Supports & Braces

We've reinvented the category.

SAI TRADITION

For well over a century, SAI (Surgical Appliance Industries) has provided premium quality, cost effective healthcare products to professional orthotic fitters worldwide. Throughout, we have labored intensely to build an industry-wide reputation where **QUALITY** in materials and workmanship and in-depth **DEALER EDUCATION** are synonymous with our **TRUFORM®• OTC®**, **AIRWAY®** and **PCP®-CHAMPION®** brands.

While our history is rich with new product development and innovation, **REINVENTION** has long been the real key to our continued success, and has enabled us to maintain our long-time role as a **FULL-LINE INDUSTRY LEADER** in the design, manufacture and distribution of orthopedic soft goods, prescription grade bracing, and rigid motion control orthoses.

Today the tradition of **REINVENTION** continues as we continue to refine and improve our complement of handcrafted appliances: the **OTC® PROFESSIONAL ORTHOPAEDIC** and **CHAMPION®** lines of consumer-friendly supports and braces!

SAI ADVANTAGES

VALUE – You don't have to pay more to get the very best! High quality and affordability are synonymous with Truform•OTC products – a real plus in today's tight reimbursement market.

CONSISTENCY in design and quality – With few exceptions you buy direct from the original manufacturer, which ensures consistent product quality from order to order.

SIGNATURE CUSTOMER SERVICE – 95% of all orders are shipped with 24 hours of receipt, with a 99% accuracy rate – you receive what you want, when you want it!

SPECIAL ORDER CAPABILITY – Orthopedic appliances and select styles of gradient compression hosiery can be special-ordered to fit unique figure types.

WARRANTY – Truform•OTC products are warranted to be free of material or workmanship defects. Problematic merchandise will be repaired or replaced.

FULL-LINE SUPPLIER – Virtually every imaginable client need can be satisfied from the SAI Therapeutic Brands program! Literally the best of mix of motion control, support, safety convenience and mobility products, all from one source of supply. Many products are designed and packaged for today's self-pay market trend.

DEDICATED SALES/SERVICE ASSOCIATES – Fully trained professionals will personally visit your facility on a regular basis to assist in managing various aspects of your business.

ACCREDITATION – If you need to qualify for state licensure or fulfill CEU requirements, our week-long professional fitters training course and one-day refresher seminars may be just the prescription for your business needs.

PRACTITIONER AND PATIENT FOCUSED

The **SAI THERAPEUTIC BRANDS** program is built on the best mix of products that are designed and engineered for therapeutic performance and patient comfort – and specifically targeted to meet the needs of the everyday active consumer; the younger, fitness-oriented consumer with a self care/cash-pay orientation; and the occupational injury consumer.

Dynamic contemporary packaging **EDUCATES THE CONSUMER**, and creates a bold retail presence to help generate faster turns. **INNOVATIVE PACKAGE DESIGN FEATURES** create planograms that are easy to shop and easy to merchandise!

Knee Supports

Elastic pullover knee support Model: 2416 HCPCS: A4466

Medium duty controlled stretch support can be worn for mild sprains and strains, or for weakness due to previous injury or over-exertion. Provides comfortable uniform compression over the knee while helping to permit continued activity and preventing re-injury.

Measure around the bend of the knee.

SMALL	10.0-12.75 in.
MEDIUM	13.0-15.75 in.
LARGE	16.0-18.75 in.
X-LARGE	19.0-21.75 in.

KneedIT® therapeutic knee guard Model: 2422 HCPCS: A4465

Targets the physiological causes of minor knee pain like arthritis, tendinitis and chondromalacia. Anatomic design works in concert with the motion of the knee, applying pressure to the joint liner and patellar tendon and assisting in the relief of minor knee pain. Semi-rigid plastic support with high density foam padding molds itself around soft tissues for customized support. Well padded encircling strap for long term wearing comfort.

This knee guard is universally adjustable to fit up to 20 in. knee circumference.

LATEX FREE

Knee support with viscoelastic insert Model: 2425 HCPCS: A4466

Light weight, four-way stretch elastic provides excellent compression and control to the entire knee area while allowing full range of motion. The anatomically sculpted viscoelastic silicone insert completely surrounds the kneecap and delivers precisely targeted support to injured soft tissues. This support is excellent for light sports and exercise activity.

Measure around the bend of the knee.

SMALL	14.0-16.0 in.
MEDIUM	16.0-18.0 in.
LARGE	18.0-20.0 in.
X-LARGE	20.0-22.0 in.

ORTHOTEX knee stabilizer wrap for OA Model: 2540 HCPCS: L1820

Elastic wraparound strap system, with single polycentric hinged bar providing counter resistance, exerts corrective pressure to offload affected side of knee. Single polycentric hinged bar. Interior condyle pads with different thicknesses can be adjusted for varying daily needs.

Measure around the bend of the knee.

X-SMALL	12.0-13.0 in.
SMALL	13.0-14.0 in.
MEDIUM	14.0-15.0 in.
LARGE	15.0-16.0 in.

3X-LARGE	18.0-19.0 in.
4X-LARGE	19.0-20.0 in.
5X-LARGE	20.0-22.0 in.

LATEX FREE

Specify medial left/lateral right or medial right/lateral left.

ORTHOTEX knee stabilizer with spiral stays Model: 2541 HCPCS: A4466

Multi-function adjustable butress surrounds kneecap and provides compression and stabilization. Spiral stays provide moderate medial/lateral stability, flex and extend naturally. Sheer mesh elastic opening over back of knee. Encircling straps maintain stabilizer in position; straps are adjustable and removable. Latex free alternative to neoprene.

Measure around the bend of the knee.

SMALL	12.5-13.75 in.
MEDIUM	14.0-15.25 in.
LARGE	15.5-16.5 in.
X-LARGE	16.0-17.5 in.
2X-LARGE	17.75-19.25 in.
3X-LARGE	19.5-21.0 in.
4X-LARGE	21.0-24.0 in.

LATEX FREE

ORTHOTEX stabilizer wrap with spiral stays Model: 2542 HCPCS: A4466

Opens flat for easy application over injured, swollen or tender knees. Spiral stays provide moderate medial/lateral stability, yet flex and extend naturally with the joint. Opening over back of knee minimizes binding. Latex free alternative to neoprene.

Measure around the bend of the knee.

X-SMALL	12.0-13.0 in.
SMALL	13.0-14.0 in.
MEDIUM	14.0-15.0 in.
LARGE	15.0-16.0 in.

5X-LARGE	20.0-22.0 in.

LATEX FREE

ORTHOTEX knee stabilizer with hinged bars
Model: 2543
HCPCS: L1810

Polycentric hinged bars with flexion and extension stops provide medial-lateral support and stability. Multi-function neoprene buttress is adjustable. Sheer mesh elastic opening over back of knee. Upper and lower encircling straps maintain stabilizer in correct position; straps are adjustable and removable. Latex free alternative to neoprene.

