

OPTILOCK[®]

NON-ADHESIVE, SUPER ABSORBENT WOUND DRESSING

THE
Optimal Dressing
FOR **Locking** AWAY EXUDATE

The Standard of Gentle Wound Care

Optilock is a wound dressing that absorbs a remarkable amount of wound fluid—even under compression—and locks it away to help prevent maceration. This super absorbent dressing has a non-adherent facing that minimizes disruption to the wound and allows for gentle removal—an advancement your patients will thank you for.

GENTLE ON WOUNDS, TOUGH ON EXUDATE

Absorbs — Super absorbent polymer core efficiently absorbs high volumes of exudate.

Gently absorbs exudate, even for the most heavily draining wounds

Locks — Inside the core, exudate is converted into a gel that's kept firmly away from the wound, even under compression.

Gently protects against maceration, including the periwound skin

Adjusts — Continually adapts the level of absorption to the amount of wound drainage.

Gently provides an optimal moist wound healing environment

Protects — Non-adherent wound contact layer prevents the dressing from sticking to the wound or periwound skin.

Gently releases from the wound during dressing changes

WOUND CONTACT LAYER
Non-adherent, for gentle removal.

“REVERSE FUNNEL” DESIGN
Unique design of contact layer helps direct fluid in one direction — away from the wound.

DISPERSION LAYER

Evenly distributes and quickly transfers exudate into the superabsorbent core.

SUPER ABSORBENT CORE

Absorbs large amounts of exudate, which is converted to a gel and locked away from the wound.

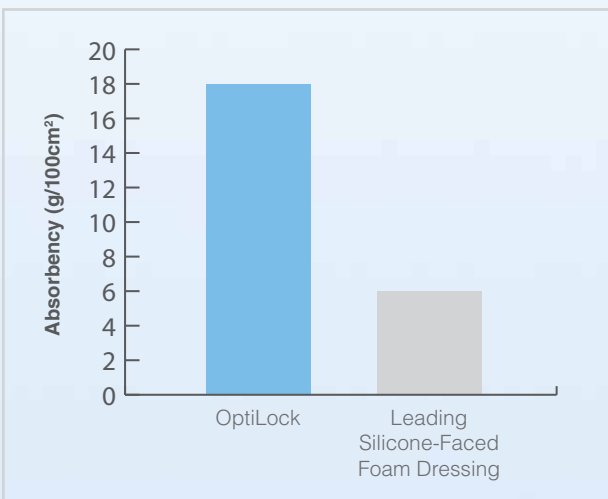

BLUE PROTECTIVE BACKING

Helps protect clothing and sheets.

TESTING SHOWS: OPTILOCK ABSORBS AND RETAINS MORE FLUID

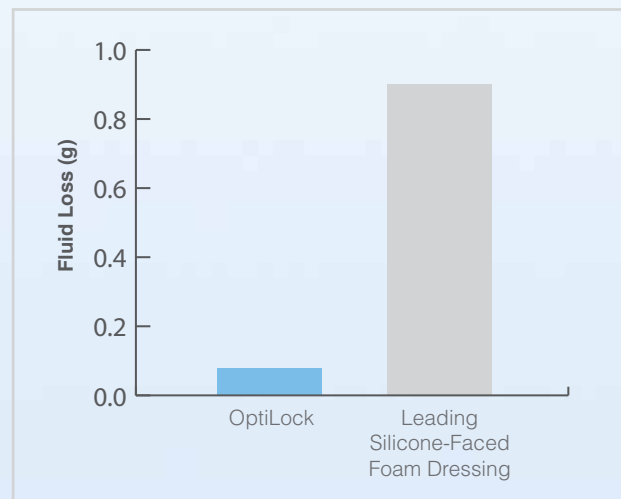

In manufacturer's laboratory testing, Medline's OptiLock dressings outperformed a leading silicone-faced foam dressing. OptiLock's remarkable absorption and fluid retention capabilities raise the bar for gentle wound care.

Absorption Capacity Under Compression¹

OptiLock **ABSORBS APPROXIMATELY THREE TIMES MORE FLUID** than a leading silicone-faced foam dressing.

Fluid Loss Under Compression¹

OptiLock dressings **RETAIN SUBSTANTIALLY MORE FLUID UNDER COMPRESSION** than a leading silicone-faced foam dressing.

OPTILOCK®

NON-ADHESIVE, SUPER ABSORBENT WOUND DRESSING

Educational Packaging

OptiLock features Medline's Educational Packaging (EP). The package focuses on patient safety and correct product application. Each package serves as a 2-Minute Course on Wound Care™.

Uses

A primary dressing on partial-thickness and full-thickness wounds or a secondary dressing on full-thickness wounds, including:

- Ulcers (pressure, venous, neuropathic/diabetic)
- Postoperative wounds
- First- and second-degree burns

Change Frequency

Can remain in place up to seven days, depending on the level of exudate.

The product box (shown above) and individual pouches feature step-by-step directions on how to use the dressing properly — making it hard to do the wrong thing.

OptiLock Ordering Details

Case Item Number	Description	Packaging
MSC6433EP	3 in x 3 in (7.62 cm x 7.62 cm)	100 cs / 10 bx / 1 ea
MSC6444EP	4 in x 4 in (10.2 cm x 10.2 cm)	100 cs / 10 bx / 1 ea
MSC6455EP	5 in x 5.5 in (12.7 cm x 14 cm)	100 cs / 10 bx / 1 ea
MSC64610EP	6.5 in x 10 in (16.5 cm x 25.4 cm)	50 cs / 10 bx / 1 ea
MSC64812EP	8 in x 12 in (20.3 cm x 30.5 cm)	80 cs / 10 bx / 1 ea

To order by the box, add a "Z" to the end of the item number. To order by the each, add an "H" to the end of the item number.
