ENFit™ Implementaion: U.S. Timeline (per GEDSA industry trade association)

2015 Q1 Administartion Sets with Transition Pieces

New feeding/administration sets will be available. A “Transition Connector” (stepped connector/“Christmas Tree”) will be supplied with these sets to provide compatibility with both current feeding tube connections and the new ISO standard (ENFit™) connector.

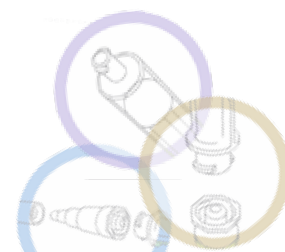

2015 Q4 Gastric Decompression Devices

New FARRELL Valve System Gastric Pressure Relief devices will be available in December. A “Transition Connector” will be supplied with the new FARRELL Valve System to provide compatibility with both current feeding tube connections and the new ISO standard (ENFit™) connector.

2016 Q1 Feeding Tubes and Enteral Specific Syringes

Flush and bolus Enteral syringes with the new ISO standard (ENFit™) connector will be available.

New Enteral feeding tubes (including the CORFLO and CORTRAK Enteral Access System product lines*) with the new ISO standard (ENFit™) connector will be available.

ENFit™ Transition Connectors

Individual boxes of Transition Connectors will be available for sale starting June 2015.

ENFit™ Transition Connector—No ENFit™ Codes Needed

ENFIT™ CATALOG #	PRODUCT	PACKAGED
F00071	Step (“Christmas Tree”) Connector: Allows an ENFit feeding administration set or enteral gastric decompression device to connect to a standard/non-ENFit feeding tube	30 per case
F00073	Oral Syringe Connector: Allows an Oral Syringe to be connected to an ENFit feeding tube	30 per case
F00074	Transition Funnel Connector: Allows an ENFit feeding tube to accept a Step (“Christmas Tree”) Connector or a Catheter Tip Syringe	30 per case

Selling Policy

1. Minimum order is \$300.00. For orders under \$300.00, a \$20.00 processing charge will be added to the invoice.
2. All shipments are F.O.B. Buffalo Grove, IL 60089, or point of origin.
3. Payment Terms are net 30 days.
4. Freight will be prepaid on orders of \$5,000.00 or more when shipped to a single location within the continental U.S.A. Shipments less than \$5,000.00 will be shipped freight collect.
5. A fee will be added to the invoice for drop shipments:
 - a. For orders up to \$400.00—\$20.00
 - b. For orders over \$400.00—5% of invoice total

Returned Goods Policy

It is understood that the responsibility for inventory levels and rotation of inventories rests with the distributor and not with CORPAK MedSystems Corporate office. All returns must have freight prepaid.

1. RMAs for full credit will be issued only for defective merchandise or orders processed in error by CORPAK MedSystems. These returns must be made within 30 days of the invoice date.
2. Any other return requests are subject to the following conditions:
 - a. A 25% restocking fee will be charged for goods returned within 60 days of invoice date. Merchandise must be in salable condition.
 - b. No credit will be issued for out of date goods, modified or discontinued goods. Do not return these goods to CORPAK MedSystems.
 - c. No credit will be issued for goods over 90 days old from the invoice date.
 - d. Return request for dated items are granted at the discretion of CORPAK MedSystems.
3. ENFit™ (ISO Standard 80369-3) Addendum
 - a. No returns on legacy products, other than for defective merchandise or orders processed in error by CORPAK MedSystems within 30 days of the invoice date. Legacy products include all products manufactured without the new ENFit™ Enteral access connector.
 - b. ENFit™ transition connectors are available in the market and provide connection between ENFit™ enabled administration sets and non-ENFit™ feeding tube connections – CORPAK legacy feeding tube products.

Your Clear Connection to Enteral Safety: Reducing the Risk of Misconnections

CORPAK MedSystems is proud to continue its legacy of leadership in bringing Enteral safety solutions to market. As the innovator for the market leading CORFLO yellow feeding tubes and the CORTRAK Enteral Access System (real-time, non-radiographic visualization technology for feeding tube placement), CORPAK knows how important safe Enteral therapy is to the clinicians and patients we serve every day.

A New Standard for Enteral Safety

The International Organization for Standardization (ISO) established ISO standard 80369-1 as the framework for all small bore connectors to reduce medical tubing misconnections. Most recently, an international group of clinicians, manufacturers, suppliers, and the U.S. Food and Drug Administration (FDA) have partnered with the ISO and the Association for the Advancement of Medical Instrumentation (AAMI) to create an ISO standard specifically for Enteral connectors (80369-3). The new Enteral connector for the new ISO standard (80369-3) has been given the name “ENFIT”. CORPAK has established a leadership role with industry on this initiative as a founding and charter member of the Global Enteral Device Supplier Association (GEDSA).
