

BigHorn™ Ramps uses advanced recycled plastic technology offering the newest in safe light-weight residential threshold transitions with heavy load capabilities. Designed for superior slip-resistance, StoneCap™ coating technology incorporates ceramic-coated quartz crystals, offering an enduring surface that is UV stable and guaranteed not to crack or fade.

Can be vertically cut for height and notched for door molding with typical rotary saws, “it cuts just like wood”. A snap to install! All BigHorn™ Ramps come with peel and stick tape for quick and easy installation.

**“SAFE ACCESSIBLE  
ENTRANCES FOR  
YOUR HOME”**

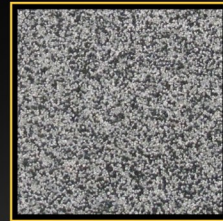

Unlike aluminum, BigHorn™ Ramps will not freeze or become slippery in wet or cold environments. In addition, molded mitered ends provide a high quality finished product attractive enough for the most discerning homeowner. Available in attractive granite and earth-tone colors to accentuate any home or residence.
