

DRESSING CHANGE TRAYS

Customized to Clinician
Specifications and Hospital Protocol

Centurion Dressing Change Trays set the standard in site securement and stabilization. Featuring Centurion dressings and securement products that provide proven site and catheter protection for up to 7 days, trays are customized to the specific needs of clinicians and hospital protocol.

Centurion Dressing Change Trays are specifically designed for all types of catheter sites, including:

- Subclavian
- Internal Jugular
- PICC Lines
- Femoral
- Arterial
- Midlines
- Implanted Ports

BENEFITS FOR CAREGIVERS, HOSPITALS AND PATIENTS

- Using Centurion custom kits with components packaged in the proper order for maximum efficiency and effectiveness:
 - helps contain costs and promote standardized procedures
 - encourages consistent product usage and adherence to hospital protocol
 - eliminates the need to search for missing procedural components or the waste of extra, unused items
- Kits can be assembled with latex free components and packaging
- Dressing Change Trays customized with exclusive Centurion dressings and securement products:
 - help lower the risk of contracting a Central Line Associated Blood Stream Infection (CLABSI) with products that provide bacterial protection and long wear times†
 - provide a wear time of 7 days, meeting the demands of hospital protocols for central lines, resulting in fewer unscheduled dressing changes and time savings for caregivers
 - offer a positive patient experience by providing increased comfort, improved skin integrity and by lowering the number of times the site is disturbed

KITS CUSTOMIZED WITH CENTURION'S INNOVATIVE PRODUCTS:

SORBAVIEW® AND SORBAVIEW® SHIELD DRESSINGS

- Provide a proven barrier against contaminants, while allowing the skin to breathe freely
- Meet a 7-day dressing protocol for central lines
- Easy to apply and stay securely in place
- Designed with input from doctors and nurses
- Featuring strong adhesive that keeps dressing intact, yet is gentle and non-irritating to skin
- SorbaView SHIELD offers all the benefits of a SorbaView Dressing with built-in securement to protect the catheter and site

SECUREMENT AND STABILIZATION

- Unique products designed to stabilize the catheter:
 - SorbaView® SHIELD
 - HubGuard® Adhesive Foam Cushions
 - Universal Tape Strips
 - CVC Tubing Anchor
 - WingGuard® PICC Securement Device
 - Pre-cut tape strips and rolls

INFECTION CONTROL SOLUTIONS

- CHG-based ChloroPrep* and other prep solutions
- BIOPATCH® Protective Disk with CHG**
- Drapes, gloves and masks

ADDITIONAL KIT COMPONENTS

- Wide selection of products from various suppliers
- Many packaging options including stackable trays, flexible pouches, and wrapped foam trays
