

speed recovery improve circulation enhance performance relieve pain relax muscles

Qfiber's high-tech therapeutic fabric technology allows the scientifically proven benefits of infrared heat therapy to be used on contact, where you need it most. It's wearable therapy that goes where you go.

INTRODUCING A REVOLUTION IN HEAT THERAPY

Qfiber is a high-tech therapeutic contoured body wrap that provides the user with very effective, safe infrared heat therapy in the car, home, office, computer (USB), or with lightweight battery pack.

Qfiber has been engineered with proven infrared technology, as well as a multi-layer fabric process containing therapeutic minerals that are emitted into the body when heated.

Qfiber is used by athletes on every level for injury recuperation, circulatory improvement, and performance enhancement. Qfiber is also used by individuals looking for soothing relief from pain, muscle tension, stress, and more.

Infrared is the safest, most beneficial form of sunlight and the most naturally medicinal energy available in the world. Qfiber allows this infrared energy to penetrate up to 2" inches into exhausted muscles. The result is an unmatched therapeutic advantage over any other form of heat therapy available. Most of all, it does not give off harmful Electromagnetic Frequencies (EMF's) like traditional electric heat products.

Qfiber is a patented medical grade fabric technology that can be incorporated into a wide range of products for therapeutic and performance enhancing purposes.

How heat helps: improves circulation, improves cell function (metabolism), decreases stiffness in tendons and ligaments, relaxes the muscles and decreases muscle spasm, lessens pain.

The therapeutic value achieved by using Qfiber is unmatched by traditional heat therapy technologies and infrared therapy is effective for a wide range of conditions such as: **Arthritis, Carpal Tunnel, Fibromyalgia, Reynaud's Syndrome, Shingles, Abdominal Cramps.**

BODY WRAP

- Used for Back, Shoulders, Knee, Hips, Abdomen, Ankles and more.
- Fits up to size 52" waist.

1 Patented Qfiber multi-layer fabric is fireproof, lightweight, formfitting, and emits high levels of infrared therapy.

2 Medically proven benefits of infrared energy penetrate up to 2" into muscles and joints; traditional heat therapy only goes one-tenth of an inch.

3 In addition to infrared benefits, heated Qfiber fabric emits all natural therapeutic minerals into the body.

4 Fully adjustable contour wraps are comfortable and convenient, while staying secure and breathable for longer treatment sessions.

5 Detachable straps allow for full body coverage.

ACCESSORIES INCLUDED:

-  Wall plug
-  USB adaptor
-  Car Charger
-  Lightweight battery pack
