foley catheter coated in silver hydrogel pre-attached to urine meter
- 400mL urine meter capacity for precise measurement
- 48 in. or 60 in. tubing lengths

## Dover™ Closed System Urine Collection Meter and Drainage Bag Importance of CAUTI Prevention post catheter insertion

Features and benefits on our most common Dover™ Urine Collection configuration promotes the Centers for Disease Control and Prevention (CDC) recommendations for CAUTI prevention when it comes to urinary catheter maintenance. It is critical to truly maintain a closed system while encouraging an unobstructed urine flow as the risk of CAUTI increases 3-7% each day the indwelling catheter remains inserted.<sup>2</sup>

### Urine Collection Meter

**Tube Management and sheet clip**  
Promotes optimal tube positioning to enhance flow performance while maintaining desired tubing length for various mobility requirements.

**Dual Hanger Hooks and string**  
Dual hanger hooks pivot to allow for level positioning and extra support even when on a non-level surface.

**Top Vent**  
This vent minimizes positive and negative pressure events within the system and the patient's bladder.

**Blue Clampable Tubing**  
Designated area to clamp the tubing and stop the flow of urine in order to draw a sterile sample from the patient

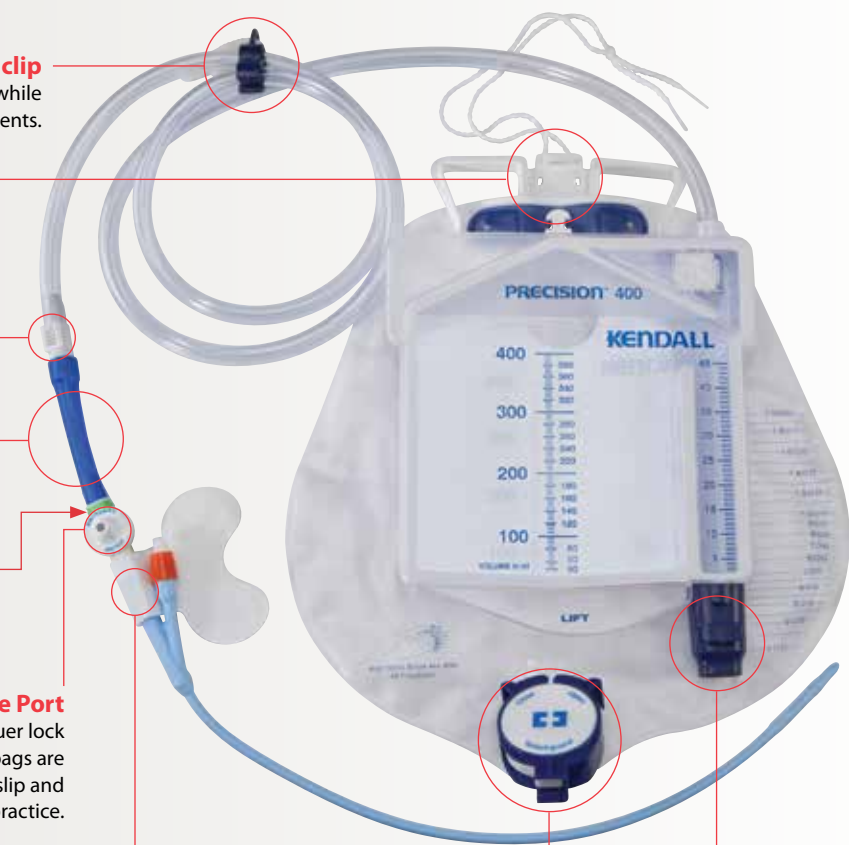

**Tamper Evident Seal (Green)**  
A green seal is formed around the attachment site of the Foley catheter and tubing to indicate if there was an attempt at disconnection.

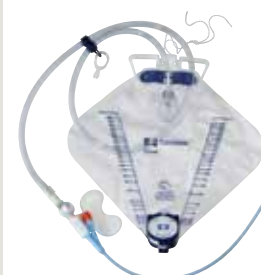

**Sample Port**  
This multi-access Luer lock sample port allows sampling with Luer lock syringe to prevent needle stick injuries. Collection meter and bags are available with different sample port access (Luer lock, Luer slip and needle) to accommodate varying facility protocols and practice.

**Pre-attached Securement Device**  
Our Cath•Secure Plus® adhesive securement device stabilizes the closed system drainage bag onto the upper thigh to allow ease of wear during patient mobility and prevents tugging of the catheter in the urethra.

**Enclosed Drain Spout**  
One-handed drainage operation for ease of use and reduces clinician exposure to fluids. It maintains a truly closed system by encasing the drain tube in hard plastic.