Measure around the bend of the knee.

- SMALL 12.5-13.75 in.
- MEDIUM 14.0-15.25 in.
- LARGE 15.5-16.5 in.
- X-LARGE 16.0-17.5 in.

- 5X-LARGE 20.0-22.0 in.

LATEX FREE

ORTHOTEX knee stabilizer w/ R.O.M. hinged bars
Model: 2548
HCPCS: L1832

Low profile single axis hinged bars provide medial-lateral stability, adjust to control extension at 15°, 30° or 50°. Multi-directional stretch material provides even compression over all the anatomical prominences of the joint. Multi-function buttress surrounds patella and provides compression and stabilization. Latex free alternative to neoprene.

Measure around the bend of the knee.

- SMALL 12.5-13.75 in.
- MEDIUM 14.0-15.25 in.

LATEX FREE

Knee support with front opening
Model: 2545
HCPCS: A4466

Completely open front with opposing hook and loop fastening straps permits easy application over tender or painfully swollen knees. The heavy duty elastic material delivers firm compression to help reduce swelling and minimize pain. Bilateral pressure pads cradle the kneecap for added stability and help maintain proper joint alignment.

Measure around the bend of the knee.

- X-SMALL 9.5-11.5 in.
- SMALL 11.5-13.0 in.
- MEDIUM 13.0-14.75 in.
- LARGE 14.75-16.5 in.
- X-LARGE 16.5-18.5 in.
- 2X-LARGE 18.5-21.0 in.
- 3X-LARGE 21.0-23.5 in.

ORTHOTEX stabilizer wrap w/ R.O.M. hinged bars
Model: 2549
HCPCS: L1832

Opens flat for easy application over injured, swollen or tender knees. Low profile single axis hinged bars provide medial-lateral stability, adjust to control extension at 15°, 30° or 50°. Opening over back of knee minimizes binding. Latex free alternative to neoprene.

Measure around the bend of the knee.

- X-SMALL 12.0-13.0 in.
- SMALL 13.0-14.0 in.
- MEDIUM 14.0-15.0 in.

Knee & Ankle Supports

Knee support with spiral stays Model: 2553-P HCPCS: A4466

Heavy duty, controlled stretch support that helps reduce swelling and minimize pain while allowing full range of motion. Medial and lateral spiral stays bend with the knee, help to keep the elastic material from bunching. An excellent support for post-surgical recovery, it increases wearer confidence for walking or standing.

Measure around the bend of the knee.

- X-SMALL 9.5-11.5 in.
- SMALL 11.5-13.0 in.
- MEDIUM 13.0-14.75 in.
- LARGE 14.75-16.5 in.
- X-LARGE 16.5-18.5 in.
- 2X-LARGE 18.5-21.0 in.
- 3X-LARGE 21.0-23.5 in.

Knee brace with hinged bars Model: 2554 HCPCS: L1810

Heavy duty, controlled stretch brace provides protection and added stability for post-surgical recovery, or for those individuals with a history of joint instability. The rigid hinged metal bars provide excellent side-to-side support, yet allow for free flexion and extension. An excellent product for everyday activities like mild exercise and walking.

Measure around the bend of the knee.

- X-SMALL 9.5-11.5 in.
- SMALL 11.5-13.0 in.
- MEDIUM 13.0-14.75 in.
- LARGE 14.75-16.5 in.
- X-LARGE 16.5-18.5 in.
- 2X-LARGE 18.5-21.0 in.
- 3X-LARGE 21.0-23.5 in.

Knee support with pressure pads Model: 2555 HCPCS: A4466

Heavy duty, controlled stretch support that helps reduce swelling and minimize pain while allowing full range of motion. Bilateral support pads add stability and help maintain proper alignment. Medial and lateral spiral stays bend with the knee. This is an excellent support for post-surgical recovery. It helps reduce the incidence of reinjury while active.

Measure around the bend of the knee.

- X-SMALL 9.5-11.5 in.
- SMALL 11.5-13.0 in.
- MEDIUM 13.0-14.75 in.
- LARGE 14.75-16.5 in.
- X-LARGE 16.5-18.5 in.
- 2X-LARGE 18.5-21.0 in.
- 3X-LARGE 21.0-23.5 in.

Knee support with pads, expansion panel Model: 2555-V HCPCS: A4466

Gusseted opening and opposing hook and loop fastening straps permit easy application to painfully swollen knees, and also provide balanced support to those individuals with a well developed, "full size" thigh. Bilateral pressure pads cradle the kneecap for added stability and help maintain proper joint alignment.

Measure around the bend of the knee.

- X-SMALL 9.5-11.5 in.
- SMALL 11.5-13.0 in.
- MEDIUM 13.0-14.75 in.
- LARGE 14.75-16.5 in.
- X-LARGE 16.5-18.5 in.
- 2X-LARGE 18.5-21.0 in.
- 3X-LARGE 21.0-23.5 in.

Ankle stirrup brace with AIRFORM® pads Model: 2092 HCPCS: L4350

This stirrup ankle brace has a single bladder with three regulated communicative chambers. Its one of a kind design utilizes the fit of low profile pneumatics to dramatically increase stability without the rolling and swaying experienced in other stirrups. The "slow rebound" air delivery design reduces bottoming out. The air bladder is enclosed and protected to prevent the air chambers from being punctured. The AIRFORM® pad captures and provides a continuous smooth interface with the surface anatomy.

Brace is universally adjustable to fit virtually any size adult ankle. Merely choose for the LEFT or the RIGHT ankle. Also available in YOUTH/PONY size, LEFT or RIGHT.

LATEX FREE

High performance ankle brace Model: 2371 HCPCS: L1902

This lightweight brace stabilizes the ankle following severe sprains, tendinitis or after cast removal. The semi-rigid spiral stays move with the ankle and provide optimum medial-lateral support. The stays also help control rotational strains on the ankle, and provide resistance to inversion and eversion. Elastic panel in back permits athletic ankle motion. Lace front facilitates application and post-swelling adjustment.

LATEX FREE

Canvas ankle splint
Model: 2372
HPCPS: L1902

Effective in stabilizing the ankle joint following severe sprains, tendinitis or after cast removal. The rigid pre-bent metal stays are adjustable and provide excellent side-to-side support. The stays also help the splint control rotational strains on the ankle, and provide resistance to inversion and eversion. The lace front facilitates application and post-swelling adjustment.

Measure around the smallest part of the ankle.

