

Attends®

Dryness is key to **improving skin health and minimizing risk of IAD** (Incontinence-Associated Dermatitis).

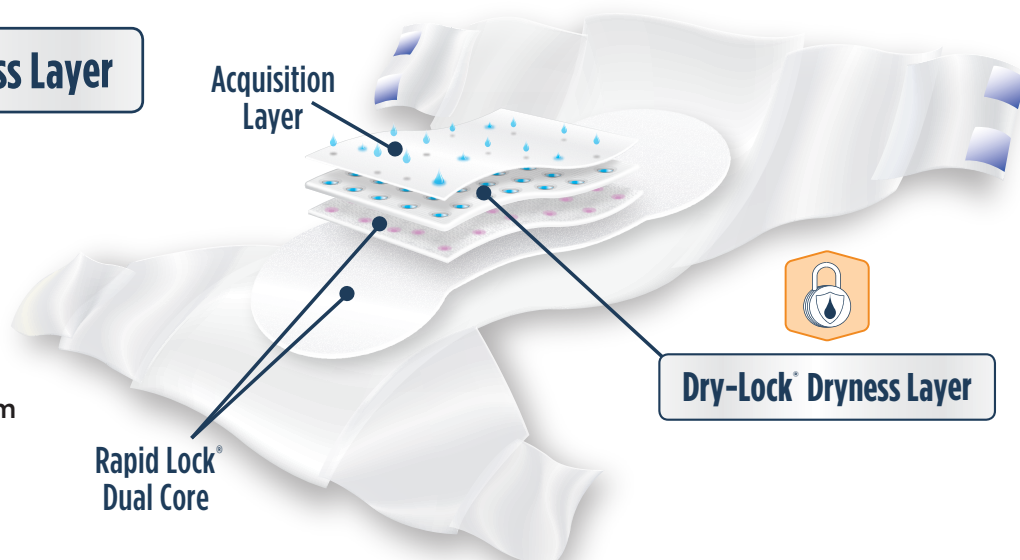

Our research team developed **Dry-Lock® Technology** which can be used in different areas of a product to **boost performance and help maintain dryness and comfort**.

This technology is clinically shown to provide **positive patients outcomes** which **improves your bottom line**.

Dry-Lock® Dryness Layer

- Located **below** the acquisition layer and **above** the core
- Enhances performance **by pulling moisture in and accelerating absorption**
- Helps to **prevent moisture from resurfacing, reducing leakage and improving skin dryness**

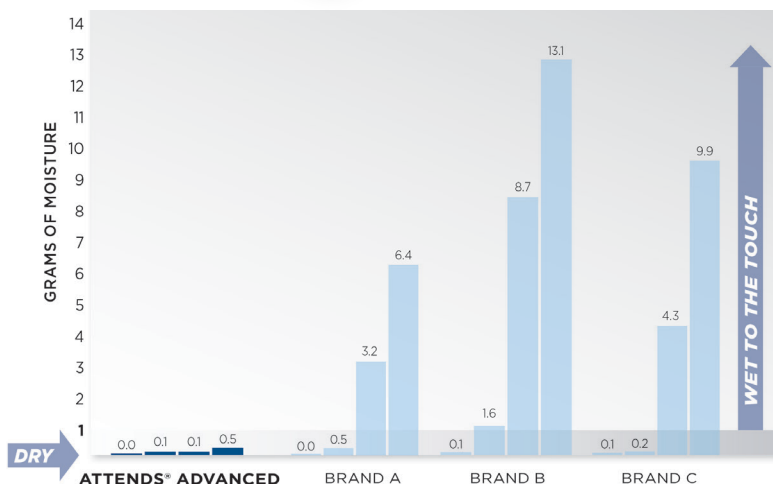

QUAD REWET

Measures wetness over time

0.9% Saline - 100 ML dose
30 minute dwell

Any result below 1g is dry to the touch.