**Self-Sealing Drain Port**  
This sample port allows flow of fluid through a simple push of the dispenser and self-seals when released.

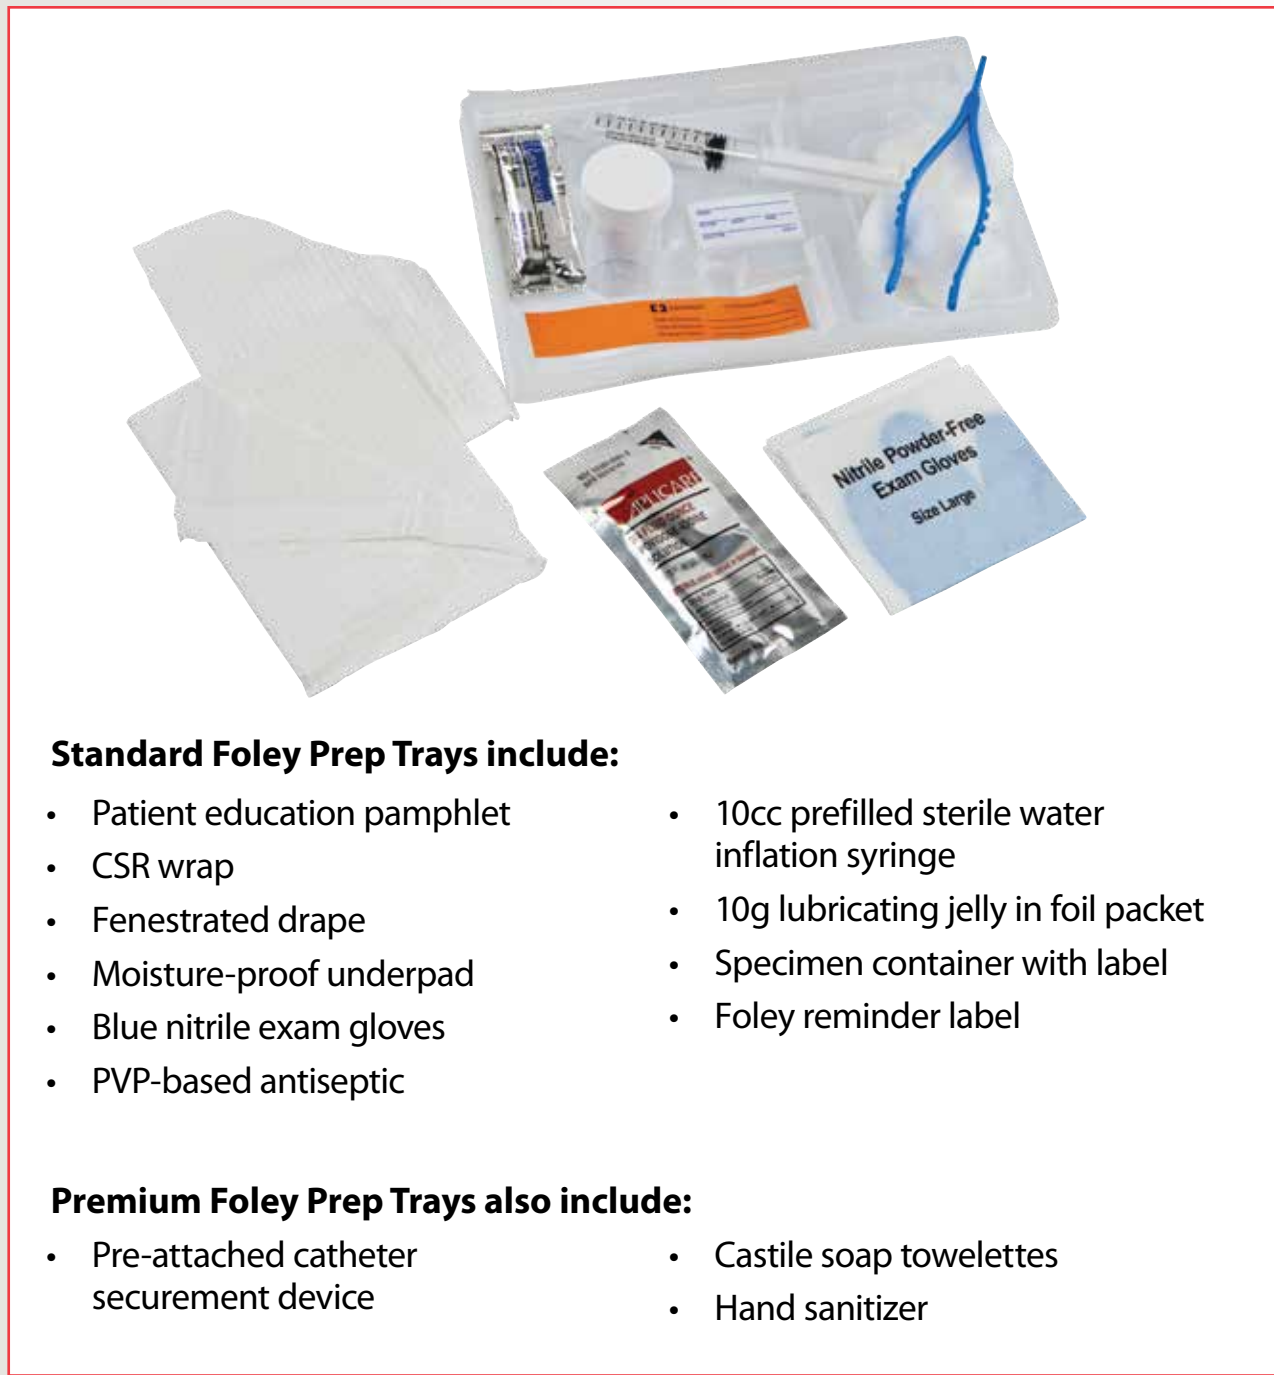

### Urine Collection Bag

The urine meter and collection bag share many of the same features. However, the urine meter measures exact output of urine while the collection bag gives approximate measures.

Note: Collection bag does not include meter, self-sealing sample port and blue claimable tubing.

# Dover™ Foley Catheter Insertion Trays: Open System

Open system trays provide necessary supplies to complete a catheter insertion yet still give the flexibility to choose the right catheter and drainage bag to fit the patient's need.

### Standard Foley Prep Trays include:

- Patient education pamphlet
- CSR wrap
- Fenestrated drape
- Moisture-proof underpad
- Blue nitrile exam gloves
- PVP-based antiseptic
- 10cc prefilled sterile water inflation syringe
- 10g lubricating jelly in foil packet
- Specimen container with label
- Foley reminder label

### Premium Foley Prep Trays also include:

- Pre-attached catheter securement device
- Castile soap towelettes
- Hand sanitizer

## Dover™ Foley Catheters

605163IC

### Dover™ Silver Silicone Foley Catheters

- 100% silicone with silver hydrogel coating eliminates latex allergy concerns
- Hydrogel coating provides a lubricious surface to ease insertion
- 16 in. catheter length for adult sizes (12 Fr and higher)\*
- Rounded tip, two opposing eyes
- Outer and inner catheter and balloon surfaces contain a patented silver and hydrogel coating which provides a consistent release of ionic silver particles

## Dover™ Foley Catheters

8887605163

### Dover™ Silicone Foley Catheters

- 100% silicone Foley catheter eliminates latex allergy concern