LATEX FREE

Firm elastic pullover ankle support
Model: 2417
HPCPS: A4466

Medium duty controlled stretch support can be worn for mild sprains and strains, or for weakness due to previous injury or over-exertion. Provides comfortable uniform compression around the ankle while helping to permit continued activity and preventing re-injury.

Measure around the smallest part of the ankle.

- SMALL 6.75-7.75 in.
- MEDIUM 7.75-8.75 in.
- LARGE 8.75-9.75 in.
- X-LARGE 9.75-10.75 in.

Ankle stabilizer with heel locking straps
Model: 2375
HPCPS: L1902

This is one of the most widely used ankle bracing systems today because of its proven performance, comfort and durability. The adjustable strapping system provides optimum medial-lateral control, and will not stretch during exercise. It can be worn after an acute ankle sprain or as a protection against repeat ankle sprains during athletic activities.

Measure around ankle as shown.

- X-SMALL 10-11 in.
- SMALL 11-12 in.
- MEDIUM 12-13 in.

LATEX FREE

Ankle support with viscoelastic insert
Model: 2426
HPCPS: A4466

This ankle support provides excellent compression and control while allowing full range of motion. The anatomically sculpted viscoelastic silicone insert delivers targeted support to weakened or injured soft tissues under the malleoli (ankle bones). Easy to apply – slips on like a sock, slim design fits easily into shoes.

Measure around the smallest part of the ankle.

- SMALL 6.5-8.0 in.
- MEDIUM 8.0-9.0 in.
- LARGE 9.0-10.0 in.
- X-LARGE 10.0-11.0 in.

Ankle stabilizer with exoskeleton and straps
Model: 2376
HPCPS: L1902

This cool, light-weight ankle stabilizer combines the compression and comfort of a soft ankle brace with the rigid stability of an ankle stirrup. A plastic exoskeleton is formed directly onto the soft breathable fabric, forming a network of strategically placed support zones. The fully adjustable strapping system provides optimum medial-lateral control, and will not stretch during exercise.

X-LARGE	10.25-11.0 in.

Low profile night splint with air pad Model: 2095 HCPCS: L4396

This night splint provides an effective treatment for Plantar Fasciitis, Achilles tendonitis, drop foot and post-static pain. Its light weight, low profile design enhances wearing comfort. Enhanced wearing comfort means better compliance! Slips on and adjusts easily. Fits either right or left foot.

Sizes:

MEDIUM: usually best for women and adolescents
LARGE: usually best for men

LATEX FREE

Soft top post-op shoe Model: 2096 HCPCS: L3260

Designed specifically for use after soft tissue procedures and post trauma. Also provides relief for the geriatric or insensitive foot. Upper portion of poly-cotton material allows the foot to breathe, provides added comfort. Semi-rigid sole provides superior protection and control after osteotomies. Reinforced heel counter and padded heel collar provides more stability overall while reducing slippage. Adjustable straps accommodate extra bulky dressings. Easy to apply and remove; fits right or left foot.

LARGE	11.5-13 in.
X-LARGE	13-14.5 in.

Band-IT® therapeutic forearm band Model: 2421 HCPCS: A4465

A safe, non-invasive stimulant which aids in relief and prevention of pain associated with tendinitis, carpal tunnel syndrome, tennis elbow, repetitive stress injuries and cumulative trauma disorders. Can be worn for long periods of time with complete comfort without cutting off circulation or hampering daily movements.

Universally adjustable to fit most adults and adolescents.

LATEX FREE

Tennis elbow strap with lightweight air pad
Model: 2423
HCPCS: A9270

LATEX FREE

More support with less constriction to provide relief from painful symptoms of tennis elbow. Air pad provides focused pneumatic compression that cushions around elbow area.

Universally adjustable to fit most adults and adolescents.

Exolite® low profile wrist brace
Model: 2081
HCPCS: L3908

LATEX FREE

Shaped to maintain the wrist in a neutral position; sculpted to fit the nuances of the hand; designed to relieve predictable pressure points; contoured to reduce bulk; and three dimensionally molded to enhance wearing comfort.

	WRIST	PALM
SMALL	5.25-6.5	6.75-8.0
MEDIUM	6.5-7.75	8.0-9.25

Firm elastic pullover wrist support
Model: 2418
HCPCS: A4466

Medium duty controlled stretch support can be worn for mild sprains and strains, or for weakness due to previous injury or over-exertion. Provides comfortable uniform compression over the wrist while helping to permit continued activity and preventing re-injury.

Measure around the break of the wrist.

- SMALL 5.5-7.5 in.
- MEDIUM 6.5-8.5 in.
- LARGE 7.5-9.5 in.
- X-LARGE 8.5-10.5 in.

Reversible for right or left wrist.

Comfort Fit maternity support
Model: 2786
HCPCS: A9270

This maternity support is made from the finest quality beige elastic materials. It provides effective uplift support over the extended abdomen, stabilizing the ligaments, tendons and muscles of the lower back, and offering relief from strain and discomfort. Flexible boning in the back panel provides additional support.

This garment is sized according to dress size (prior to pregnancy).

- SMALL fits dress size 2 - 6
- MEDIUM fits dress size 6 - 14
- LARGE fits dress size 16 - 20

Lightweight lumbosacral support
Model: 2884
HCPCS: L0628

Provides support and stability to help relieve low back discomfort. Strong mesh elastic material conforms to body contours for a cool, comfortable, custom fit. Optional metal stays may be shaped to provide extra-firm support to the spine. Wide elastic adjustment panels provide varying degrees of compression to the low back - easily accessed and adjusted. Simple hook and loop fastening. 7 in. deep in front, 11 in. back.

Measure around widest part of hips.

- SMALL 26.0-32.0 in.
- MEDIUM 32.0-38.0 in.
- LARGE 38.0-44.0 in.

Scrotal elastic truss
Model: 2936 (SINGLE), 2939 (DOUBLE)
HCPCS: L8300 (2936), L8310 (2939)

Effective in relieving discomfort while treating inguinal or scrotal hernias. This men's support has been designed to support most common reducible ruptures. The design of this truss allows the specially shaped scrotal pad to self-align and maintain its proper position, thus applying support as a constant, unified stable force.

Measure around widest part of hips.

SMALL	30.0-32.0 in.
MEDIUM	34.0-36.0 in.
LARGE	38.0-40.0 in.
X-LARGE	42.0-44.0 in.
2X-LARGE	45.0-48.0 in.

For model 2936, select a garment for the side of the body affected (wearer's LEFT or RIGHT).

Lightweight single hernia support
Model: 2958
HCPCS: L8300

Very simple in design and very easy to use. Holds a single inguinal or scrotal hernia comfortably in reduction, and can also be used in special situations after a hernia repair to prevent recurrence. Its uncomplicated low profile asymmetric design allows it to be worn under clothing without detection. 4" web elastic encircling belt molds around body contours for a comfortable, custom fit.