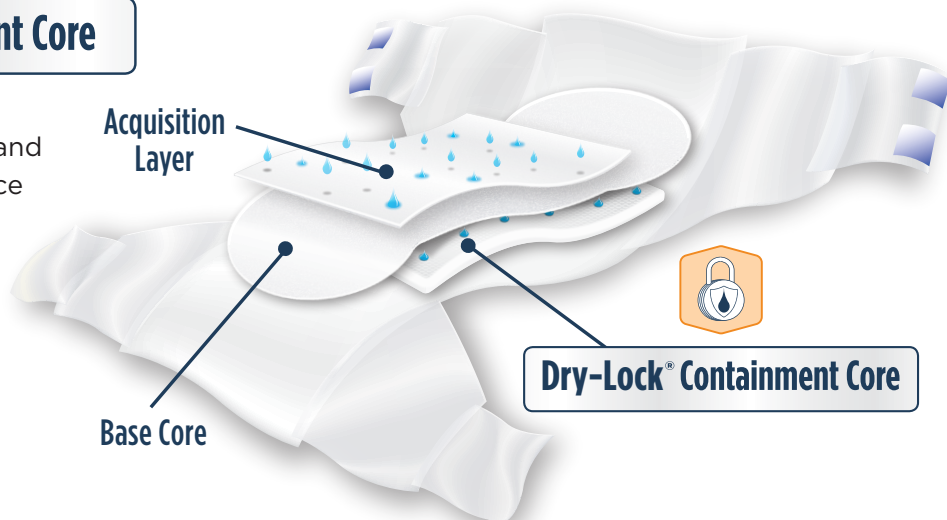

Attends® is the ONLY brand which remains DRY to the touch after ALL four insults.

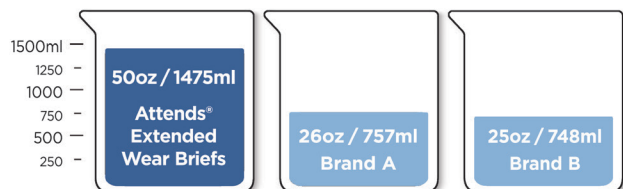

Dry-Lock® Containment Core

- Located **below** the acquisition layer and the base core to improve performance
- Contains an **increased amount of super absorbent material to lock in larger amounts of moisture**
- Offers **high-capacity without added bulk and weight**
- **Reduces leakage and improves skin dryness** over extended time

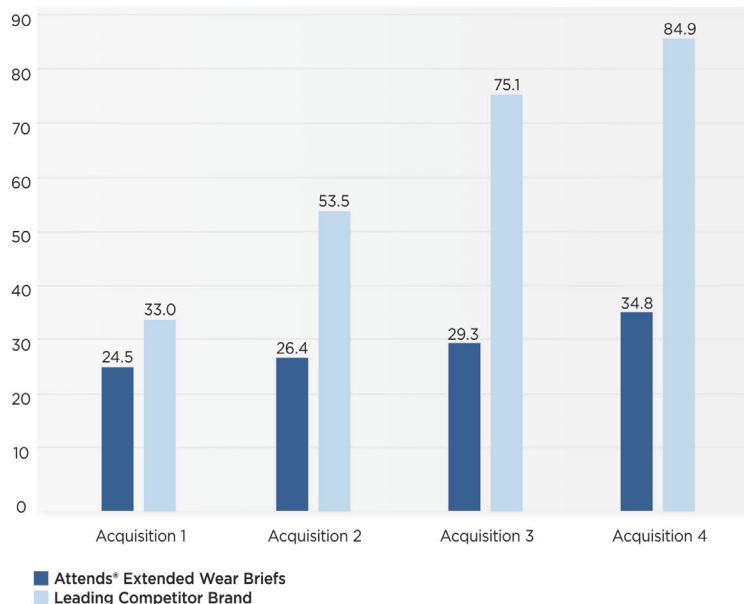

PRODUCT FLUID CAPACITY

**Dry-Lock® Containment Core =
DRIER DAYS AND NIGHTS
for Patients and Caregivers**

**AMOUNT OF TIME
(IN SECONDS)
THAT IT TAKES TO ABSORB
100 ML OF LIQUID**

**Attends® Extended Wear Briefs
ABSORBED CONSISTENTLY FASTER
on ALL four liquid acquisitions.**