- 16 in. catheter length for adult sizes (12 Fr and higher)\*
- 12 in. catheter length for pediatric sizes (8 Fr and 10 Fr)\*
- Biocompatible, inorganic, non-porous, non-toxic, non-adhering material reduces incidence of encrustation, urethritis and stricture vs. latex catheters
- Rounded tip, two opposing eyes
- Coudé, angled tip designed to facilitate insertion into urethra
- Council (open tip) designed with reinforced hole at the tip of the catheter

## Dover™ Foley Catheters

1616

### Dover™ Latex Foley Catheters

- 16 in. catheter length for adult sizes (12 Fr and higher)\*
- 12 in. catheter length for pediatric sizes (8 Fr and 10 Fr)\*
- Coatings provide a lubricious surface to ease insertion
- Hydrogel absorbs water and forms a coating on the catheter to help ease insertion

## Dover™ Urine Collection

7000LL

### Dover™ Urine Meters

- Designed for precise measurement
- Capacity offerings range from 150mL to 400mL
- Top vent reduces positive and negative pressure events to properly drain the bladder
- Luer lock and luer slip sample port helps prevent needle stick injury
- Tube management and sheet clip promotes continuous downward flow of urine

## Dover™ Ancillary Products

### Dover™ Foley Catheter Securement Devices

- Adhesive and elastic leg strap options to keep the catheter secure and improve patient safety post-insertion
- Alcohol prep pad included in the Cath-Secure® product line to prepare skin before application
- Cath-Secure® Advanced offers:
  - Enhanced adhesive strength
  - Dual hook and loop tabs
  - Foam alley to reduce catheter movement
  - Rectangular shape provides greater footprint
  - Tabs on release liner for ease of use
  - Universal securement device

Code	Description	Ship qty.
<b>Adhesive securement devices:</b>		
54456P	Cath-Secure Plus®	40/carton