Measure around widest part of hips.

Angora Warmers, Neoprene Knee Supports

Angora wool is the lightest of all natural fibers. The hollow structure of its fibers makes it ideal for thermal clothing. It is comfortable to wear next to the skin, allowing the skin to breathe but absorbing moisture and maintaining a steady temperature at the skin surface. In other words, angora will keep your clients warm and comfortable!

Angora warmers have beneficial therapeutic effects for arthritis, carpal tunnel syndrome, back problems or any other pain affecting the joints.

VALU^{LINE} knee support with oval pad
Model: C-141 (ROYAL)
HCPCS: A4466

Four-way stretch material provides even compression over all the anatomical prominences of the joint. Extra padding in front for twice the protection against traumatic contact and friction burns over the patellar area. Royal.

Measure around the bend of the knee.

SMALL	10.0-12.75 in.
MEDIUM	13.0-15.75 in.
LARGE	16.0-18.75 in.
X-LARGE	19.0-21.75 in.

VALU^{LINE} knee support with oval pad
Model: C-144 (ROYAL)
HCPCS: A4466

Spiral stays provide moderate medial/lateral stability, yet flex and extend naturally with the joint. Hor-Shu support pad surrounds kneecap (patella) and provides compression and stabilization. Open patella area helps reduce binding around the back of the knee. Indications include chondromalacia, patellar misalignment and instability, cruciate ligament support, cartilage support, patellar tendonitis.

Measure around the bend of the knee.

SMALL	10.0-12.75 in.

C-312BL

Knee stabilizer with hinged bars Model: C-310RB (ROYAL), C-310BL (BLACK) HCPCS: L1810

Polycentric hinged bars – with flexion and extension stops – provide excellent medial-lateral support and stability. Multi-function neoprene buttress is adjustable. Sheer mesh elastic opening over back of knee. Upper and lower encircling straps maintain stabilizer in correct position; straps are adjustable and removable.

Measure around the bend of the knee.

SMALL	12.5-13.75 in.
MEDIUM	14.0-15.25 in.
LARGE	15.5-16.5 in.
X-LARGE	16.0-17.5 in.
2X-LARGE	17.75-19.25 in.
3X-LARGE	19.5-21.0 in.
4X-LARGE	21.0-24.0 in.

C-310BL

Opens flat for easy application over injured, swollen or tender knees. Hook compatible laminate allows for easy adjustment. Multi-function buttress surrounds the kneecap (patella) and provides compression and stabilization. Adjustable as shown at left. Non-perforated material retains body heat and increases circulation, helps maintain joint flexibility.

Universally adjustable to fit most adult knees up to approximately 20.0 inches in circumference.

Thigh support with oval pad Model: C-315 HCPCS: A9270

Provides warmth and compression to injured thigh and hamstring areas. Oval patch for added compression, helps reduce muscle strains and pulls. Four-way stretch material provides even compression, plush lined interior absorbs moisture, wicks away perspiration. Indications include nonspecific pain in thigh area, hamstring strain or injury, quadriceps strain or injury, mild muscle and tendon pain, heat retention and compression.

Measure around the middle of the thigh.

SMALL	13.0-16.0 in.
MEDIUM	16.0-21.0 in.
LARGE	21.0-26.0 in.
X-LARGE	26.0-32.0 in.

Knee stabilizer wrap with hinged bars Model: C-311RB (ROYAL), C-311BL (BLACK) HCPCS: L1810

Opens flat for easy application over injured, swollen or tender knees. Polycentric hinged bars – with flexion and extension stops – provide excellent medial-lateral support and stability. Opening over back of knee minimizes binding, enhances wearing comfort.

Measure around the bend of the knee.

X-SMALL	12.0-13.0 in.
SMALL	13.0-14.0 in.
MEDIUM	14.0-15.0 in.
LARGE	15.0-16.0 in.
X-LARGE	16.0-17.0 in.
2X-LARGE	17.0-18.0 in.
3X-LARGE	18.0-19.0 in.
4X-LARGE	19.0-20.0 in.
5X-LARGE	20.0-22.0 in.

C-311BL

PROFESSIONAL NEOPRENE ankle support
Model: C-307
HCPCS: A4466

Post-cast/surgical support for weakened ankles. Four-way stretch material provides even compression over all the anatomical prominences of the joint. Push lined interior absorbs moisture and wicks away perspiration. Fits easily inside shoes – can be worn on either right or left ankle.

- Measure around ankle at smallest point.
- SMALL 6.75-7.75 in.
 - MEDIUM 7.75-8.75 in.
 - LARGE 8.75-9.75 in.
 - X-LARGE 9.75-10.75 in.

Ankle wrap
Model: C-313 (ROYAL)
HCPCS: A4466

Hook compatible laminate allows for wide range of adjustment. Four-way stretch non-perforated material provides even compression over all the anatomical prominences of the ankle joint. Criss-cross straps provide additional dorsi-flexion assist. Opens flat for easy application over injured, swollen or tender ankles. Indicated for strains and sprains, ankle instability and after cast removal.

Universally adjustable to fit most adult ankles up to approximately 11.0 inches in circumference.

Tennis elbow strap with support pad
Model: C-301RB (ROYAL), C-301BL (BLACK)
HCPCS: A4466

Excellent preventative/therapeutic device for wear during sports or construction activity. Helps dampen vibration and shock often transmitted during periods of repetitive motion. Provides relief from painful symptoms of tennis elbow. Perforated neoprene interface material allows for comfortable long-term wear.

Measure around forearm right below the bend of the elbow.

- SMALL 7.75-9.75 in.
- MEDIUM 9.75-11.0 in.
- LARGE 11.0-13.5 in.

C-301BL

Elbow support with encircling support strap
Model: C-302RB (ROYAL), C-302BL (BLACK)
HCPCS: A4466

Indicated for tendinitis, bursitis, arthritis, golfer's elbow, tennis elbow, mild elbow pain and tenderness. Four-way stretch material provides even compression over all the anatomical prominences of the elbow joint. Opening over elbow helps support maintain its correct position at all times. Encircling support strap prevents painful overuse of underlying muscles.

Measure around forearm right below the bend of the elbow.

- SMALL 7.75-9.75 in.
- MEDIUM 9.75-11.0 in.
- LARGE 11.0-13.5 in.
- X-LARGE 13.5-15.0 in.

C-302BL

VALU LINE wraparound wrist support
Model: C-128 (ROYAL)
HCPCS: A4466

Suitable for sprains, strains, carpal tunnel syndrome or arthritis. Thumb hole maintains support in position. Easy one-hand application. Closed cell foam material offers moderate motion control, as well as protection against bumps and abrasions.

