Foam Dressings with Silicone

Restore Foam Dressings with Silicone

Performance. Comfort. Value.

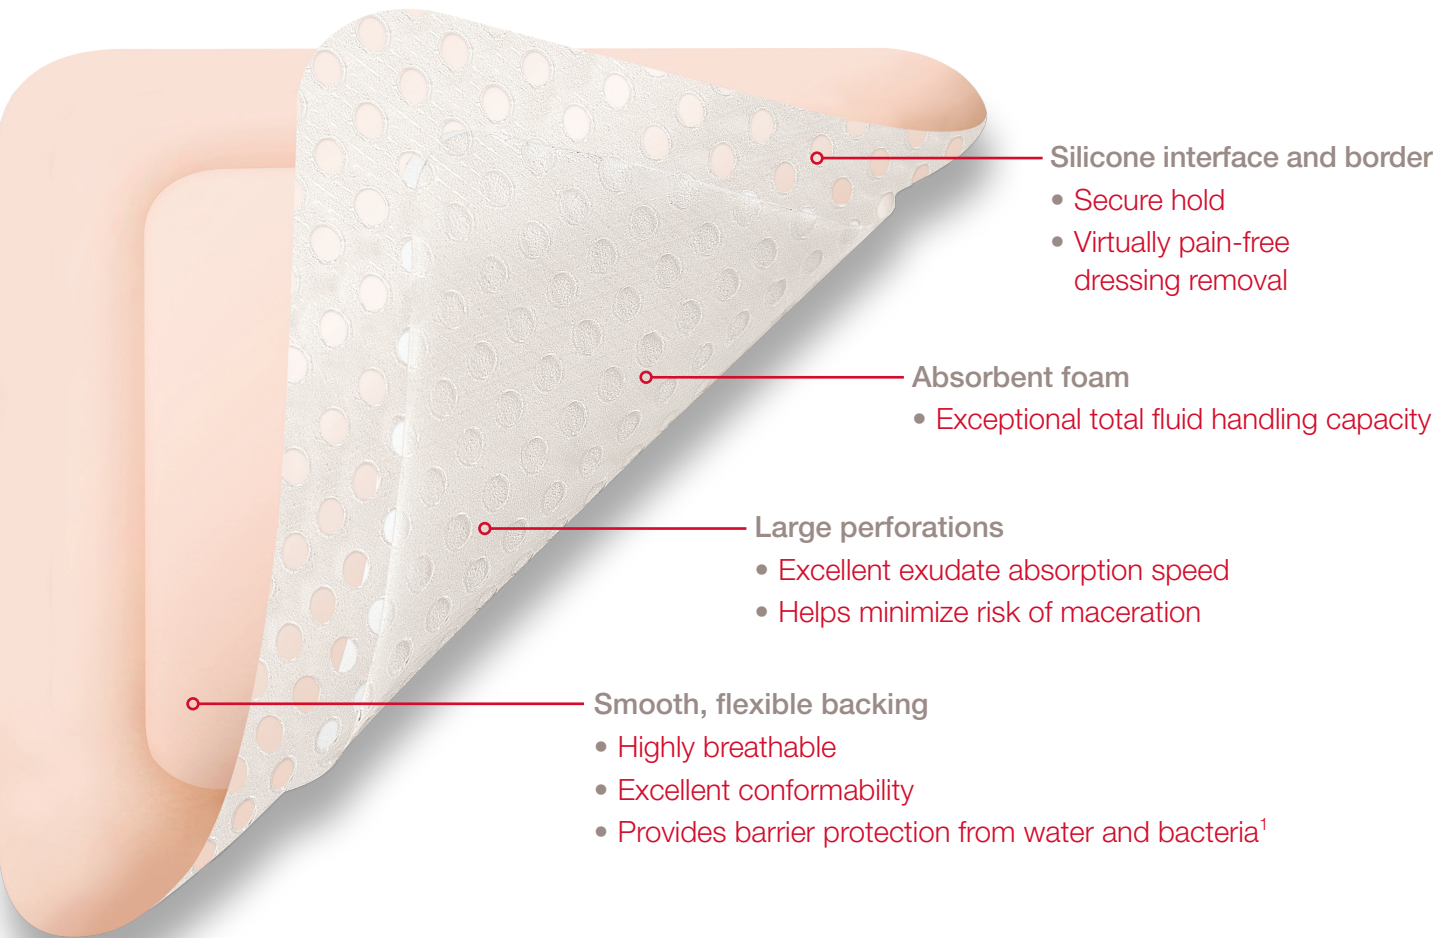

- Fluid handling you need
- Comfort your patient demands
- Value you can count on

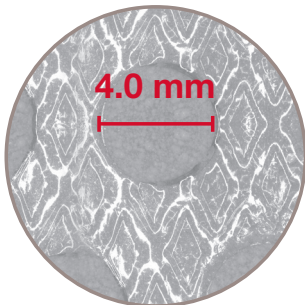

# Restore Foam Dressings with Silicone

Exceptional Fluid Management,  
Secure Yet Gentle Hold.

