5712M Metal Pill Crusher

OPERATION INSTRUCTIONS (SEE PICTURE ABOVE)

1. Place pill **between** two 3/4 oz paper soufflé cups in Pill Crusher cavity as shown above.
- ⚠ **WARNING: DO NOT** use plastic soufflé cups — they could leave plastic slivers in the medication.
2. Pull handles together with only enough pressure to crush the pill.
 3. After the initial crush, pull the handles together lightly while revolving the cups. The combined motion will reduce the pill to a consistency similar to that of granulated sugar.

Info: Handle pressure required will vary depending on the hardness of the pill. Soft tablets will require less pressure than hard tablets. Too much pressure will re-compact the pill to water form.

MAINTENANCE / CLEANING

Clean the Pill Crusher as needed with a low-level hospital grade disinfectant.