Universally adjustable to fit most adult and adolescent wrists. Reversible to fit either the right or left wrist.

Wrist-thumb support
Model: C-303 (ROYAL)
HCPCS: A4466

Comfortably supports both wrist and thumb in opposition. Indicated for tendonitis, mild sprains and strains, repetitive motion injury. Reversible for right or left wrist.

Measure around the break of the wrist.

- SMALL 4.75-6.0 in.
- MEDIUM 6.0-8.0 in.
- LARGE 8.0-10.0 in.

Reversible for right or left wrist.

Neoprene Wrist & Thumb Supports, Pediatric Supports

Cock-up wrist splint Model: C-304 (ROYAL) HCPCS: L3908

Comfortably and firmly holds the wrist in a neutral position to promote healing and reduce pain. Two preshaped metal splints – one over the palm and the other over the back of the hand – are removable for additional contouring if necessary. Perforated neoprene glove is breathable for comfortable, extended wear. Hook-and-loop fasteners permit easy, one-handed adjustment and closure.

Measure around the break of the wrist.

- X-SMALL 3.75-4.75 in.
- SMALL 4.75-6.0 in.
- MEDIUM 6.0-7.25 in.
- LARGE 7.25-8.5 in.
- X-LARGE 8.5-10.0 in.

Specify for RIGHT or LEFT wrist.

Thumb splint Model: C-305 (ROYAL) HCPCS: L3923

Allows unrestricted movement in the fingers and preserves maximum function of the hand. This is an excellent choice to treat DeQuervain's Tendinitis, MCP joint sprains and strains, basal joint arthritis, and cumulative joint trauma. Contoured metal splint can be reshaped if necessary to enhance wearing comfort. Hook-and-loop fasteners permit easy, one-handed adjustment and closure.

Measure around the break of the wrist.

- SMALL 4.75-6.0 in.
- MEDIUM 6.0-8.0 in.
- LARGE 8.0-10.0 in.

Reversible for right or left wrist.

CHAMPION® KidsLine

is a family of Pediatric and Youth sized braces and supports. They are cut and assembled to follow the same anatomically correct profile as our popular adult versions, but are "right sized" to fit a smaller frame. KidsLine sizes will fit approximately 95% of children, providing an excellent fit and comfortable support.

KidsLine uses high quality, soft materials and hand-crafted construction to provide optimum support, wearing comfort and durability for all-day everyday play – things kids and parents want most.

Pediatric sizes will fit children from 2 to 7 years of age. Youth sizes will fit kids from 8 to 12 years old. Ages are approximate and should be used only as a quick reference guide for sizing. Please take measurements where indicated to select the proper size for your child.

KidsLine knee sleeve with open patella Model: C-316RB (ROYAL), C-316BL (BLACK) HCPCS: A4466

Four-way stretch material provides even compression over all the anatomical prominences of the joint. Opening over kneecap (patella) helps the support maintain its correct position at all times. Plush lined interior absorbs moisture, wicks away perspiration.

Measure around the bend of the knee.

- SMALL 6.0-8.0 in.
- MEDIUM 8.0-10.0 in.
- LARGE 10.0-12.0 in.

KidsLine slip-on ankle support Model: C-317RB (ROYAL), C-317BL (BLACK) HCPCS: A4466

Medium duty four-way stretch support can be worn for mild sprains and strains, or for weakness due to previous injury or over-exertion. Provides comfortable uniform compression around the ankle while helping to permit continued activity and preventing re-injury.

Measure around the smallest part of ankle.

- PEDIATRIC 6.5-7.25 in.
- YOUTH 7.25-8.5 in.

KidLine wrist wrap
Model: C-318 (ROYAL)
HPCPS: A4466

Suitable for sprains and strains. Thumb hole maintains support in position. Easy one-hand application. Closed cell foam material offers moderate motion control, as well as protection against bumps and abrasions.

Universally adjustable to fit most children's wrists. Reversible to fit either the right or left wrist.

KidLine soft foam wrist splint
Model: C-322
HPCPS: L3908

Holds the wrist comfortably in a neutral position to promote healing and minimize pain. Rigid ultra lightweight metal splint. Soft lined interior is breathable for wearing comfort. Easy to slip on and slip off using only one hand.

Measure around break of wrist.

- INFANT under 4.5 in.
- PEDIATRIC 4.5 - 5.5 in.
- YOUTH 5.5 - 6.5 in.

Specify for RIGHT or LEFT wrist.

KidLine cradle style arm sling

Model: C-320-NV (NAVY), C-320-PP (PEDIATRIC PRINT)
HPCPS: A4565

Provides well-balanced support to the arm during recuperation from fracture, sprain or surgery, evenly distributing its weight. It is reversible for the right or left arm. Thumb loop feature supports the hand, maintains the wrist in a neutral position for wearing comfort.

Measure from elbow to tip of little finger.

- INFANT 3.5-5.5 in.
- PEDIATRIC 5.0-8.0 in.
- YOUTH 7.0-10.0 in.

C-320-PP

KidLine rocker bottom cast shoe
Model: C-323-PP
HPCPS: L3260

Made from colorful clown print canvas. Three hook-and-loop closures. Skid resistant rocker bottom. Open heel and toe for versatility in sizing.

Sole dimensions:

- INFANT 5.5 in. length, 3" width
- PEDIATRIC 7.25 in. length, 3.625" width

KidLine soft foam cervical collar
Model: C-321
HPCPS: L0120

Worn as a reminder against making sudden, painful neck movements. Soft foam - 1/2" thick - with breathable stockinette cover. Hook-and-loop fasteners permit quick and easy adjustment and closure.

Measure neck circumference.

- INFANT 9.0-10.5 in.
- PEDIATRIC 10.0-12.0 in.
- YOUTH 12.0-14.0 in.

Reversible for right or left wrist.

Sports Knee, Ankle & Elbow Supports

Therapeutic knee guard Model: C-211 HCPCS: A4465

Targets the physiological causes of minor knee pain due to abnormal tracking or alignment of the patella. It works in concert with the motion of the knee, applying pressure to the joint liner and patellar tendon to assist in the relief of minor pain. Tubular pad provides extra uplift around the patella for proper function.

Universally adjustable to fit most adult knees.

LATEX FREE

Knee wrap with patellar stabilizing pad Model: C-212 HCPCS: A4466

Neoprene material retains natural body heat to help soothe aching muscles and maintain flexibility, provide firm, uniform compression to support weakened joints, and offer moderate protection from bumps and bruises. Four-way stretch material provides even compression over the prominences of the knee. Hook compatible laminate allows for a wide range of adjustment over swelling. Multi-function buttress surrounds kneecap (patella) and provides compression and stabilization.

