# Wound Care

Abena's wound care concept, Curi-Med, consists of a wide range of basic wound care products complying to international standards.

**Abena's range of wound care products is developed with attention to the needs of patients and therapists.**

The wound care concept offers a wide range of traditional products such as:

- Swabs – gauze and nonwoven – the most common qualities
- Adhesive dressings for fixation and protection of wounds
- Fixation bandages for patients with sensitive skin
- Support bandages for traumas on joints or muscles
- Compression bandages for treatment of for example edema due to venous disease
- Tubular bandages for retention and padding
- Orthopedic underpadding – natural and synthetic – cushioning under POP and compression bandages
- Forceps non-sterile
- Dressing set

**Our wound care concept is continuously under development and new products will be introduced on regular basis.**

## ECO Preserving the environment

- Our wound care products are designed to have minimum impact on the environment
- The optimized packaging and logistics are your guarantee for less waste and lower CO<sub>2</sub>-emissions
- Paper and plastic materials used in both products and packaging are recyclable
- Abena is ISO 9001 and ISO 14001 certified
- Abena supports United Nations Global Compact in the areas of human rights, labor, environment and anti-corruption

# Wound Care

## Unique Selling Points for Our Wound Care Concept

- Wide range of products in different areas covers basic needs in the treatment of patients with wounds
- Many products are also suitable for cleansing the skin, stoma care, fixation etc.
- Good quality – fair price
- Wide range of sizes and shapes
- One design for all products
- Design and packaging developed for hygienic and easy handling
- Packaging optimized for logistics handling

# Dressings

Absorbent Pads . Post-op Dressings . Tape

## Product info

- CuriMed absorbant pads in sterile and non-sterile versions are used in the treatment of medium to heavy exudative wounds.
- The semipermeable, sterile Post-Op Dressings combine an absorbent pad with a soft and comfortable fixation layer. They are used for light to moderately secreting wounds.

## Abena House of Concepts

Our large own production of incontinence products provides a strong platform for our health care partners. By adding a wide selection of Abena's other health care products, they build their own house of concepts perfectly adjusted to their local markets.
