

SOLUTIONS FOR MINOR PROCEDURES

**Promote savings, efficiencies and
standardization facility-wide.**

Reduce Expenses. Increase Efficiencies.

WE HELP YOU SUCCEED WITH MINOR PROCEDURE SOLUTIONS FACILITY-WIDE.

Are reimbursement cuts squeezing your operating margins? Supplier consolidation is a proven strategy for lowering costs and reducing waste. Medline answers the call as your all-in-one resource with procedure trays for every area of your hospital. Our trays help: Increase savings and efficiencies. Improve standardization. And make it easier to calculate per procedure costs.

This catalog details our extensive offering of standard kits. Can't find a stock solution that fits your needs? We can create custom trays that address your unique requirements. Ask your Medline Representative for details.

1/ea	StatLock® Tubing Securement Device, I.V. Ultra		
1/ea	Tourniquet*		

*Not made with natural rubber latex.

DID YOU KNOW?

Extension Sets

Some of the most common complications of I.V. starts, including phlebitis and site infection, can arise from over-manipulation of the catheter hub. A shifting hub is also uncomfortable for the patient. A simple extension set, along with proper securement of the hub helps address these situations.

Let Medline add an extension of your choice to your I.V. start kit. It won't cost any more than purchasing the extension and kit separately, but it's so much more convenient. In addition to the clinical benefits (such as easy swabbing), you'll be operating more efficiently because you have one less item to pull. It helps build consistency of care for all your patients.

You can choose from a variety of extension sets from popular suppliers such as:

- 1 B. Braun Medical Inc.
- 2 ICU Medical, Inc.
- 3 BD
- 4 Baxter
- 5 Smiths Medical
- 6 Alaris®
- 7 Nexus® Medical

Nexus High-Pressure Extension Set with Slide Clamp, 55688

Nexus High-Pressure Extension Set Pinch Clamp, 55689

Nexus Microbore Extension Set with Slide Clamp, 55684

Medline now offers one of the most popular needlefree connectors and extension sets featuring ICU Medical's proven Clave technology that can be added to any kit.

Smallbore Non-Removable

MC33150-NS
7" (18 cm) Smallbore Pressure Infusion (400psig) Extension Set with MicroClave® Clear, Purple Clamp, Rotating Luer, Non-DEHP Tubing

B33150-NS
7" (18 cm) Smallbore Pressure Infusion (400psig) Extension Set with MicroClave®, Purple Clamp, Rotating Luer, Non-DEHP Tubing

Securement Devices

Another simple addition to an I.V. start kit is a securement device. Medline offers an assortment of advanced securement dressings, specially designed tape strips and the Medline tubing securement device. More facilities are seeing the value of advanced securement. Tape serves multiple functions; securement devices are designed for one: holding an I.V. catheter in place better, longer and with greater patient protection and comfort. Medline uses a medical-grade adhesive backing and hook-and-loop system, which surrounds the hub to help prevent movement and avoid restarts. Advanced securement is included in our kit DYND74250, I.V. Start Kit with Medline Tubing Securement Device (Small) or you can opt to economically upgrade any I.V. kit with this component.

DID YOU KNOW?

To fight Central Line Associated Blood Stream Infections (CLABSI), many healthcare facilities are adding advanced antimicrobial dressings to their central line protocols. You can customize your Medline central line kits with advanced dressings from some of the biggest names in wound care.

- 1 **Medline SilvaSorb® Site**, with sustained-release antimicrobial ionic silver. Change frequency lasting up to seven days without harming tissue cells.

- 2 **Ethicon® BIOPATCH® with CHG**, uniquely designed to continually release Chlorhexidine Gluconate over 7 days, providing 360° protection.

- 3 **3M™ Tegaderm® CHG**, the only I.V. site transparent dressing integrated with a CHG gel pad, proven to reduce skin flora¹.

When the dressing is already in the central line kit, it makes it easy for the caregiver to remember this important part of their work to reduce infections. It's one less item to pull from inventory and it promotes a consistent level of care. Best of all, it's cost-neutral—it costs no more in a kit than it does individually.

1. In vivo on healthy adult subjects

YOUR PROCEDURE. YOUR PROTOCOL. YOUR CUSTOM SOLUTION.

We go beyond standard procedure trays to offer you tailored options. You choose what goes in. You specify the order. You can even include a printed copy of your protocol as reinforcement for your staff. Ask your Medline Rep for a free audit to evaluate your facility's current minor procedure tray needs. Receive a program tailored to your specific requirements. And get expert support for a smooth, risk-free conversion.