This knee wrap is adjustable to fit most adult knees up to approximately 22.0 in. (55.9 cm) in circumference.

Ankle stabilizer with medial-lateral stays Model : C-214 HCPCS: L1901

Constructed to provide more support than an ordinary elastic anklet, but does not restrict motion altogether as some harness type supports. Flexible support stays to work together with the sturdy fabric to provide maximum support while permitting normal activity. Supports the ankle area, helps reduce swelling and relieve discomfort, helps prevent reinjury.

Universally adjustable to fit most adult ankles.

LATEX FREE

Black elastic ankle support Model: C-215 HCPCS: A4466

Provides compression where it is needed most – over the soft tissues of the joint – without binding or cutting around the edges. Post cast/surgical support for weakened ankles. Durable rubber core elastic exerts compression over the soft tissues of the ankle, fitting comfortably around the bony prominences of the joint. Absorbs perspiration for all day wearing comfort.

Measure around the smallest part of the ankle.
SM/MED 6.75-8.75 in.
LG/XL 8.75-10.75 in.

Neoprene knee support with patellar pad Model: C-216 HCPCS: A4466

Four-way stretch material provides even compression over the prominences of the knee. Multi-function neoprene buttress surrounds kneecap (patella) and provides compression and stabilization. Retains natural body heat to help soothe aching muscles and maintain flexibility, provide firm, uniform compression to support weakened joints, and offer moderate protection from bumps and bruises.

Measure around the bend of the knee.
SMALL 13.0-14.0 in.
MEDIUM 14.0-15.0 in.
LARGE 15.0-16.0 in.
X-LARGE 16.0-17.0 in.

Neoprene ankle support Model: C-217 HCPCS: A4466

Figure-8 design conforms to the surface anatomy of ankle. Provides post cast/surgical support. Four-way stretch neoprene material provides even compression over joint prominences. Helps permit continued activity without binding or cutting.

Measure around the smallest part of the ankle.
SMALL 6.0-8.0 in.
MEDIUM 8.0-10.0 in.
LARGE 10.0-12.0 in.
X-LARGE 12.0-15.0 in.

Neoprene wraparound wrist support
Model: C-218
HCPCS: A4466

Suitable for sprains, strains, carpal tunnel syndrome or arthritis. Thumb hole maintains support in position. Easy one-hand application. Closed cell foam material offers moderate motion control, as well as protection against bumps and abrasions.

Universally adjustable to fit most adult and adolescent wrists. Reversible to fit either the right or left wrist.

Sheer elastic knee support
Model: C-62
HCPCS: A4466

Combines effective support with unbeatable wearing comfort. Post cast/surgical support for weakened knees. Elastic fabric provides firm support; helps improve circulation to promote healing. Absorbs perspiration for all day wearing comfort. Inconspicuous beige color.

Measure around the bend of the knee.

- SMALL 10.0-12.75 in.
- MEDIUM 13.0-15.75 in.
- LARGE 16.0-18.75 in.
- X-LARGE 19.0-21.75 in.

Neoprene elbow support
Model: C-219
HCPCS: A4466

Indicated for tendinitis, bursitis, arthritis, golfer's elbow, tennis elbow, mild elbow pain and tenderness. Four-way stretch material provides even compression over all the anatomical prominences of the elbow joint.

Measure around the bend of the elbow.

- SMALL 9.0-10.0 in.
- MEDIUM 10.0-11.0 in.
- LARGE 11.0-12.0 in.
- X-LARGE 12.0-13.0 in.

Knee brace with hinged bars
Model: C-65
HCPCS: L1810

Provides optimum support to the knee joint after moderate to severe injury involving the surrounding soft tissues. One-way stretch elastic sleeve utilizes a real rubber core as the basis of support. Lightweight hinged bars allow for normal knee flexion and extension and provide effective medial-lateral support. Hinged bars are covered and protected within. Hook and loop encircling straps maintain brace in position and are easily adjustable for comfort.

Measure around the bend of the knee.

- SMALL 10.0-12.75 in.
- MEDIUM 13.0-15.75 in.
- LARGE 16.0-18.75 in.
- X-LARGE 19.0-21.75 in.

Criss-cross knee support
Model: C-57
HCPCS: A4466

Strong one-way stretch rubber core elastic provides firm support and helps improve circulation to promote healing. Absorbs perspiration for all day wearing comfort. Reinforced non-roll edges.

Measure around the bend of the knee.

- SMALL 10.0-12.75 in.
- MEDIUM 13.0-15.75 in.
- LARGE 16.0-18.75 in.
- X-LARGE 19.0-21.75 in.

Firm elastic knee support
Model: C-70
HCPCS: A4466

Provides compression where it is needed most – over the soft tissues of the joint – without binding or cutting around the edges. Durable rubber core elastic exerts compression over the soft tissues of the knee, fitting comfortably around the bony prominences of the joint. Absorbs perspiration for all day wearing comfort. Natural white color.

Measure around the bend of the knee.

- SMALL 10.0-12.75 in.
- MEDIUM 13.0-15.75 in.
- LARGE 16.0-18.75 in.
- X-LARGE 19.0-21.75 in.

Knee, Ankle, Elbow & Wrist Supports

Contour cut knee support Model: C-70/44 HCPCS: A4466

Provides support and confidence during activity, helps prevent re-injury. Elastic, cotton-rayon blend fabric provides firm support; helps improve circulation to promote healing. Absorbs perspiration for all day wearing comfort. Inconspicuous neutral color.

Measure around the bend of the knee.

- SMALL 10.0-12.75 in.
- MEDIUM 13.0-15.75 in.
- LARGE 16.0-18.75 in.
- X-LARGE 19.0-21.75 in.

Knee brace with flexible stays Model: C-72 HCPCS: A4466

Flexible support stays provide medial-lateral stability to the knee while brace maintains its proper position at all times. Strong one-way stretch rubber core elastic provides firm support and helps improve circulation to promote healing. Absorbs perspiration for all day wearing comfort. Three flexible stays on each side for medial-lateral reinforcement. Reinforced non-roll edges.

Measure around the bend of the knee.

- SMALL 10.0-12.75 in.
- MEDIUM 13.0-15.75 in.
- LARGE 16.0-18.75 in.
- X-LARGE 19.0-21.75 in.

Knee brace with Hor-Shu support pad Model : C-74 HCPCS: A4466

Provides optimum multi-directional support over the soft tissues of the knee joint. Hor-Shu support pad self-aligns and maintains its proper position, applying support as a constant, unified stable force. Strong one-way stretch rubber core elastic. Three flexible stays on each side for medial-lateral support. Reinforced non-roll edges.

Measure around the bend of the knee.

- SMALL 10.0-12.75 in.
- MEDIUM 13.0-15.75 in.
- LARGE 16.0-18.75 in.
- X-LARGE 19.0-21.75 in.