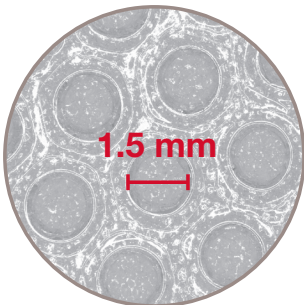

Large perforations designed to improve fluid absorption.

- Perforations are 2.5X larger than a leading foam dressing, which speeds absorption and helps to minimize the risk of maceration.\*

Restore foam dressing with silicone

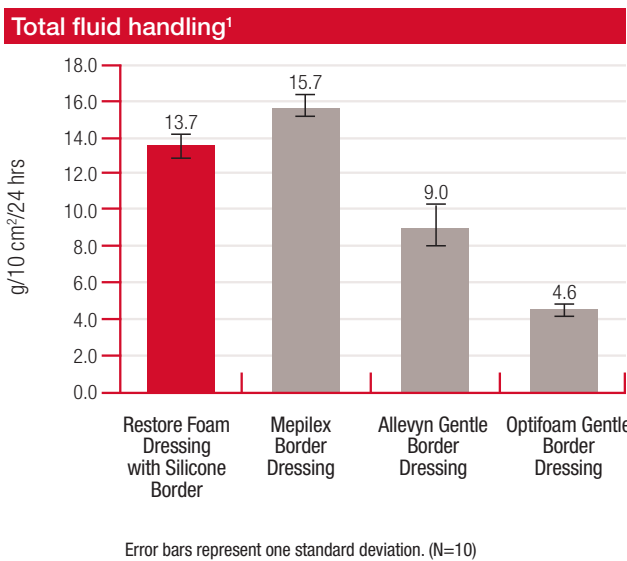

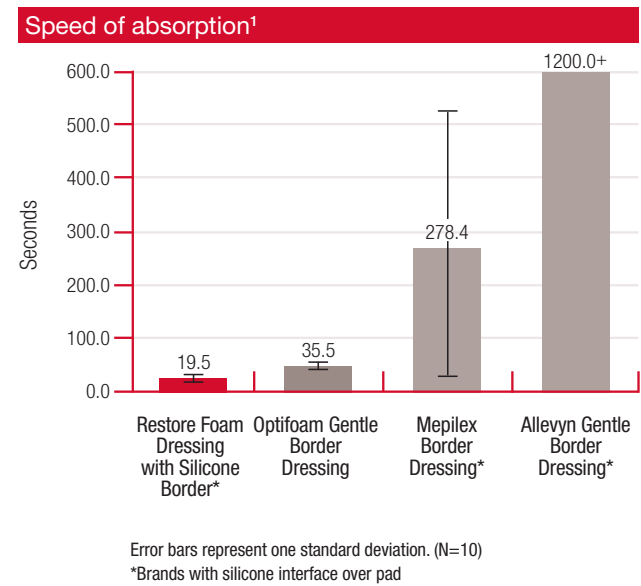

Mepilex® Border foam dressing

\*Compared to Mepilex Border dressing.<sup>1</sup>  
Images shown at 30X magnification

## Performance.

Large perforations and absorbent foam make the difference.

- Large perforations allow for rapid absorption of exudate
- Highly absorptive foam wicks exudate away from the wound bed

## Comfort.

During application. During wear. During removal.

- **Silicone interface**
  - Provides secure, yet gentle hold
  - Provides gentle tack for easier application
  - Minimizes adhesion to the wound bed
  - Reduces risk of trauma and pain at dressing change
- **Smooth, film backing to ease sliding across bedding and clothing**
- **Soft, conformable dressing for difficult to dress areas**

## Value.

Simply performs.

- Fluid handling you need
- Comfort your patient demands
- Priced lower than leading competitive brands\*\*
- Quality backed by Hollister

\*\* Pricing compared to similar sizes of Mepilex, Mepilex Border, Allevyn Gentle, and Allevyn Gentle Border dressings.  
Based on 03.15 analysis of FSS and GHX 2013 data.