Firm elastic ankle support Model: C-60 HCPCS: A4466

Medium duty controlled stretch support can be worn for mild sprains and strains, or for weakness due to previous injury or over-exertion. Provides comfortable uniform compression around the ankle while helping to permit continued activity and preventing re-injury.

Measure around the smallest part of the ankle.

- SMALL 6.75-7.75 in.
- MEDIUM 7.75-8.75 in.
- LARGE 8.75-9.75 in.
- X-LARGE 9.75-10.75 in.

Figure 8 ankle support Model: C-60/45 HCPCS: A4466

Post cast/surgical support for weakened ankles. Figure-8 design conforms to the anatomy around the ankle joint. Elastic, cotton-rayon blend fabric provides firm support; helps improve circulation to promote healing. Fits easily inside shoes. Absorbs perspiration for all day wearing comfort.

Measure around the smallest part of the ankle.

- SMALL 7.0-8.0 in.
- MEDIUM 8.25-9.0 in.
- LARGE 9.25-10.0 in.
- X-LARGE 10.25-11.0 in.
- V-LARGE 11.25-12.0 in.

Ankle brace with flexible stays Model: C-63 HCPCS: A4466

Controlled stretch support helps reduce swelling and minimize pain while allowing full range of ankle motion. Easy to apply – slips on like a sock, and its slim design fits easily into shoes. Features bilateral spiral stays that move with the ankle, and provide side-to-side support and stability. An excellent support for light sports and exercise activity.

Measure around the smallest part of the ankle.

- SMALL 6.75-7.75 in.
- MEDIUM 7.75-8.75 in.
- LARGE 8.75-9.75 in.
- X-LARGE 9.75-10.75 in.

Sheer elastic ankle support
Model: C-64
HCPCS: A4466

Combines effective support with unbeatable wearing comfort. Post cast/surgical support for weakened ankles. Elastic provides firm support; helps improve circulation to promote healing. Absorbs perspiration for all day wearing comfort. Inconspicuous beige color.

Measure around the smallest part of the ankle.

- SMALL 6.75-7.75 in.
- MEDIUM 7.75-8.75 in.
- LARGE 8.75-9.75 in.
- X-LARGE 9.75-10.75 in.

Contour cut elbow support
Model: C-70/42
HCPCS: A4466

Provides a comfortable uniform compression over the elbow while helping to permit continued activity without binding or cutting. Improved contour cut design for better support and wearing comfort. Elastic, cotton-rayon blend fabric provides firm support; helps improve circulation to promote healing. Absorbs perspiration for all day wearing comfort. Inconspicuous neutral color.

Measure around the bend of the elbow.

- SMALL 9.0-9.75 in.
- MEDIUM 10.0-10.75 in.
- LARGE 11.0-11.75 in.
- X-LARGE 12.0-13.0 in.

Tennis elbow strap
Model: C-43
HCPCS: A4465

Designed to provide temporary relief from "tennis elbow". Wrapped snugly just below the elbow joint, non-elastic foam lined fabric inhibits the muscular action that can lead to pain and weakness. Can be used with removable foam "acu-point" pressure pad for maximum support and relief. Hook and loop closure is fully adjustable and can be trimmed for a custom fit. Easy one-hand application.

Universally adjustable to fit most adults and adolescents.

LATEX FREE

Elastic pullover wrist support
Model: C-45
HCPCS: A4466

Medium duty controlled stretch support can be worn for mild sprains and strains, or for weakness due to previous injury or over-exertion. Provides comfortable uniform compression over the wrist while helping to permit continued activity and preventing re-injury.

Measure around the break of the wrist.

- SMALL 5.5-7.5 in.
- MEDIUM 6.5-8.5 in.
- LARGE 7.5-9.5 in.
- X-LARGE 8.5-10.5 in.

Reversible for right or left wrist.

Firm elastic elbow support
Model: C-53
HCPCS: A4466

Medium duty controlled stretch support can be worn for mild sprains and strains, or for weakness due to previous injury or over-exertion. Provides comfortable uniform compression around the elbow while helping to permit continued activity and preventing re-injury.

Measure around the bend of the elbow.

- SMALL 8.5-10.0 in.
- MEDIUM 10.0-11.5 in.
- LARGE 11.5-13 in.
- X-LARGE 13-14.5 in.

Wraparound wrist support
Model: C-47
HCPCS: A4466

Provides maximum support over center of wrist, and less tension around edges of support for wearing comfort. Can be worn on either right or left wrist. Hook and loop fastening adjusts to accommodate swelling. Thumb loop allows for easy one-hand application. Elastic, cotton-rayon blend fabric provides firm support; absorbs perspiration for all day wearing comfort. Inconspicuous neutral color.

Universally adjustable to fit most adult wrists.

Wrist Supports, Bandages, Cast Protectors & Compresses

Elastic pullover wrist splint Model: C-50 HCPCS: L3908

Specially shaped splint holds the hand and wrist in the position recommended by physicians for correct healing of sprains, strains and other injuries. Also suitable for treatment of arthritis and carpal tunnel syndrome. Elastic, cotton-rayon tri-tension fabric places greatest amount of support directly over the wrist. Hook and loop encircling strap permits easy self-adjustment.

Measure around the break of the wrist.

- SMALL 5.5-7.5 in.
- MEDIUM 6.5-8.5 in.
- LARGE 7.5-9.5 in.
- X-LARGE 8.5-10.5 in.

Reversible for right or left wrist.

Elastic wrist splint Model: C-50/33 HCPCS: L3908

EXCELLENT SUPPORT – shaped aluminum splint keeps the wrist comfortably fixed at a 32° angle to promote healing and minimize pain. Tri-tension fabric places greatest amount of support directly around the joint, less around the hand and forearm. Hook and loop closures allow easy self-adjustment for excellent support and comfortable fit. Padded closure between index finger and thumb.

Measure around the break of the wrist.

- X-SMALL under 5.5 in.
- SMALL 5.5-6.5 in.
- MEDIUM 6.75-7.5 in.
- LARGE 7.75-8.5 in.
- X-LARGE 8.75 in. and up

Specify for right or left wrist.

Cloth wrist splint Model : C-51 HCPCS: L3908

Specially designed and constructed of durable white cotton material; provides longer wear and more support than an ordinary elastic wristlet. Pre-shaped aluminum splint keeps the wrist comfortably fixed at a 32° angle to promote healing. Back lace arrangement with hook and loop fastening tabs for comfortable range of adjustment, custom fit.

Measure around the break of the wrist.

- SMALL 5.5-7.5 in.
- MEDIUM 6.5-8.5 in.
- LARGE 7.5-9.5 in.
- X-LARGE 8.5-10.5 in.

Reversible for right or left wrist.

Elastic bandages Model: C-122 - 2" wide (ankle, foot, wrist) C-123 - 3" wide (ankle, foot, leg) C-124 - 4" wide (leg, shoulder) HCPCS: A4590

For post-injury applications – allows for adjustable compression over injured soft tissues. Professional quality, highly stretchable beige elastic with two fasteners. Inconspicuous neutral color. Can be washed and reused.

Self-adhering elastic bandages Model: C-132 - 2" wide (ankle, foot, wrist) C-133 - 3" wide (ankle, foot, leg) C-134 - 4" wide (leg, shoulder) HCPCS: A4590

Self adhering – requires no fasteners. Allows for adjustable compression over injured soft tissues. Professional quality, highly stretchable beige elastic. Inconspicuous neutral color.

Cast protector, half leg size
Model: C-156
HCPCS: A9270

For casts and bandages below the knee. Water tight protection keeps cast or bandage area dry in shower or bath, or even while swimming. Made from puncture and tear resistant vinyl. Adjustable gripper strip provides maximum seal. Measure length of leg to be covered.

Measure length of leg to be covered.
 YOUTH up to 18.0 in.
 ADULT up to 27.0 in.

Sacro brace with Thermo-Pad Model: C-7 HCPCS: A4466

LATEX FREE

Features a unique construction to provide optimum support and comfort to the sacrum and the lower spine. The adjustable design allows it to conform to effectively support virtually every adult figure type. The removable Thermo-Pad provides added warmth for aching muscles, joints, tendons and discs that so often accompany low back disorders.

This brace is universally adjustable to fit hip circumferences from 32 to 44 in.

Hernia belt Model: C-5 HCPCS: L8310

Effective support and control of a reducible inguinal hernia. Can be worn with both adjustable pads for a double hernia or with either pad removed for a single hernia. Complete range of pad adjustment for a perfect fit. Soft, tubular knit leg straps maintain pads in proper position; will not cut, bind or restrict normal movement. Adjustable belt maintains position on the body for maximum support, containment and control.

Measure hip circumference.

SMALL	26.0-32.0 in.
MEDIUM	34.0-40.0 in.
LARGE	42.0-48.0 in.

Industrial belt Model: C-205S (BLACK), C-206S (WHITE) HCPCS: L1499

LATEX FREE

Provides extra abdominal support to help prevent strain and injury during heavy lifting and work activity. Allows freedom of movement, promotes proper lifting technique. Worn over clothing, easy to apply and remove. Elastic and foam construction is lightweight and durable; hook and loop fastening for easy adjustment and closure. Comfortable and effective. Available with shoulder straps (C-205S, C-206S) or without (C-205, C-206).

Measure waist circumference.

X-SMALL	26.0-36.0 in.
REGULAR	34.0-44.0 in.
X-LARGE	42.0-52.0 in.
2X-LARGE	50.0-60.0 in.

LATEX FREE

Suspensory Model: C-52

Helps relieve strain and fatigue over the scrotal area. Also recommended after hernia surgery or during treatment for scrotal disease. Soft knitted cotton/rayon mesh pouch, "breathable" for cool comfort and support. Pouch holds position when the body moves, and is inconspicuous under clothing. Non-elastic adjustable waist band with easy snap fastener – snaps on and off without readjustment. Sanitary and completely washable.

Size is determined by width across pouch.

SMALL	3.5-4.0 in. (up to 32 in. waist)
MEDIUM	4.0-4.5 in. (up to 36 in. waist)
LARGE	4.5-5.0 in. (up to 40 in. waist)
X-LARGE	5.0-6.0 in. (up to 46 in. waist)
2X-LARGE	6.0-7.0 in. (up to 52 in. waist)

Sports support Model : C-81 HCPCS: A9270

Designed to provide optimum support and comfort during athletics and other strenuous activities. Wide waist band to prevent supporter from shifting on body during strenuous activity. Soft textured pouch prevents strain and fatigue without binding. Comfortable, non-roll leg straps. Also recommended for post-operative treatment and support. Quick dry material for easy care.

Measure waist circumference.

SMALL	20.0-26.0 in.
MEDIUM	26.0-32.0 in.
LARGE	32.0-38.0 in.
X-LARGE	38.0-44.0 in.

Sports brief
Model: C-86
HCPCS: A9270

All the protection of an athletic support with all the comfort of regular underwear. Cool, quick drying fabrics. Reinforced waist band. Comfortable, non-binding leg openings. Appropriate for all sports. Also recommended for post-operative treatment and support

Measure waist circumference.
 REGULAR 28.0-36.0 in.
 LARGE 38.0-44.0 in.

Rib belt for women
Model: C-6170
HCPCS: A4466

Offers support for injured ribs or strained muscles in the chest or upper back, and helps make breathing and body movements more comfortable. Sturdy elastic back panel allows for easy movement and minimizes binding. White canvas material with soft porous foam padding absorbs perspiration for comfortable all-day wear. Convenient hook and loop front closure for easy self-application and adjustment.

Measure chest circumference at the base of the breast bone.

SMALL 23.0-26.0 in.
 MEDIUM 28.0-32.0 in.
 LARGE 34.0-38.0 in.

LATEX FREE

Cradle arm sling
Model: C-17
HCPCS: A4565

Provides well-balanced support to the arm during recuperation from fracture, sprain or surgery, evenly distributing its weight. It is reversible for the right or left arm, and has a wide range of adjustment to easily fit most adults. Cradle design for even weight distribution. Thumb loop feature supports the hand, maintaining the wrist in a neutral position for long-term wearing comfort. Generously cut to effectively fit a wide range of adult figure types. Easy one-hand application.

Universally adjustable to fit most adults.

LATEX FREE

Rib belt for men
Model: C-6171
HCPCS: A4466

For use in cases of rib fractures and contusions – limits uncomfortable chest expansion through circular compression. Same materials and construction as C-6170, but cut for the male figure.

Measure chest circumference at the base of the breast bone.

SMALL 26.0-32.0 in.
 MEDIUM 34.0-40.0 in.
 LARGE 42.0-48.0 in.

LATEX FREE

Shoulder brace
Model : C-6147
HCPCS: L3650

Constant reminder to sit, walk and stand with proper posture. Padded shoulder straps pass under the arms snugly and criss-cross in back. When the shoulders slump, the straps become tight around the underarms and remind the wearer to resume proper posture. Allows for normal movement without binding. Degree of support is adjustable by tightening the shoulder straps. Easy to apply and remove.

Measure chest circumference at the base of the breast bone.

SMALL 23.0-26.0 in.
 MEDIUM 28.0-32.0 in.
 LARGE 34.0-38.0 in.
